Powerful UI/UX with Megapixel HELIOS LED Processing Platform

With the the Megapixel HELIOS LED Processing Platform, LBAG now has the capability to utilize powerful UX and UI functionalities. Real-Time Mapping and Multi-User Control, Superior Color Control, Hyper-Speed Seam Correction using a game controller, and Monitoring and Diagnostics through connected diagnostics are all available.

* Megapixel HELIOS LED Processing Platform needs to be purchased separately

Easy Installation & Maintenance

The module can be easily removed with even bare hands, as it features rear service access that does not require any tools. Additionally, the positioning pins and magnets help perform easy panel adjustments, resulting in a smooth screen assembly.

LED Indicator to Check Status

LED Indicator provides convenience to users to check LBAG status with various meanings of colors.

Stacking & Hanging System Available

It can be installed by stacking or hanging, using the optional accessories such as single or double beams for customization to the studio environment.

* Installation accessories need to be purchased separately

Curve Effect Available

The angle adapter system and fast lock are designed to facilitate easy installation for curved display. The system allows for adjustment of up to 10 degrees in concave area while providing a secure mechanical connection.

Broadcast Quality Available

With HDR capability and low latency video processing, LBAG supports broadcast-quality, providing accurate and smooth playback.

Black Immersion, Enlivened Details

By removing a package surrounding R, G, B LED chips and applying LG's own Full Black Coating technology, the LBAG series surprisingly delivers much deeper black than the conventional package LED signage*. This not only enhances color vividness, but also makes the details which were hidden in the shadows appear, providing audiences a sense of immersion.

* Based on comparison against LG's conventional LED Signage

Accurate Colors as Intended

By carefully selecting an LED chip which is a key factor to determine color purity, its narrowed wavelength allows LBAG series to show uniform colors across the screen. Furthermore, the enhanced Gamut Transfer technology supports it to describe colors close to the original color, which is essential for places where exact color representation is demanding.

Wide Color Viewing Angle

Thanks to the structure of LBAG series, it minimizes color distortion according to the viewing angle. In other words, the original color can be appreciated even from the side angles, captivating various pedestrians even if it is installed in a large public places.
