- ✓ Inverter Direct Drive Motor System
- ✓ Smart Diagnosis™ 2.0
- ✓ Large Opening for easier loading
- ✓ 1200rpm
- ✓ 12 Washing Programs with 6 Options
- ✓ 10 Year Parts Warranty on the Direct Drive Motor

Inverter Direct Drive Motor

LG's Inverter Direct Drive Motor - combines the direct drive motor with inverter control to provide an ultimate washing experience

Less Noise - with less moving parts when compared to other motor systems it creates less noise. Now you can wash while you sleep.

Greater Durability - with the direct drive motor at the heart of the machine, that's why you get LG's 10 Year Parts Warranty.

TrueSteam®

TrueSteam® has the natural ability to fluff up fabric fibres. This allows for the steam particles to clean on a microscopic level. Instead of saturating the stain with just one drop of water, we get 1,600 individual steam particles attacking the stain. By combining both water and steam along with washing at a higher temperature your detergent is dissolving much faster, giving a superior wash.

6 Motion Control

Like a hand wash, but better. LG Washers use a combination of 6 motions, based on hand-washing movements, to clean your clothes. Simply choose a wash cycle and your washer uses the best combination for an outstanding wash, whilst caring for your clothes.

Ultra Large Capacity - 15kg

Ultra Large Capacity of 15kg means that you can wash more clothes in the one load and have more 'you' time. With the extra large drum size you can wash bedding, pillows and even your pet blanket regularly at home
