Take your
music with
you

Let the music flow with you

The P7, the latest Portable Bluetooth Speaker from LG will enrich your Smartphone listening experience on the go, with amazingly clear sound and a wide range of features.

The sound quality is impressive thanks to highly efficient speaker drivers, dual passive radiators and a LG auto sound engine all working in combination.

Using the Music Flow Bluetooth App enables users to access the advanced features, including Multi-Bluetooth (Party Mode) allowing users to connect up to 3 devices simultaneously - great for times when multiple people want to listen to their music at the same time.

Multi-Bluetooth

Pair up to 3 devices simultaneously (including phones, tablets or PCs). So friends can play their music one-after the other, without going through the disconnecting or connecting process.

**Music Flow Bluetooth App required. (minimum Android version 4.0.3) and (minimum iOS version 6)*

Dual Passive Radiators

The Passive Radiators allows the unit to produce deeper bass, for a fuller range of sound.

Long lasting Battery Life

Stretch the boundaries and enjoy your music outside thanks to the portable built-in battery (up to 9 hours playback*). Simply recharge via a universal micro USB.

**At 30% volume*
