- 6.3" LCD Touch Screen Control System
- Gourmet Recipe Bank
- Convection Conversion
- 3 Heavy Duty Racks with 1 Glide Rack
- Self Cleaning

Stainless Steel

BUILT-IN OVENS

6.3" LCD Touch Screen Control System

The 6.3" LCD touch-screen control system is very easy to use. One touch activation allows users to select and monitor any of the cooking options, including the Gourmet Recipe bank. The Gourmet Recipe bank contains 100 recipes with 42 preprogrammed. This feature allows users to select the programmed recipe and the wall oven automatically sets the proper cooking cycle, time & temperature.

LG's exclusive Convection System delivers the ideal temperature and airflow for faster preheating and uniform cooking. Cook your meals just as you want with 4 Convection Options – Convection Bake, Roast, Crisp, and Healthier Roast.

Convection Bake

Convection bake heat distribution allows for even cooking and has excellent results when baking multiple racks at the same time.

Convection Roast

Heat circulates around the food from all sides, sealing in juices and flavors. This mode is especially good for large, tender cuts of meat.

Crisp Convection

Continually distributes heat precisely so cooked foods such as biscuits, scones or pizza can remain delicious on the inside and crisp on the outside.

Healthier Roast

This cooking mode is designed for reducing fat when roasting meats or poultry. Foods are cooked brown on the outside and succulent and flavorful on the inside.

Spacious 4.7 cu.ft. Capacity

The large 4.7 cubic capacity with a premium blue interior elegantly accentuates the vivid convection glow. The recessed broiler element, hidden bake element, 3 interior lights and a gliding rack system take cooking to the next level.
