9kg Heat Pump Hybrid Dryer in White Finish

Reduces drying
time by a third
when used in
Speed Mode

Available March 2015
RRP: \$2,749[^]

Features

- ✓ 9kg Capacity
- ✓ Heat Pump Hybrid Dryer
 - Eco Mode
 - Speed Mode
- ✓ 6 Star Energy Rating in Eco Mode
- ✓ Stainless Steel Drum
- ✓ LED Interior Light
- ✓ Sensor Drying
- ✓ Time Remaining Display
- ✓ Time Delay

Hybrid Dryer

LG Hybrid Dryer 2 different modes allow you to choose from either energy efficiency or time saving modes.

Eco Mode is the most energy efficient drying method of this dryer, which utilises Ventless Heat Pump Technology. It uses a refrigeration system to dry and recycle the same air so it consumes a fraction of the energy used by conventional dryers through the recycling and reclaiming heat process.

Speed Mode uses the additional element to help speed up the drying process. Reduces drying time by a third compared to Eco Mode.

Sensor Drying

Sensor Drying - uses 7 sensors to monitor the heat exchange, moisture and air temperature for optimal drying results. The sensors automatically control the drying time and temperature based on the selected program and help prevent over drying.

Included Accessories

Stacking Kit - allows you to securely stack this machine on top of your front load washing machine. This is suitable for both 550mm & 600mm washing machines.

Drying Rack - great for items that you don't want to tumble dry such as shoes or backpacks.

TrueSteam™

LG TrueSteam™ - consists of a steam generator that applies steam to the laundry on selected drying programs. You can use the Steam Refresh program to freshen up clothes that have only been worn for a short time. Also by applying steam you can reduce odours and wrinkles.
