- ✓ Tag On - NFC (Near Field Communication)
- ✓ 6 Star Energy Rating
- ✓ Stainless Steel Drum
- ✓ LED Interior Light
- ✓ 6 Sensors
- ✓ Time Remaining Display
- ✓ Time Delay

Heat Pump Dryer

Heat Pump Dryer uses a refrigeration system to dry and recycle the same air so it consumes a fraction of the energy used by conventional dryers through the recycling and reclaiming heat process.

Sensor Drying

LG Sensor Dryer - uses 3 sensors to monitor the heat exchange, moisture and air temperature for optimal drying results. The sensors automatically control the drying time and temperature based on the selected program and help prevent over drying.

Included Accessories

Stacking Kit- allows you to securely stack this machine on top of your front load washing machine. This is suitable for both 550mm & 600mm washing machines.
Drying Rack - great for items that you don't want to tumble dry such as shoes or backpacks.

Tag On - NFC*

LG Tag On function allows you to download additional drying programs via your Smart Phone to your dryer. You can also view usage history on your dryer for the last 10 cycles and diagnose any issues with the dryer along with suggested ways to rectify.

* LG Smart Laundry App is needed to use this function along with a compatible Android smart phone. Available for download from the Android Play Store.
