

LG CONNECT™ 4G

EXTEND YOUR LIMITS

I've always been one to push the edge of the envelope—that's actually how I've gotten to where I am today. I pride myself in making adventurous decisions, in and out of the boardroom, and when I saw the LG Connect 4G I knew it was the device I needed. It has the ultimate combo of blazing-fast 4G LTE speed plus a 1.2 GHz dual-core processor with 1 GB of RAM, which literally translates to an unprecedented power experience. In fact, I'll be multitasking faster than anyone I know!

LG Connect 4G satisfies more than just my task-driven life, it caters to my social needs as well. It sports a convenient front-facing camera for video chats when I'm not there in person. And, when I'm out and about the 5 MP rear-facing camera and 720p HD video recorder are perfect to capture moments of true greatness. Then I can simply upload those to Facebook® for all to see. Even better, it has a 4" NOVA display with Corning® Gorilla® Glass screen protection, so it handles both direct sunlight *and* all that my daring life has to throw at it. LG Connect 4G is the mobile device made for all aspects of me.

Top Notch

Combining a 1.2 GHz dual-core processor with 1 GB of RAM and 4G LTE speed provides an overall superior mobile experience. In fact, these features make LG Connect 4G the most powerful* device of the MetroPCS line-up.

Full Contact

The Corning Gorilla Glass screen has the sensitivity to be responsive when touched, but is tough enough to gracefully handle the rough-and-tumble times as well.

Memory Maker

Having a 5 MP camera and 720p HD video recorder ready to go, snapping pics and video of noteworthy moments is way too easy.

Personal Touch

The benefit of a front-facing camera means, no matter where you are, you can have a face-to-face conversation when one is needed.

*Based on 1.2 GHz dual-core processor and amount of included RAM at MetroPCS.
