

# Open up to Sweet Simplicity

## LG Wine<sup>®</sup> III

Picture a phone they don't have to work for, but that works just for them. One where the keys are large enough to push individually, where the content on-screen can be seen without squinting, and where every conversation can be heard the very first time. LG's Wine III is easy to use and even easier to love. It will read texts aloud, display content largely and clearly, and even provide bright LED information at a glance.

LG's Wine III is perfection in a flip phone. Its comfortable, light, and stylish design puts quality in their pocket, while its easy to see, hear, and touch capabilities afford each user the comfort they deserve from a phone they can rely on. They can document their life and save memories for later to share with family and friends. This is the simplicity they need. This is life in big proportions.

### Open up to the Possibilities

Compact when closed, Wine III flips open to show off 3.0-inches of internal display.

### Stylish Design

Easy to admire with large keys, including a dedicated Voice Command key.

### Voice Clarity Mode

Improves sound quality and provides hearing assistance.

### Reads Messages Aloud

Supports text to speech (text messages only), ideal for going hands-free.

### Light up Your Life

Exterior LED Display matrix provides information such as voicemail, email, and text alerts at a glance.
