

Auto-Sensing Remote Jack Pack (RJP) Full-Featured

NEW! SINGLE CABLE RJP*

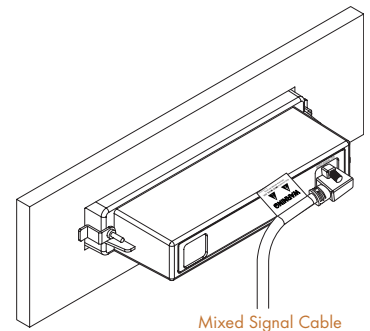

When used with compatible LG displays, the RJP-401B provides a multi-media interface to the in-room TV display panel for hotel guests. There is a wide range of A/V inputs for external portable devices such as DVD/CD players, laptop PCs, video game players, MP3 players, camcorders, etc. Your guests will find this full-featured jack pack easy to use. Just plug in an audio or video source, sit back, and enjoy! The audio preference is your choice, regardless of what is showing on the TV screen.

GUEST ROOM FEATURES

The auto sensing remote jack pack (RJP) will conveniently install right in the room where the guests stay. This jack pack will allow guests to connect audio, video, and computer devices to hear and view on the in-room TV display panel. The RJP can be set up to interface with the TV display panel to show the image and/or sound from a portable DVD/CD Player, Camcorder, MP3 Player, Notebook computer, or portable Video Game Player. If the guest does not connect any devices, then the in-room TV display panel will remain on the source selected. When the guest connects a device, the interface switches the TV display panel to show the new source.

The RJP is designed to be able to process audio from one source, and video separately from a different source, if required. (The guest can work on a laptop computer while listening to music from an MP3 player). POP (Picture outside of Picture) feature can be utilized (on TVs that come equipped with this feature) by simply selecting channel up or down once the video source is connected. The picture from the connected device will show up in the larger picture on the left side of the screen, and the TV channel will show up in the smaller picture on the right side of the screen.

REMOTE JACK PACK

Unit Dimensions (W×H×D)	8.35" x 2.17" x 3.39"
Recommended hole cutout	7.87" (7 14/16") W x 1.61" (1 10/16") H
