

### Welcome Screen

Having a warm greeting message with Hotel name and its logo on the TV when customers enter their rooms will let them feel more welcomed and cared for. A little thing can make a big difference.

### One Channel Map

One Channel Map feature allows users to edit and list the channels of their choice from any of the multiple broadcasting signals.

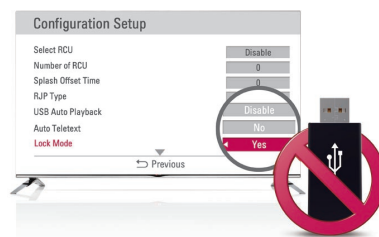

### USB Auto Playback

LG Commercial TVs recognize playable contents in external storages and play them automatically.

### Lock Mode

The Lock Mode blocks external input signals for illegal communication, a useful feature for preventing misuse of TVs in facilities such as prisons, mental hospitals and other applicable public spaces.
