First Motorized Compression Vacuum
Dust Compression System
(with Wiper Blade)
- DualForce™ Suction
- Longest Retractable Cord (30 Ft.)
- LG's Upright Vertical Cyclone System
- HEPA Filter
- Pet Hair Turbine Tool

VACUUM WITH INNOVATION

Discover a vacuum that doesn't just make your house cleaner, but makes your life easier at the same time. The revolutionary Kompressor® system eliminates the need for messy vacuum bags and uses innovative compression technology to hold three times the amount of dirt, dust and pet hair as a non-compressor model. Along with DualForce™ suction that captures dirt and dust over a wide area, and a super-long, retractable cord, this was a vacuum made with you in mind.

KOMPRESSOR® System

Goodbye messy vacuum bags. The KOMPRESSOR® system uses a unique wiper blade within the bagless bin to keep it clean while compressing dust intake. That allows you to store up to 3 times more dirt, dust and pet hair vs. non-compressor models, and means there's an easy-to-dispose-of cake of dust when you empty it.

DualForce™ Suction

DualForce™ suction uses two additional air pathways to pick up dirt from both sides, in addition to the traditional center section. This allows you to capture dirt and dust over a wide surface area, and is ideal for picking up dust in hard-to-reach edges.

Longest Retractable Cord (30 Ft.)

You won't have to go through the bother of plugging and unplugging the vacuum when you have the longest retractable cord around. At 30 feet, that means you have room to spare, as well as time saved.
