6 Stars

FURTHER INFORMATION

¹ Supports HDR10 and Dolby Vision™ via HDMI, USB and selected streaming services.
² Dolby Vision™ enabled via internet software update.
³ FreeviewPlus uses HbbTV technology which combines broadcast and broadband. Internet connection is required. Data usage charges and conditions apply.
⁴ Designed to work with compatible LG Audio products only.
⁵ Internet connection required. Internet usage charges and conditions apply. WebOS internet browser supports HTML5, VP9 and HEVC.
⁶ Voice recognition feature is not available in all languages and dialects. Actual performance may vary depending on the language spoken and surrounding environment including ambient noise.
⁷ Miracast compatible Android device required for this feature.
⁸ Dedicated USB Hard Drive (min. 80GB) required for recordings and live playback function (sold separately).
⁹ Intel WiDi enabled PC must be in range of the TV.
¹⁰ LG TV Plus™ on compatible Android devices (Android 4.1+) and (iOS 6.1+). Phone must be in range, on the same Wi-Fi network as the TV.
¹¹ Some brands not supported, check product for details.
¹² Uses Bluetooth 4.0 technology to send audio to compatible LG home audio products
¹³ Netflix provides content in SD, HD and 4K Ultra HD. Netflix requires a steady internet connection speed of at least 25Mbps to stream 4K Ultra HD content, otherwise content will be downgraded to either HD or SD quality based on the available bandwidth. Speeds of 25Mbps available in limited locations and may vary depending on time of day. Please check with your internet service provider to confirm the bandwidth speed for your connection. Data usage charges apply.
¹⁴ HDMI ports support HDCP 2.2 and 60fps @ 2160p.
 All product specifications correct at time of printing. Specifications may change without prior notice. Customers are advised to check with your retailer before purchase.

Launch Details

Available: May 2016

LG SUPER UHD 4K TV is the premium range within the LG 4K UHD LED/LCD line up. It includes a number of advanced features including HDR (High Dynamic Range) with Dolby Vision™ and ColourPrime technology.

Combined with a powerful Quad Core Processor, 6-Step Upscaler*, webOS 3.0 Smart TV and ULTRA Luminance technology, this TV delivers a breathtaking 4K UHD viewing experience, even when viewed from close distance.

ColourPrime

LG ColourPrime technology delivers 20% more colours than conventional LG LED/LCD TVs, based on the sRGB colour space. It does this by utilising different LED phosphor colours, creating image depth which feels almost real. This wide colour gamut technology creates deeper reds, greens and blues for sensational images.

200Hz Field Refresh Rate

A 200Hz field refresh rate provides reduced motion blur and image judder for a world class viewing experience for sport, movies and TV shows.

Smart TV Built-In

LG brings you an incredible range of streamed content with webOS 3.0 Smart TV[^]. And it's built-in, without the need for a set top box or media player connected by cable. Check out Netflix, Stan, YouTube, Google Play Movies and lots more.

*Image quality of upscaled content will vary based on the source resolution.

[^]Internet connection & streaming services membership (where applicable) required. Internet usage charges and conditions apply. Contents and features will vary from time to time without notice

HDR - High Dynamic Range

HDR enhances the graduation of contrast in the light and dark areas of an image as well as the colour to create a new level of realism.

ColourPrime

ColourPrime

20% more colours than conventional LG LED/LCD TV's, based on the sRGB colour space.

Dolby Vision™

Look for movies and TV shows streamed from Netflix in Dolby Vision™ which takes HDR footage to a new level. The picture in each scene is dynamically optimised to deliver refined detail, natural contrast and vivid colour.
