Your child's GizmoPal band needs to be turned on and have a wireless network signal. There may be situations when the GizmoPal fails to accurately identify its approximate location, or the smartphone application erroneously displays the device's approximate location. The map data utilized by the GizmoPal to identify and communicate location information is provided by Google, whose services are subject to change and may not be available in all geographic areas. LG makes no representations or warranties about the availability or accuracy of the GPS or about the accuracy or completeness of any map data or other information.
