## Tips & Tricks

### How to sync contacts from Microsoft Outlook using Bitpim

1. With the Chocolate detected in Bitpim, follow the subsequent steps:  
File → Import → Outlook Contacts
2. When the Microsoft Office Outlook alert box pops up, allow access to your stored e-mail addresses in Outlook by clicking the **Allow access for...** check box and then click **Yes**.
3. When the **Import Outlook Contacts** box appears with a listing of the stored contacts in Outlook, click **Merge** at the bottom of the page.

### How to change the wheel speed

1. Press Ok to enter the Main Menu.
2. Select Settings and Tools by spinning the Navigation Wheel counterclockwise and then press OK.
3. Spin the Navigation Wheel counterclockwise to select Navigation Wheel and then press OK.
4. Press OK to select Speed.  
Select High by spinning the Navigation Wheel clockwise and then press OK.

### How to sync calendar from Microsoft Outlook using Bitpim

1. Connect a **USB cable** from your charge port to your computer.
  2. Open **Bitpim**.  
**Note:** Bitpim should automatically alert you that it has detected your Chocolate. If not, press the Find Phone icon on the tool bar to search for your phone. (USB Drivers are required)
  3. Once your phone has been detected, follow these steps:  
File > Import > Auto Calendar Import > Settings
  4. With the Auto Calendar Import Settings box open, select **Outlook** as the **Calendar Type**.  
**Note:** By selecting Calendar Settings > Filter, you can set the alarm settings for imported events and click **OK**
  5. Click **OK** again in the Configure Outlook Calendar AutoSync Settings box.
  6. To perform the sync, click **OK** in the Auto Calendar Import Settings box.
- (File > Import > Auto Calendar Import > Settings > Calendar Type > Outlook > Calendar Settings... > Filter > select custom filters > OK > OK > OK > OK >)

## How to export contacts from your phone to Outlook using Bitpim

### In Bitpim

File → Export → CSV Contacts → All(# of contacts) → OK

### In Outlook

File → Import and Export → Import from another program or file → Next → Comma Separated Values (Windows)\* → Next → browse → select bitpim.csv file → Next → Highlight “contacts” and click Next → Check the “import bitpim.csv into folder: contacts” box.

Bitpim.csv	Outlook field
Names_full	Name
Names_first	First Name
Names_last	Last Name
Numbers_number	Mobile Phone
Emails_email	Email Address

When you do this a window will pop up which allows you to map custom fields. This is the tricky part. On the Left you have the Bitpim file and on the right you have the Outlook file. To align everything properly, you need to drag the correct value from the bitpim.csv file and drop it into the correct field in Outlook. Here are some helpful hints but it all depends on what data you have in your phone.

When you are done mapping your contacts into the correct fields, click OK to go back to the main window where you click finish to complete the import.

\*Note: If the CSV (window) format doesn't work completely, follow the same process with the CSV (DOS) format and it should work fine.

## Tips & Tricks

### How to create a playlist

1. With the slide open and the touch keypad unlocked, press the OK key to enter the main menu.
2. With My Music already highlighted, press OK again.
3. Press the number 2 on the keypad so select Playlists.
4. Tap the Left Soft Key under Create.
5. Use the alphanumeric keypad to type the name of your new playlist, then press OK.
6. Tap the Right Soft Key under Options.
7. Press the number 4 to select Add Songs to Playlist.
8. Press OK to select the highlighted song.
9. Scroll down and press OK once more.
10. When you are finished, tap the Left Soft Key under Done.

### How to create ringtones from mp3 files using Bitpim

1. Use any mp3 conversion software to convert your songs to mp3 format.
2. In **Bitpim**, open the **Ringers** page and click the **Add New Ringer** icon on the tool bar.
3. When the Choose Files box appears, select the file where you have your mp3's stored.

Note: If the song you are selecting still has the folder icon and not the musical note icon next to it, it still needs to be converted to MP3 format.

4. With the **Convert Audio File** box shown up in Bitpim, change the **Sample Rate** to **32000**, the **Channels** to Stereo (**2**), and the **Bit Rate** to **64**. Then press **Convert**.
5. When you can, press **Play Clip** to hear the song.
6. Select a **25 – 30 second clip** using the **pink and red markers**.
7. Preview the ringtone by clicking **Play Clip** and readjust the markers if needed.
8. Click **OK** to create the ringtone.

Note: Bitpim will automatically add the ringtone to your Ringers page.

9. To send the new ringtone to your phone, click **Send Phone Data**, click ringtones, and click OK.

## How to convert videos (using Xilisoft) and transfer them to your phone for viewing

### Conversion Process

1. Start by connecting your **microSD** card to the computer using whatever adaptor you have available.
2. Click on any video file and drag it into the **Xilisoft 3GP Video Converter** screen.
3. Select your **video settings**, making sure the codec corresponds with the codec used by your phone.  
**Note:** Bigger Video Sizes and higher bitrates will affect the quality of video and amount of memory your phone will need to play it. These settings are up to you to customize if wanted but a good video size for a phone is 320x240 with a bitrate of 120.
4. Customize the **audio settings**.  
**Note:** The audio codec needs to be changed to mpeg4aac. If desired, you can raise the bitrate to 48 and the sample rate to 1600.
5. In the **destination** box, select the **My Flix** folder on the **microSD** card.
6. Click **Encode** near the top of the box
7. Once encoding is done, open **Xilisoft 3GP Video Converter Wizard** and click **Next**.
8. Click **Load** to highlight and select the encoded video and click **Next** again.
9. Click **default** to set the beginning and end as the start and end points and click **Next** twice.
10. Click on the brows icon and select the **My Flix** folder inside the **microSD** card and click **Next**
11. Click **Encode** followed by **Close**.
12. Finally, agree to **quit** to finish.

### Transferring to Phone

1. Once the video is stored on the microSD card, **safely remove the hardware** (adapter) to which it is connected.
2. Take the card out of the adapter and place it into the microSD card reader on your phone.
3. To view the video, press **left navigation key** to enter the **Picture and Video** menu.
4. Highlight **My videos** and press **OK**.
5. Select the **film icon** with the microSD card symbol and press **OK** to View.
