

LG optimus™2

MULTITASKING MADE EASY

“I've been looking for a phone to make my life easier for quite some time now, and I have finally found it! LG Optimus™ 2 offers all the speed and efficiency I need, but without all the complicated extras I don't. The Android™ 2.3 platform runs smoothly and makes sense, especially with tips that walk me through it's features. With such a simple setup, I was surfing the web and sending emails right after I walked out of the store.

I don't need a ton of apps—I just need a few favorites that I can get to quickly. And, that's what I get with 5 customizable home screens and app categories—I can easily arrange my favs the way I want. For a bit of fun during the downtimes I have access to videos, music, and online reads, I can get my entertainment on the go as easily as I can at home. Plus it has a camera, so I can snap photos whenever I want! It really is the phone that's smart enough to make my life simpler.”

Simply Set Up

Learning how to use a complicated device can be a challenge, but this phone is designed to be different. Built on the Android™ Platform, it makes use easy and fun right from the start.

Logic in Layout

Optimus 2 is full of the necessary essentials and none of the meaningless extras that never get used. The 5 home screens provide easy app and widget management plus app categories may be rearranged and renamed for a truly personalized experience.

Handfuls of Fun

With the spacious and responsive touch screen it's easy to see how entertainment is placed right into the palm of your hand.

Forget Being Lost

How many times have you started driving somewhere and then realized you have no idea where to go? With turn-by-turn GPS and Navigation, that problem is now permanently solved.
