

LG optimus G™

LIVE WITHOUT BOUNDARIES

Blast away the barriers between business and entertainment with cross-tasking like you've never seen it before. Immerse yourself in borderless beauty with edge-to-edge display appearance. Free yourself to live in the moment – and capture memories in a powerful new way. Test the limits of speed with the lightning-fast 4G LTE network. And experience quad-core power that pushes the boundaries beyond what you ever thought possible. When it comes to innovation, there are no rules. Unlimit yourself. Experience Optimus G.

LG optimus G™

LIVE WITHOUT BOUNDARIES

The Power of 4-in-1.

Quadruple Your Personal Power

Harness heightened efficiency while lowering overall power consumption with the Snapdragon™ S4 Pro 1.5 GHz Quad-Core Processor. With four central processing units, it doesn't just work harder—it works smarter.

Speed Without Limits

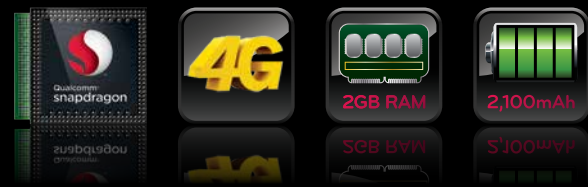

Your life happens fast. And with Sprint's super-fast 4G LTE network, whether you're talking, browsing, gaming, or doing several things at once, Optimus G gives you a seamless user experience that's far ahead of the rest.

Performance Without Pause

The impressive 2GB of RAM allows smooth performance for the most demanding apps. Play visually intensive games, conduct video conferencing without buffering, and switch from app to app without pause.

Everlasting Endurance

Talk, work, and play all day with the power of a high-density, 2,100mAh battery, engineered to seamlessly fit into the Optimus G's slim unibody design. Perfect for power users, it continues to perform like new even after hundreds of charges.

Flawless Clarity.

Watch your favorite movies and videos and play games in impressive detail with the Optimus G's stunning 4.7" True HD IPS Plus Display. You'll get clear, distortion-free content with natural, accurate color, sharp images via super-high pixel density (768 x 1280p), and a stripe RGB IPS Panel with a 15:9 aspect ratio.

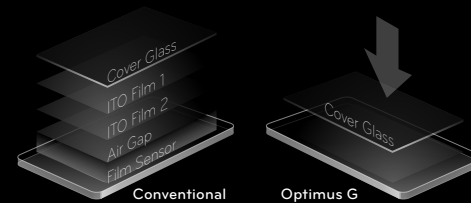

True HD IPS+

Durability Without Compromise.

Be strong and sensitive. Corning® Gorilla® Glass 2 is 15% stronger and 20% thinner than previous versions, giving Optimus G the slimmest-ever body — at just 0.33". Yet, it offers strong protection for the display, to keep up with your active lifestyle.

Touch Innovation.

Zerogap Touch: Single Display Module Structure

Bring the latest display technology to your fingertips with Zerogap Touch, a high-gloss tempered glass design featuring a clearer picture, minimized reflections, better outdoor visibility, and super-sensitive touch input.

Streamline Your Tasks.

Turn your phone into a mobile theater or presentation center with SmartShare, enabling wireless sharing with bigger screens — and perform other tasks at the same time with Dual Screen Dual Play. Discreetly check notes on one screen while giving a presentation on another. Or send a note on your phone while watching a movie on your TV.

Set Your Expression Free.

Express yourself using only your finger and a little imagination. Draw, doodle, or write to make any photo or screen shot your own. Quickly sketch and share all your ideas with QuickMemo™.

Quickly jot down important notes or personalize images with fun doodles.

Cutting-Edge Multi-Tasking.

Work. Play. Simultaneously. Send an email or browse the web while watching a movie or dial a number taken down with QuickMemo. QSlide lets you double your productivity - or fun - by displaying two functions on the same screen, in transparent layers.

To make sure you don't miss anything important on either screen, adjust the transparency to suit your visual needs.

Live Zooming lets you zoom in and move around the screen when replaying a recorded video.

Revolutionary Mobile Photography.

This advanced 13MP camera with 1080p HD video recording leaves others behind — so you can too. Featuring high-quality resolution and high-end features, it's worthy to be the only camera you carry.

Smart Shutter automatically adjusts shutter speed when movement is detected to provide the clearest image possible.

- **Live Zooming** lets you zoom in on what's important to you as you're replaying a recorded video.
- **Beauty Shot** automatically brightens and smooths skin, for a profile-pic worthy photo every time.
- Say cheese to capture images with **Cheese Shutter**.
- **Time Catch Shot** captures your shot and the moments just before your shot making sure you get... the perfect shot.
- **Live Shot** lets you take photos while shooting video, so you can turn that perfect expression into a perfect print.
- **Front-Facing Camera** for face-to-face conversations.
