ENERGYSTAR® qualified models exceed the Department of Energy standards for energy consumption by at least 25%. LG's Energy Star dishwashers allow consumers to save money, energy and protect the environment.

DISH WASHERS

Semi-Integrated Electronic Panel with Digital Status Display

Provides a beautiful exterior appearance while keeping you informed of the cycle status. Electronic controls ensure precise cleaning for safe dish care.

LoDecibel™ Quiet System

Ensures you can talk on the phone or listen to the TV or the radio in your kitchen while the dishwasher is running. A combination of sound reducing material and the Direct Drive Motor ensures low noise.

SenseClean™ System

Measures turbidity in the water with an LED light during the first rinse. Then water and time is adjusted during the second cycle based on the need for more or less cleaning. This provides precise cleaning, water and energy efficiency.

Multi-Level Water Direction

Sprays water and detergent in five directions for even and thorough cleaning.

Hybrid Condensing Drying System

Uses a fan and condensation drying. The benefit is faster drying, reduced spotting and better energy efficiency.

Slim Direct Drive Motor™

Delivers power directly to the tub from the motor without belts or pulleys. This innovative system enables a clean transfer of energy that is highly reliable, durable, quiet and compact.

LDS4821

CAPACITY	
Total Place Settings	16
Design-A-Rack™ System:	
Adjustable Upper Rack	Manual 2" Height
Maximum Height of Upper Rack	Holds up to 12" Dishes and Stemware
Fixed Tines	•
Stemware Holder	Serves as Double Decker Cup Holder
