Power/End Key

## Activating the Speakerphone

Share your calls with friends and family or just keep a conversation going while your hands are busy holding the baby, typing on the computer keyboard, or doing dozens of other everyday tasks.

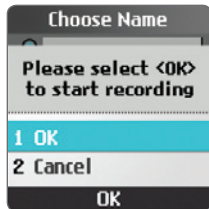

1. You must be in a call to activate the speakerphone feature. Press **left** on the **Navigation Key** to turn the speakerphone on and off. The status will be noted by the icons and text on screen.

## Recording a Voice Dial

Keep your attention on your task and your outbound calls hands-free with voice dialing. Set up your contacts, then train the UX145 to understand your handy voice prompts.

1. From standby mode, press the **Left Soft Key** for **Menu**, select **Voice Service (7)**.
2. Select **Voice Dialing (2)**.
3. Press the **Left Soft Key** for **New**.
4. Select a contact and press **OK**.
5. Press **OK** again to record. When prompted, say the voice dial name, then repeat the name again.

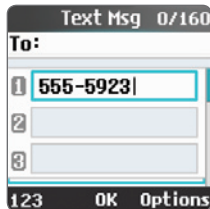

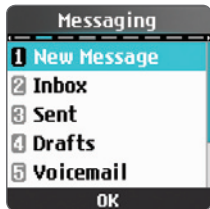

**Note:** Press **up** on the **Navigation Key** to activate voice dial.

## Sending a Text Message

Use text messaging when you need to communicate quietly and quickly. Make your message come alive by adding graphics or sound. Then send it to other mobile phones or e-mail addresses.

1. From standby mode, press **down** on the **Navigation Key**.
2. Select **New Message (1)**.
3. Enter a phone number or e-mail address, or press the **Right Soft Key** to choose someone from your contact or recent call lists, and press **OK**.
4. Enter your text message.
5. Press **OK** to send.
