Bluetooth App.Link  
Portable Input.Link

## Launch Details

Available: April 2015  
RRP: \$279<sup>^</sup>

## Let the music flow with you

Don't let the size fool you, the H4 produces an impressive sound, with clear vocals and deeper bass than you'd expect - delivered by Dual Passive Radiators and efficient speaker technology.

The built-in rechargeable Li-ion battery enables many hours of Bluetooth and Wi-Fi listening - making them a great option for spontaneous music listening or as rear speakers for your Music Flow Sound Bar.

When setup as a Wi-Fi speaker, the H4 can playback popular music streaming services like Spotify, Pandora\* and Google Play Music\*, as well as music stored on networked devices - including music stored on nearby phones. Music transmitted over Wi-Fi is clearer and won't be interrupted by an incoming phonecall to your smartphone.

Pair two H4s together with any networked Music Flow Sound Bar and conveniently create a wire free surround experience.

Whether it's Bluetooth® listening on the go, streaming music wirelessly in the lounge room or adding another H4 for a temporary home cinema experience in the TV room - the H4 represents a fine choice for flexible listening.

\* Available from June via speaker firmware update and updating the apps of compatible streaming services.

## Google Cast™ (available from June)

LG Music Flow Speakers have Google Cast built-in so you can cast music apps from your personal device to your speakers. You can cast from your Android phone or tablet, iPhone, iPad, Mac or Windows laptop or Chromebook.

\*Google Cast is compatible with Wi-Fi enabled Android 2.3+ smartphones and tablets; iOS7+ iPhone, iPad and iPod; Chrome for Mac® and Chrome for Windows®, ChromeOS.

## Dual Passive Radiators

The Passive Radiators allows the unit to produce deeper bass, for a fuller range of sound.

## Long lasting Battery Life

Stretch the boundaries and enjoy your music outside thanks to the portable built-in battery (up to 6 hours playback\*).

\*At 30% volume
