Network Indicators

Your 4G LTE wireless device will indicate which of the AT&T wireless networks you are connected to. A network indicator does not necessarily mean that you will experience any particular upload or download data speeds.

-  **4G LTE:** Connected to the AT&T 4G LTE network.
-  **4G:** Connected to the AT&T HSPA+ network. The AT&T HSPA+ network is capable of delivering 4G speeds when combined with enhanced backhaul. 4G availability is increasing with ongoing backhaul deployment.

 **E:** Connected to the AT&T EDGE/2G network. Actual data upload and download speeds depend on various factors, including the device, network utilization, file characteristics, terrain, etc. Learn more at: wireless.att.com/learn/articles-resources/wireless-terms.jsp, your AT&T Wireless Customer Agreement, Section 3.2 "Where and How Does AT&T Service Work?" The AT&T HSPA+ network can deliver 4G speeds when combined with enhanced backhaul. Your wireless device can't distinguish between HSPA+ cell sites with enhanced backhaul and those without. Enhanced backhaul not available everywhere. Learn more at att.com/network.
