

LG optimus™ Q

TECH FOR NON- TECHIES

I wasn't sure about buying a smartphone for a while, because I didn't want to pay a lot of money for something with a lot of crazy features that I didn't want to learn about or wouldn't use. But finally I found one that was right for me: LG Optimus Q. It has the power and capabilities to do everything I want—text, email, update my status, get directions, and take pictures without investing a lot of time to figure it out. The setup was so simple, I was up and running the same day.

Lots of smartphones don't have real keyboards any more, but fortunately LG Optimus Q does! Having a REAL keyboard combined with the easy-to-use UI made me comfortable navigating through the phone right away. Even better, it has multiple home-screens to organize the apps I need most, plus quick entertainment access so when I have a few minutes to spare I can watch video or listen to music...they're all right there! Oh, and of course with GPS real-time traffic and spoken turn-by-turn directions—no more getting lost! Finally, what I've found is a phone that made my life easier right away.

Outside the Box

While some devices have a steep learning curve, and others require an intense time investment, the Android™ 2.3 Platform makes the LG Optimus Q a dream to use, even right out of the box.

Smarter is Better

When driving, cooking, or otherwise occupied, users easily stay in touch or operate key functions by simple voice commands or Bluetooth® Connectivity.

Snap Away

The 3.2 MP camera takes pictures of life's most important moments, and then I can share those images with picture messaging or by posting them on social networks.

Type Easy

Full QWERTY keyboard means physical keys right where they need to be — under your thumbs, and even better, there's no hassle trying to use onscreen keyboard.

KEY FEATURES

Slide-Out QWERTY Keyboard

Large 3.2" Capacitive Touch Screen

Android™ 2.3 (Gingerbread)

3.2 MP Autofocus Camera and Camcorder

Video Recording and Playback

Long Battery Life (1,500 mAh)
