# BETTER THAN HAVING IT ALL, YOU CAN HAVE IT ALL AT ONCE

I won't say I'm busy, because to say I'm busy implies that sometimes I'm not.

My day goes at a breakneck pace all the time and always has. Making the most of my time is essential. That's why the G-Slate by LG is my constant companion; it lets me seamlessly interact with my life at home and on the go.

As any multitasker will agree, life doesn't move in an orderly fashion; it's filled with unexpected surprises. So, when I have 10 minutes of uninterrupted silence, I can catch up on my reading and then quickly get back to the business at hand. The large screen not only handles multiple open apps but also allows me to videoconference, watch HD movies, play games, and more. Plus the innovative stereoscopic 3D video camera captures real-life moments—I have hilarious kids, after all. And, of course I always have to be connected on the grid. How fast? Now fast. That's not too much to ask, is it?

## User Experience

Android™ 3.0 tablet-optimized platform and Google™ media services deliver a groundbreaking multimedia experience.

## Connectivity & Processing Speed

The NVIDIA® Tegra™ 2 1GHz Dual-Core Processor combined with T-Mobile's 4G network creates fast, seamless multitasking computing.

## Advanced Imaging

G-Slate has a front-facing camera for video conferencing, a 5.0 MP rear-facing stereoscopic camera with flash for image capture and 3D and HD video recording to bring memories to life.

## Media Viewing

8.9" HD wide-screen, 3D-capable multi-touch display, and playback with HDMI® satisfy gamers, multimedia users, and movie buffs.

## World-Class Browsing

Experience browsing more like a desktop, less like a phone; multi-tasking with multiple open tabs, bookmark syncing from other devices, privacy settings, and more.
