**ENERGY
GUIDE**

The estimated annual energy cost determined in accordance with 16 CFR Part 305.5 for models 55LD520C is \$24, respectively.

"Your energy cost depends on your utility rates and use. The estimated cost is based on 11 cents per kWh and 5 hours of use per day. For more information, visit www.ftc.gov/energy."¹

¹FTC Television labeling rule (18 CFR Part 305, as added by 76 Fed. Reg. 1038 (Jan 6, 2011)).

LG
Life's Good

LIFE'S GOOD...

WHEN IT'S GREEN.

LG is committed to improving product development, manufacturing and usage to meet the demand for environmentally friendlier products. Our 55LD520C television has technologies to reduce power consumption and in return increase **cost savings** per room. We've also placed limits in the amounts of harmful materials used in these televisions.

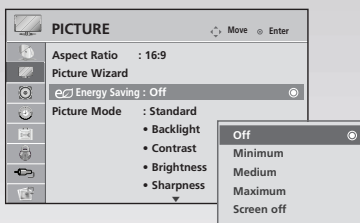

EcoSmart

- **Intelligent Sensor** - Continually monitors room light conditions to automatically optimize the picture quality for a more enjoyable viewing experience, which can help save energy.
- **Dynamic Power Savings** - Using built-in algorithms, TV will automatically reduce the power consumption based on incoming video, while maximizing picture performance.
- **Static Power Savings** - Picture brightness level can be set at the preferred power consumption level to reduce power and increase energy savings.
- **RoHS Compliant** - Meets directive on restriction of hazardous substances.

FEATURES

ENERGY SAVING LEVELS

Manually select your choice for the brightness level for the television. By selecting Minimum, Medium, or Maximum, the power consumption will be reduced and an increase in energy savings can be achieved. (Note: Selecting minimum level may slightly increase power consumption on some models)

TruMotion 120Hz

TruMotion 120Hz technology lets you see sports, video games and high-speed action with virtually no motion blur. Now your TV can keep up with your fast-moving entertainment.

LOW

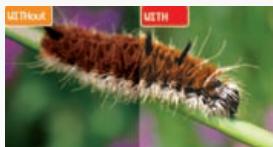

HIGH

Dramatization

Six distinct processes contribute to picture improvement. LG's XD Engine® takes the low resolution of analog signals to near HD levels by improving brightness, contrast, detail and enhancing color as well as reducing signal noise.

Dramatization

Dramatization

VIEWING QUALITY AS THE DIRECTOR INTENDED

24p playback matches the original frame rate of film based content, making your viewing experience one step closer to "Real Cinema".

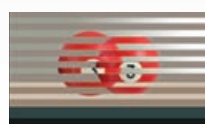

Original Film

Original film has a frame rate of 24 frames per second. To be viewed on standard video equipment such as TVs it must be have a pull down solution.

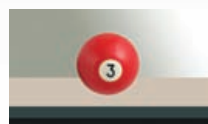

NTSC Pulldown Solution

NTSC corrects the frame rate difference by repeating every 4th frame. Sound must be separated from the film to avoid any distortion.

Real Cinema

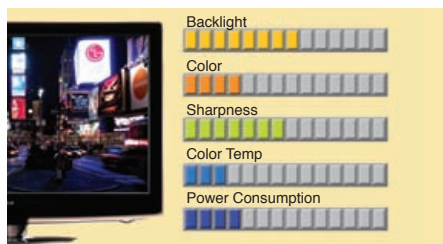

Real Cinema uses a 2:3 pull down which takes every other frame and splits it into three fields of video for a smoother transition from film to video.

Dramatization

Automatically examines the room environment and optimizes the picture to the light and color conditions in the room for a more enjoyable viewing experience—that can also save energy and money.

Easily connect your external USB drive to enjoy JPEG photos while listening to MP3 files at the same time for a picture slide show. Allows you to enjoy all of those family photos for a truly memorable viewing experience.

PUBLIC DISPLAY SETTINGS

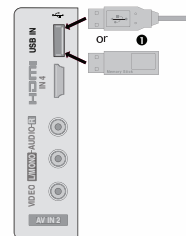

When used in public areas, these HDTVs can be easily programmed by the installer to have the TV turn on at a specified channel/volume level, set the minimum/ maximum volume, lock out the control panel/remote, set the aspect ratio, and return to a factory reset. By using Power Management, these displays can be programmed to turn off if there has been no activity (remote or control panel buttons) for a preset time (1-7) hours.

Public Display Setting

Public Display Mode	No
Start Channel	No
Ch. Type	TV
Major	2
Minor	0
Minimum Volume	0
Maximum Volume	100
