LG Adrenaline Software Release Note

- High-Level Description/Overview
  - A maintenance release is now available for the AT&T USBConnect Adrenaline. This maintenance release supports LTE and Customers can download the maintenance release via the AT&T Communication Manager or from the LG web site.

- What/Detail
  - Customers can access the maintenance release in one the following ways beginning August 27, 2011:
  - From LG support website at http://www.lg.com/us/computer-products/usb-aircards/LG-AD600.jsp.
  - From AT&T Communication Manager Software Update Option.

Software Update Guide

1. Connect your Adrenaline to your PC

2. Install AT&T Connection Manager (Skip this step if ACM is already installed)

3. Check ACM for software updates, if this software update is listed, follow the onscreen prompts to complete installation.

4. If the software updated is not available in ACM, close ACM.

5. Check Device Manager if Adrenaline is recognized as "LGE Wireless NDIS USB Modem"

6. Click New Software on website and Save the file on your PC

7. Run V20I_00.exe for Software Update
