FURTHER INFORMATION

[^] Recommended Retail Price (RRP). Prices subject to change and does not include retailer charges.

¹ Motion Clarity Index (MCI) is a dynamic indicator of the clarity of motion on LG TVs. MCI is achieved using technologies available within the product to reduce blur in fast moving content like action movies and sports. A higher number indicates greater reduction.

² FreeviewPlus uses HbbTV technology which combines broadcast and broadband. Internet connection is required. Data usage charges and conditions apply.

³ Internet connection required. Internet usage charges and conditions apply. WebOS internet browser supports HTML5, VP9 and HEVC.

⁴ Voice recognition feature is not available in all languages and dialects. Actual performance may vary depending on the language spoken and surrounding environment including ambient noise.

⁵ Miracast compatible Android device required for this feature.

⁶ Dedicated USB Hard Drive (min. 40GB) required for longer recordings and live playback function (sold separately). Internal memory capacity is 8GB total.

⁷ Intel WiDi enabled PC must be in range of the TV.

⁸ 'LG TV Plus' on compatible Android devices (Android 4.1+). Phone must be in range, on the same Wi-Fi network as the TV.

⁹ Some brands not supported, check product for details.

¹⁰ Uses Bluetooth® 4.0 technology to send audio to compatible LG home audio products

¹¹ Netflix provides content in SD, HD and 4K Ultra HD. Netflix requires a steady internet connection speed of at least 25mbps to stream 4K Ultra HD content, otherwise content will be downscaled to either HD or SD quality based on the available bandwidth. Speeds of 25mbps available in limited locations and may vary depending on time of day. Please check with your internet service provider to confirm the bandwidth speed for your connection. Data usage charges apply.

¹² HDMI Port 1 supports HDCP 2.2 and 60fps @ 2160p.

All product specifications correct at time of printing. Specifications may change without prior notice. Customers are advised to check with your retailer before purchase.

Launch Details

Available: May 2015
79" RRP[^]: \$12999

Our PRIME 4K UHD TV is a tier above the company's 4K Ultra HD TV LED/LCD range.

New LG ColourPrime technology delivers more colours than ever before compared to a conventional LED/LCD TV. It also has ULTRA Luminance Technology, In-Plane Switching Panel (IPS) and sound designed by harman/kardon®.

LG's ColourPrime Technology increases the range of colours that can be displayed on screen by utilising different LED phosphor colours, creating image depth which feels almost real. ULTRA Luminance Technology enhances the lightest and darkest parts of the displayed content. It's achieved by adjusting the backlight zones to optimise image luminance, boosting image luminance.

LG's integrated Auditorium Stand matches the metallic finish of the bezel around the screen. It also features webOS 2.0, our Smart TV operating system that's been updated in 2015 for even quicker and simpler access to content you love most (including Netflix!). Uniquely engineered, it's Smart TV made simple.

*Ultra HD broadcasting not available in Australia. 4K Ultra HD content available from from other sources. Image quality of upscaled content will vary based on source resolution. Contents and features will vary from time to time without notice. WebOS internet browser supports HTML5, VP9 and HEVC.

ColourPrime

ColourPrime

Ultra clarity delivered with flying colours!
New in 2015, LG's ColourPrime wide colour gamut technology on the IPS panel creates deeper reds, greens and blues for sensational images.

200Hz
FIELD REFRESH RATE

200Hz Field Refresh Rate

A 200Hz field refresh rate delivers a world class viewing experience for sport, movies, TV shows and gaming.

Sound Designed by
harman/kardon®

Sound designed by harman/kardon®

The premium TV series boasts highly refined sound quality, realised in collaboration with harman/kardon®, one of the leading audio solutions in the industry.
