

LG SUPERMULTI BLADE

Sleek looking,
Swifter loading,
Simplest running

Simplified Slot Loading

Slide Load in Style

The sleek looking slot drive loads discs with a simple glide that's fast and smooth compared to drives with a disc tray. By removing the complexities of the disc tray we've simplified the drive to operate in tight spaces and run silently without needing to open or close. Give your ultrabook a companion that looks slick and works quick.

Solutions to Suit All Your OS Needs

Connect with superior freedom as all your OS compatibility needs are met in one place. You'll find seamless support for both Mac® and PC. You can easily burn and play discs no matter what system you choose to use.

How to Eject the Disc from the Drive

- When using with a Mac
 - Click the eject button located on the Mac OS menu or toolbar.
- When using with Windows
 - Press the eject button in the front of the product.

Bring Disc Playback to the Big Screen

Connecting all your must-have multimedia to your TV and other digital devices has never been easier. It's now as simple as plug and play with USB 2.0 ready devices for a more convenient viewing experience.

How to Use TV Connectivity

- 1 Without the disc, press and hold the 'Eject' button for 2 seconds.
- 2 Insert your supported media into the drive.
- 3 Select and play the files from your A/V device to enjoy videos, pictures and music.

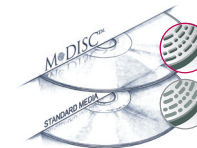

※ This function may not work properly due to incompatibility issues with some AV devices or media. This drive does not play DVD movie titles.

Time Tested Data Protection Longevity

Rest assured knowing that once you etch your invaluable data onto M-DISC it will be safe and secure for a lifetime. Where standard quality can decrease over time, M-Disc™ is sure to stand up to any test you throw at it for years and years.

The M-DISC™ Difference

M-DISC™ is constructed of inorganic, synthetic materials which cannot be overwritten, erased or corrupted by natural processes. Please visit www.m-disc.com for more details.
