Stretch Signage 105BM5P

Experience a Whole New Level of Viewing with Our 21:9 Widescreen Display

 21:9 Wide Screen

 Remote Device Management

 Ultra High Resolution

 Wireless ScreenShare

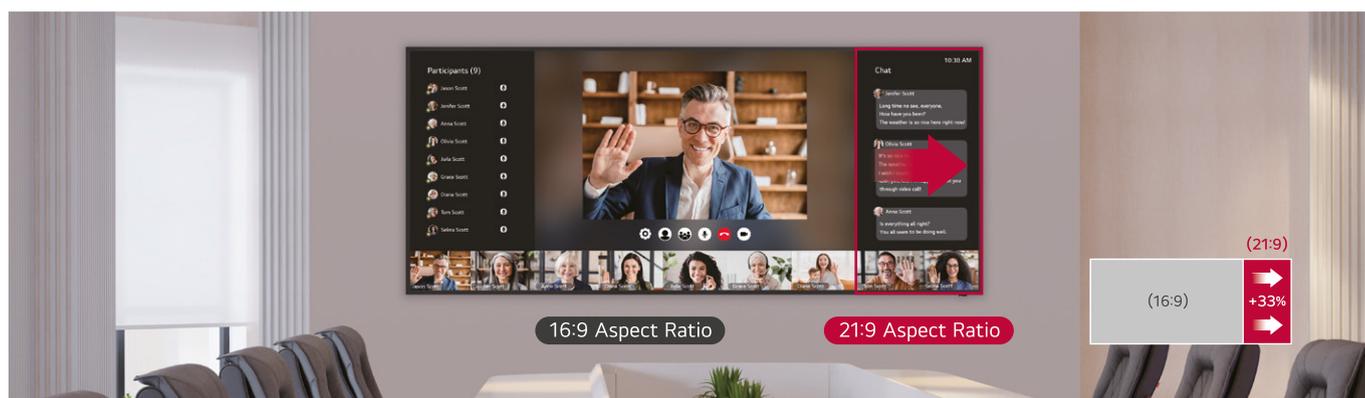

BM5P

Size 266.7 cm (105)

Resolution 5,120 × 2,160 (5K)

Brightness 440 nits (Typ.), 385 nits (Min.)

Product Size 2,490 × 1,074 × 77 mm

21:9 Extended Wide Format

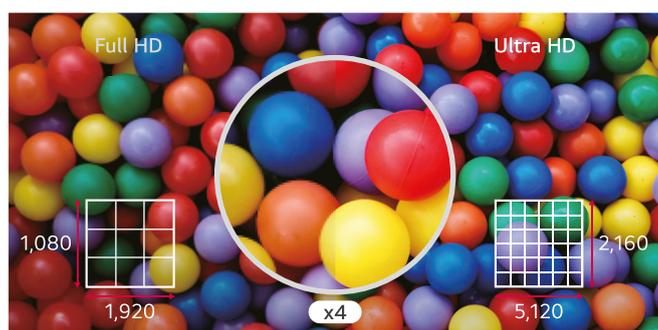

With support for a 21:9 widescreen aspect ratio, 105BM5P provides an immersive viewing experience with the wider screen than 16:9 display. Its screen specialization helps display 21:9 content including widescreen videoconferencing platforms with the natural details.

Portrait / Landscape Mode

The 105BM5P offers versatile usage, with the ability to be used in both vertical and horizontal orientations. This flexibility allows it to adapt to various installation and usage scenarios.

* The orientation must be manually adjusted when changing the installation direction.

High Resolution Display

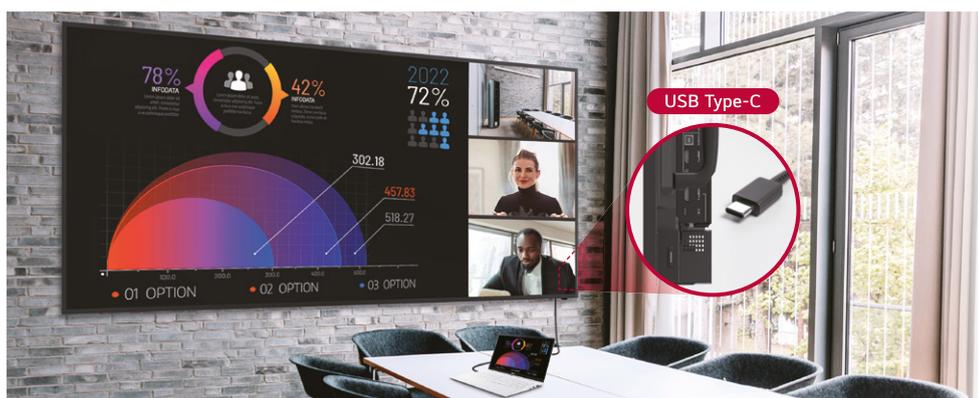

It provides a resolution that's more than 4 times higher than FHD, making the viewer satisfied visually. With a resolution of 5,120 × 2,160 and a high pixel density, every single detail of the display screen is conveyed vividly.

Slim Depth Design

The 105BM5P stands out with its slim bezel and sleek depth design with reduced weight. Not only does it save space, but it also facilitates easy installation, making it an ideal choice for a variety of settings.

* We recommend professional installation. If you choose to install it yourself, please ensure that at least two people are involved.

Easily Connect & Charge with USB Type-C

USB Type-C connectivity simplifies connections which enables charging and sending data simultaneously over just one single cable.

* USB Type-C cables are sold separately.

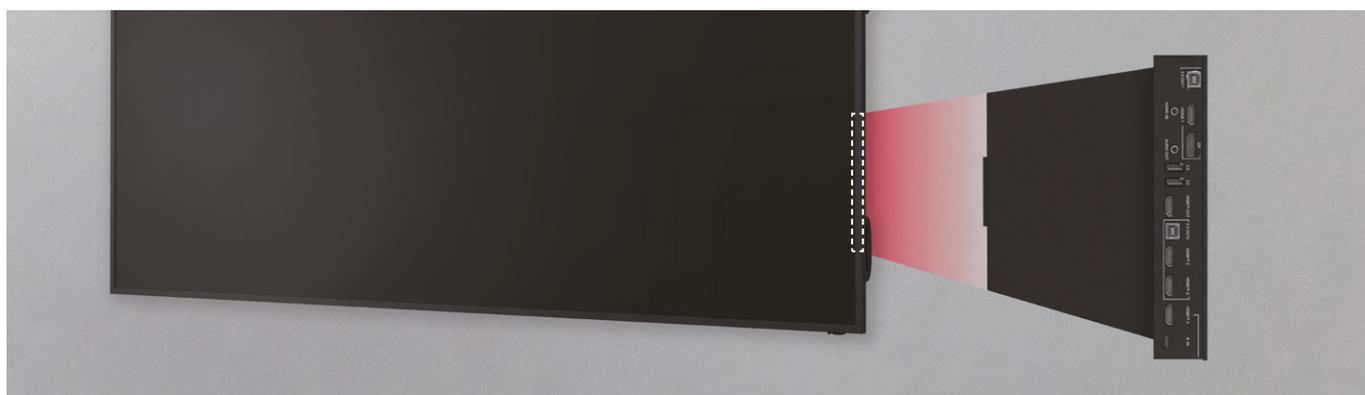

Wireless ScreenShare

The 105BM5P offers a wireless screen sharing feature, known as LG CreateBoard Share, allowing for easy sharing of presentation materials wirelessly, thus eliminating the clutter of wires. This enables users to show up to 9 shared screens or a file on a screen in real-time when the LG CreateBoard Share app is installed on the device. Also, files from the host can be easily sent to any devices connected to the app.

* LG CreateBoard also supports app-less sharing for PC (via website) and mobile devices within the same network.

* For a more stable connection, we recommend the installation of a dedicated app (LG CreateBoard Share).

OPS Slot

105BM5P supports OPS slots, allowing you to conveniently mount OPS Module at the back of the screen without the hassle of connecting to an external desktop, enabling various PC functions and Windows software even on the 105BM5P.

* OPS : Open Pluggable Specification

* OPS Player for 105BM5P supports 4K output and is sold separately.

LG ConnectedCare DMS

LG ConnectedCare DMS is a cloud solution for remotely monitoring, controlling, and managing the status of devices. This feature enables IT managers to manage important resources on operating devices without physically visiting sites.

* LG ConnectedCare DMS needs to be purchased separately.

* The availability of the LG ConnectedCare DMS service differs by region, so please contact the LG sales representative in your region for more details.

* LG ConnectedCare DMS supports TV Signage (UM340E, UR640S), LG CreateBoard (TR3 Series) and Stretch Signage (105BM Series) as of now (plus more to come) under a cloud environment.

Remote Control

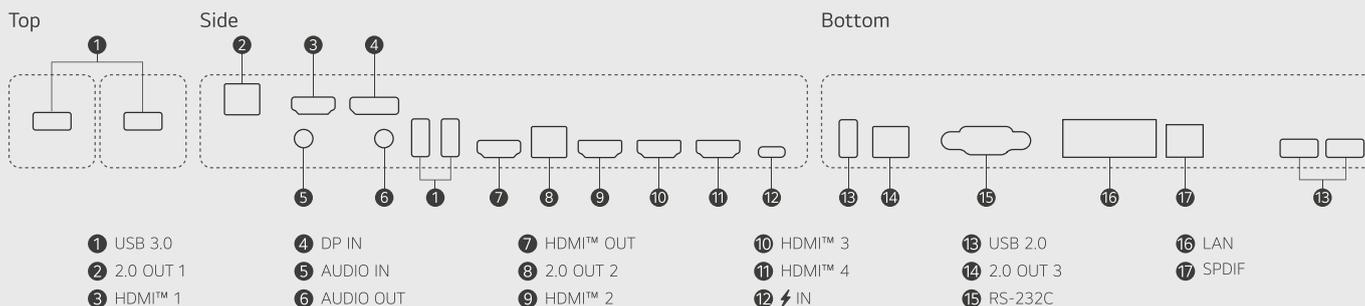

Thanks to LG ConnectedCare DMS, IT manager can select specific devices to be controlled remotely and update their settings all at once. General settings, power settings, application management, and multimedia can all be effectively managed and controlled simultaneously, enabling the stable operation of clients' businesses.

Broadcast / Alert Message

Messages and a range of other content can be sent from the main system's hub to individual devices connected to LG ConnectedCare DMS and you can easily display important company notices or schedules right on your device. In case of urgent occasions such as a fire or a natural disaster, alert messages can be distributed manually across the system, which helps people promptly take a safety action.
