#### **Report of Independent Auditors**

To the Board of Directors and Shareholders of LG Electronics Inc.

We have audited the accompanying non-consolidated balance sheets of LG Electronics Inc. (the "Company") as of December 31, 2005 and 2004, and the related non-consolidated statements of income, appropriations of retained earnings, and cash flows for the years then ended expressed in Korean won. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of certain subsidiaries, the investments in which are reflected in the accompanying non-consolidated financial statements using the equity method of accounting. The investments in those subsidiaries represent 9.6 % of the Company's total assets as of December 31, 2005, and the equity in their net income represents 18.8 % of the Company's income before income tax for the year then ended. These financial statements were audited by other auditors whose reports have been furnished us, and our opinion, insofar as it relates to the amounts included for the subsidiaries, is based solely on the reports of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the reports of other auditors, the non-consolidated financial statements referred to above present fairly, in all material respects, the financial position of LG Electronics Inc. as of December 31, 2005 and 2004, and the results of its operations, the changes in its retained earnings and its cash flows for the years ended December 31, 2005 and 2004, in conformity with accounting principles generally accepted in the Republic of Korea.

Without qualifying our opinion, we draw your attention to following matters.

As discussed in Note 32 to the accompanying non-consolidated financial statements, on January 1, 2005, the Company absorbed a part of the PC division of LG IBM PC Co., Ltd., a joint venture with IBM Korea Inc. On January 4, 2005, LG IBM PC Co., Ltd. was dissolved.

As discussed in Note 33 to the accompanying non-consolidated financial statements, on November 2, 2005, a joint venture company named, LG-Nortel Co., Ltd., between the Company and Nortel Corporation, was established. This was approved by the Board of Directors on August 16, 2005.

Accounting principles and auditing standards and their application in practice vary among countries. The accompanying non-consolidated financial statements are not intended to present the financial position, results of operations and cash flows in conformity with accounting principles and practices generally accepted in countries and jurisdictions other than the Republic of Korea. In addition, the procedures and practices used in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying non-consolidated financial statements are for use by those who are informed about Korean accounting principles or auditing standards and their application in practice.

Samil Pricewaterhouse Coopers

Seoul, Korea January 21, 2006

This report is effective as of January 21, 2006, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the accompanying non-consolidated financial statements and notes thereto. Accordingly, the readers of the audit report should understand that there is a possibility that the above audit report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

## Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

#### 1. The Company

LG Electronics Inc. (the "Company") was spun-off from LG Electronics Investment Ltd. (formerly LG Electronics Inc.) on April 1, 2002, to engage in the manufacture and sale of electronic, information and communication products. The former LG Electronics Inc. was incorporated in February 1959 under the Commercial Code of the Republic of Korea to manufacture and sell electronic, information and communication products, and had its shares listed on the Korea Stock Exchange in April 1970.

As of December 31, 2005, the Company's main manufacturing facilities are in Kuro, Pyeongtaek, Chongju, Gumi and Changwon in the Republic of Korea.

As of December 31, 2005, the Company has outstanding capital stock amounting to  $\mathbb{W}$  800,226 million, including non-voting preferred stock. The Company's stock was relisted on the Korean Stock Exchange on April 22, 2002, and its depositary receipts ("DRs") were relisted on the London Stock Exchange in September 2002.

As of December 31, 2005, LG Corp. and its related parties own 31.5% of the Company's total stocks including common stock and preferred stock, while financial institutions, foreign investors and others own the rest of the Company's common stock.

#### 2. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its non-consolidated financial statements are summarized below.

#### **Basis of Financial Statement Presentation**

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language in conformity with accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been condensed, restructured and translated into English from the Korean language non-consolidated financial statements. Certain information attached to the Korean language non-consolidated financial statements, but not required for a fair presentation of the Company's financial position, results of operations, or cash flows, is not presented in the accompanying non-consolidated financial statements.

#### **Accounting Estimates**

The preparation of the financial statements requires management to make estimates and assumptions that affect amounts reported therein. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may differ from those estimates.

## Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

#### **Application of the Statements of Korean Financial Accounting Standards**

The Korean Accounting Standards Board has published a series of Statements of Korean Financial Accounting Standards ("SKFAS"), which will gradually replace the existing financial accounting standards established by the Korean Financial Supervisory Commission. As SKFAS Nos. 10, 12 and 13 became applicable to the Company on January 1, 2004, the Company adopted these Standards in its financial statements covering periods beginning on or after this date.

And as SKFAS No. 15 through 17 became applicable to the Company on January 1, 2005, the Company adopted these Standards in its financial statements as of and for the year ended December 31, 2005.

#### **Revenue Recognition**

Revenues from finished products and merchandise are recognized when goods are delivered and most of the risks and benefits associated with the possession of goods are substantially transferred. Revenue from installation service contracts is recognized using the percentage-of-completion method.

#### **Cash and Cash Equivalents**

The Company considers cash on hand, bank deposits and highly liquid marketable securities with original maturities of three months or less to be cash and cash equivalents.

#### **Allowance for Doubtful Accounts**

The Company provides an allowance for doubtful accounts based on the aggregate estimated collectibility of the accounts.

#### **Inventories**

Inventories are stated at the lower of cost or market, with cost being determined using the weighted-average method, except for inventories in-transit which is determined using the specific identification method. If the net realizable value of inventory is less than its cost a contra inventory account, representing the valuation loss, is presented to reduce the inventory to its net realizable value. The valuation loss is recorded as cost of sales. If, however, the circumstances which caused the valuation loss ceased to exist, causing the market value to rise above the carrying amount, the valuation loss is reversed, limited to the original carrying amount before valuation. The reversal is a deduction from cost of sales.

#### **Investment in Securities**

The Company accounts for equity and debt securities under the provisions of SKFAS No. 8, *Investments in Securities*. This statement requires investments in equity and debt securities to be classified into three categories: trading, available-for-sale and held-to-maturity.

Securities are initially carried at cost, including incidental expenses, with cost being determined using the gross average method. Debt securities, which the Company has the intent and ability to hold to maturity, are generally carried at cost, adjusted for the amortization of discounts or premiums. Premiums and discounts on debt securities are amortized over the term of the debt using the effective interest rate method. Trading and available-for-sale securities are carried at fair value, except for non-marketable securities classified as available-for-sale securities whose fair value may not be determined, which are

## Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

carried at cost. Non-marketable debt securities are carried at a value using the present value of future cash flows, discounted at a reasonable interest rate (determined by considering credit ratings by independent credit rating agencies).

Unrealized valuation gains or losses on trading securities are charged to current operations. Unrealized valuation gains or losses on available-for-sale securities are charged to capital adjustments, the accumulated amount of which are charged to current operations when the related securities are sold, or when an impairment loss on the securities is recognized. Impairment losses are recognized in the statement of income when the recoverable amounts are less than the acquisition cost of securities or adjusted cost of debt securities after the amortization of discounts or premiums.

#### **Equity Method Investment Securities**

Investments in equity securities of companies, over which the Company exercises significant control or influence, are recorded using the equity method of accounting. Under the equity method, the Company records changes in its proportionate ownership in the book value of the investee in current operations, as capital adjustments or as adjustments to retained earnings, depending on the nature of the underlying change in book value of the investee.

The Company discontinues the equity method of accounting for investments when the Company's share in the accumulated losses of the investees equals the costs of the investments, and until the subsequent cumulative changes in its proportionate net income of the investees equal its cumulative proportionate net losses not recognized during the periods when the equity method was suspended.

Differences between the initial purchase price and the Company's initial proportionate ownership in the net book value of the investee are amortized over five years using the straight-line method, and the amortization is charged to current operations. In addition, the proportionate share in the difference between the fair value of the investee's identifiable assets and liabilities and book value is amortized according to the investee's accounting for the assets and liabilities.

Unrealized profit included in inventories and property, plant and equipment from transaction between the Company and equity method investees is calculated based on gross margin by product and eliminated to the extent of the percentage of ownership. For consolidated subsidiaries the unrealized profit is fully eliminated. Unrealized profit arising from sales between equity method investees is also eliminated to the extent of the percentage of ownership.

Foreign currency financial statements of equity method investees are translated into Korean won using the exchange rates in effect as of the balance sheet date for assets and liabilities, and annual average exchange rates for income and expenses. Any resulting translation gain or loss is included in the capital adjustments account, a component of shareholders' equity.

## Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

#### **Property, Plant and Equipment**

Property, plant and equipment are recorded at cost, net of accumulated depreciation. Depreciation is computed using the straight-line method over the following estimated useful lives of the assets, as described below.

Estimated useful life

Buildings	20 - 40 years
Structures	20 - 40 years
Machinery and equipment	5 - 10 years
Tools	2 - 5 years
Furniture and fixtures, vehicles	5 years

In 2005, the Company reduced its estimate of the useful life of moulds classified as tools from five years to two years to better reflect their economic useful life. This change resulted in an increase in depreciation expense for the year ended December 31, 2005, by \\ \psi 101,816 \\ \text{million}.

Routine maintenance and repairs are charged to current operations as incurred. Improvements and renewals which enhance the value of the assets over their most recently appraised value are capitalized.

The Company assesses the potential impairment of property, plant and equipment when there is evidence that events or changes in circumstances have made the recovery of an asset's carrying value unlikely. Impairment loss is recognized when the carrying value of an asset exceeds the value of its future economic benefits. The carrying value of an impaired asset is reduced to its estimated realizable value, and an impairment loss is recorded as a reduction in the carrying value of the related asset and charged to current operations. If, subsequently, the value of the asset exceeds the impaired carrying value, this recovery would be recorded in current operations up to the cost of the asset (net of accumulated depreciation before impairment).

#### **Lease Transactions**

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a term longer than 75% of the estimated economic life of the leased property, or have a present value of the minimum lease payments at the beginning of the lease term amounting to more than 90% of the fair value of the leased property, are accounted for as capital leases. Leases that do not meet these criteria are accounted for as operating leases, of which the total minimum lease payments are charged to expense over the lease period on a straight-line basis.

#### **Intangible Assets**

Intangible assets are stated at acquisition cost, net of accumulated amortization. Acquisition cost is the total of the production or purchase cost and other incidental expenses. Amortization is computed using the straight-line method over the estimated useful lives, which range from five to ten years.

# Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

The Company assesses the potential impairment of intangible assets when there is evidence that events or changes in circumstances have made the recovery of an asset's carrying value to be unlikely. An impairment loss is recorded as a reduction in the carrying value of the related asset and charged to current operations. If, subsequently, the value of the asset exceeds the impaired carrying value, this recovery would be recorded in current operations up to the cost of the asset (net of accumulated depreciation before impairment).

#### **Research and Development Costs**

Research costs are expensed as incurred. Development costs directly relating to a new technology or new products, for which the estimated future benefits are probable, are recognized as intangible assets. Amortization of development costs is computed using the straight-line method over five years from the commencement of the commercial production of the related products. Such costs are subject to a continual analysis of recoverability. In the event that such amounts are not estimated to be recoverable, they are written down to their net realizable value.

#### **Borrowing Costs**

Interest and other financial costs incurred on borrowings used to acquire property, plant and equipment, intangible assets and investments are all charged to expense as incurred.

#### **Discounts (premiums) on Debentures**

Discounts (premiums) on debentures are amortized using the effective interest rate method over the repayment period of the debentures. The amortized amount is included in interest expense.

#### **Treasury Stock**

Treasury stock are stated at cost and recorded as a capital adjustment in shareholders' equity. Gains on disposal of treasury stock are recorded as a capital surplus. Any loss on disposal of treasury stock is offset against any prior gains included in capital surplus. The remaining loss is offset against retained earnings.

#### **Product Warranty**

The Company provides warranties against product defects for a specified period of time after the sale. Estimated costs of product warranties are charged to current operations at the time of sale and are included in the accompanying non-consolidated balance sheets as a product warranty reserve.

#### **Accrued Severance Benefits**

Employees and directors with at least one year of service are entitled to receive a lump-sum severance payment upon termination of their employment with the Company, based on their length of service and rate of pay at the time of termination. Accrued severance benefits represent the amount which would be payable assuming all eligible employees and directors were to terminate their employment as of the balance sheet date.

Contributions made under the National Pension Plan and severance insurance deposits are deducted from accrued severance benefits. Contributed amounts are refunded from the National Pension Plan and the insurance companies to employees upon their retirement.

## Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

#### **Income Taxes**

The Company recognizes deferred income taxes for anticipated future tax consequences resulting from temporary differences between amounts reported for financial reporting and income tax purposes. Deferred income tax assets and liabilities are computed on such temporary differences by applying enacted statutory tax rates applicable to the years when such differences are expected to be reversed. Deferred income tax assets are recognized to the extent that it is almost certain that such deferred income tax assets will be realized. The total income tax provision includes current tax expenses under applicable tax regulations and the change in the balance of deferred income tax assets and liabilities.

Tax credits for investments and development of research and manpower are accounted for using the flow-through method, whereby income taxes are reduced in the period the assets that gave rise to such credits are placed in service. To the extent such credits are not currently utilized, deferred income tax assets, subject to realizability as stated above, are recognized for the carryforward amount.

According to SKFAS No. 16, *Deferred Income Tax*, which became effective on January 1, 2005, the Company classified deferred income tax assets and liabilities as current and non-current portions based on net amounts. Deferred income tax is recognized on unrealized gains or losses resulting from valuation of investment securities. However, previous financial statements presented for comparative purpose are not restated according to the addendum of SKFAS No. 16.

#### Sale of Accounts and Notes Receivable

The Company sells certain accounts or notes receivable to financial institutions at a discount, and accounts for the transactions as a sale of the receivables, if the rights and obligations relating to the receivables are substantially transferred to the buyers. The losses from the sale of the receivables are charged to current operations as incurred.

#### **Foreign Currency Translation**

Monetary assets and liabilities denominated in foreign currencies are translated into Korean won at the exchange rates in effect at the balance sheet date  $\mbox{$\mathbb{W}$}1,013.0:\mbox{$\mathbb{U}$}\mbox{$\mathbb{S}$}1$  as of December 31, 2005 ( $\mbox{$\mathbb{W}$}1,043.8:\mbox{$\mathbb{U}$}\mbox{$\mathbb{S}$}1$  as of December 31, 2004), and resulting translation gains or losses are recognized in current operations. However, convertible bonds in foreign currency are translated into Korean won at the agreed rate of exchange per the conversion rights.

#### **Derivative Financial Instruments**

The Company utilizes several types of derivative financial instruments ("derivatives") such as forward exchanges, swaps and option contracts to reduce its exposure to fluctuations in foreign currency and interest rates. The derivatives are carried at fair market value. Unrealized gains or losses on derivatives for trading or fair value hedging purposes are recorded in current operations. Unrealized gains or losses on derivatives for cash flow hedging purposes are recorded in current operations for the portion of the hedge that is not effective. For the portions of cash flow hedges which are effective, unrealized gains or losses are accounted for in the capital adjustments account and recorded in current operations in the period when the underlying transactions have an effect on operations.

# Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

#### **Convertible Bonds**

The Company recorded the equity component of the convertible bonds (conversion rights) by deducting the fair value of the liability component from the issue proceeds. The liability component is shown gross with the full face amount recorded as liability and a contra adjustment account (conversion rights adjustment) as a deduction from the liability to arrive at a net amount equal to its fair value. The Company is obligated to pay guaranteed interest if and when the convertible bond matures without exercise and has accrued this interest as an adjustment to the carrying value of the liability component.

#### **Present Value Discount**

The difference between the nominal value and present value of long-term receivables and payables is amortized using the effective interest rate method with interest income or expense adjusted accordingly.

#### **Government grants**

Government grants, which are to be repaid, are recognized as liabilities. Government grants, which are not required to be repaid and are intended to be used for the acquisition of assets, are deducted against the cost of specified assets after their acquisition. Cash received in relation to grants given prior to the acquisition of assets is included in the cash balance but with an equal and opposite contra adjustment.

The government grants, contributed to compensate for specific expenses, are offset against the related expenses. Other government grants, for which the use or purpose is not specified, are recorded as gains from assets contributed, and are recognized in current operations.

#### **Stock Appreciation plan**

Compensation costs for stock options granted to employees and executives are recognized on the basis of intrinsic value. Under the intrinsic value basis method, compensation costs for stock option plans are determined by calculating the difference between the exercise price and the market price of the underlying stock. Stock-based compensation cost is remeasured at each reporting date, based on the intrinsic value of the award, and is recognized as an expense over the agreed minimum service period.

#### **Duty Refunds**

The Company records duty refunds as a deduction from cost of sales.

# Notes to Non-Consolidated Financial Statements December 31, 2005 and 2004

#### 3. Long-term financial instruments

As of December 31, 2005, long-term financial instruments amounting to \$18,945 million (2004: \$17,961 million) are deposited in connection with maintaining checking accounts or research and development projects funded by the government. The withdrawal of these financial instruments is restricted.

shareholders' equity	(6,909)	-
Tax credit carried forward	189,670	87,899
Deferred income tax assets, net	₩ 58,930	₩ 104,765

As of December 31, 2004, deferred income tax assets were computed by applying the tax rate of 27.5% for the temporary differences expected to be realized in fiscal years beginning January 1, 2005 and thereafter, except for 27.5% for certain temporary differences expected to be filed as revision of the prior years' tax return.

The Company periodically assesses its ability to recover deferred income tax assets. In the event of a significant uncertainty regarding the Company's ultimate ability to realize such assets, the assets are reduced to its estimated net realizable value. As of December 31, 2005, deferred income tax assets resulting from equity method investment securities are not recorded because the Company's ability to realize those deferred income tax assets is uncertain.

As of December 31, 2005, the current portion of deferred income tax assets and liabilities amount to \$W163,354\$ million and \$W1,530\$ million, respectively, and the non-current portion of deferred income tax assets and liabilities amount to \$W397,473\$ million and \$W500,367\$ million, respectively.

As a result of tax adjustments, the effective tax rate of the Company for the year ended December 31, 2005, is approximately 5.2% (2004: 16.9%).

#### 23. Earnings Per Share

Basic earnings per share is computed by dividing net income allocated to common stock by the weighted-average number of common shares outstanding during the year. Basic ordinary income per share is computed by dividing ordinary income allocated to common stock, which is net income allocated to common stock as adjusted by extraordinary gains or losses, net of related income taxes, by the weighted-average number of common shares outstanding during the year.

Basic earnings per share for the years ended December 31, 2005 and 2004, are calculated as follows:

(in millions of Korean won, except per share amounts)	2005	2004		
Net income as reported on				
the statement of income	₩ 702,801	₩ 1,545,954

Basic earnings per share and ordinary				
income per share (in won)	₩ 4,407	₩ 9,890		

Basic ordinary income per share is identical to the basic earnings per share since there was no extraordinary gain or loss.

Diluted earnings per share is computed by dividing diluted net income, which is adjusted by adding back the after-tax amount of interest expense on any convertible debt and dividends on any convertible preferred stock, by the weighted-average number of common shares and diluted securities outstanding during the year. Diluted ordinary income per share is computed by dividing diluted ordinary income allocated to common stock, which is diluted net income allocated to common stock as adjusted by extraordinary gains or losses, net of related income taxes, by the weighted-average number of common shares and diluted securities outstanding during the year.

#### Report on the Review of Internal Accounting Control System

To the President of

LG Electronics Inc.

We have reviewed the management's report on the operations of the internal accounting control system ("IACS") of LG Electronics Inc. (the "Company") as of December 31, 2005. In accordance with Article 2-2 of the Act on External Audit for Stock Companies (the "External Audit Law") of the Republic of Korea, the Company's management is responsible for reporting on the design and operations of its IACS ("IACS report"). Our responsibility is to review the management's IACS report and issue a report based on our review.

We conducted our review in accordance with Article 2-3 of the External Audit Law. Our review included inquiries of management and employees, inspection of related documents and checking of the operations of the Company's IACS. We did not perform an audit of the Company's IACS and accordingly, we do not express an audit opinion.

Based on our review, no material weakness in the design or operations of the Company's IACS under Article 2-2 of the External Audit Law as of December 31, 2005, has come to our attention.

This report applies to the Company's IACS in existence as of December 31, 2005. We did not review the Company's IACS after December 31, 2005. This report has been prepared for Korean regulatory purposes pursuant to the External Audit Law, and may not be appropriate for other purposes or for other users.

As this report is based on Interim Guidelines on Auditors' Review and Report on Management's IACS Report issued by the Korean Audit Standards Committee on March 29, 2005, they apply only from that date until the date the Final Standards for Management's IACS Report, and the Final Standards for Auditors' Review and Report on Management's IACS Report become effective. A review based on the final standards may have different results and accordingly, the content of any updated report may be different.
