

T-Mobile  
**G2x**  
with Google

# HOW IT LOOKS IS ONLY RIVALED BY WHAT IT DOES

The best technology never makes you think about it. It's just always brilliant. When I'm on the go (and I'm always on the go), I want all my forms of entertainment just as accessible as when I'm at home. Movies, TV shows, music from my playlist, games. My T-Mobile® G2x™ with Google™ by LG, with its Dual-Core Processor, gives me everything I want, including blur-speed browsing and incredible multi-tasking capabilities. No excuses. No thinking. Just pure enjoyment.

Of course, I can't take my loved ones everywhere I go. So I send everywhere I go to my loved ones. With my G2x, I'm a sharing machine. It has an 8 MP camera, HD video recording, and 1080p playback via an HDMI connection that makes sharing on the big screen a snap. If I see it, and I like it, I share it. A smartphone? *Superphone* is more like it.

**Accelerated Multitasking** - G2x delivers up to 100% better performance than a Single-Core Processor when running multiple apps concurrently with background data syncs, web browsing, file downloading, and audio streaming.

**Wicked Fast Web Browsing** - With Adobe® Flash® 10.1 support, separate CPU processing, and T-Mobile's blazing fast 4G network, the G2x powers an undeniably fast and rich media and web browsing experience.

**Extreme Gaming** - The NVIDIA® Tegra™ 2 1 GHz Dual-Core Processor accelerates gaming and delivers a smooth experience with fast frame rates, console-quality graphics, and a high level of interactivity keeps the fun coming!

**Advanced Imaging** - With a 1.3 MP front-facing camera for video chat or self-portraits, an 8.0 MP rear-facing camera for high-quality image capture and 1080p HD video recording, G2x captures life's special moments and creates *good-as-being-there* memories.

**Sophisticated Sound** - The first DTS® Ultra Mobile™ capable phone brings an unmatched HD sound experience that adds depth and dimensionality without distortion. It truly sets the bar for sound quality and music immersion on a smartphone.

 **LG**  
Life's Good
