

LG Ultra High Definition Hospitality TV

Boost UHD streaming with added functionality for your current network.
Enable a stable and amazing UHD experience.

Future proof your in-room UHD HTV solution and take the strain away from your current network without the need for expensive infrastructure expansion. Using LG's dual LAN Out and Google's innovative Chromecast Ultra hardware, achieve a more stable network environment and UHD streaming whilst reducing the need for additional network infrastructure cost.

- Keep your existing Wi-Fi and improve ROI
- Future proof network connectivity solution
- Ultra High Definition playback & streaming
- Money saving effortless integration

EMPOWERING HOSPITALITY TV SOLUTIONS

LG

**Business
Solutions**

Enhance your in room guest entertainment capabilities and provide a stable and strong Wi-Fi streaming platform*

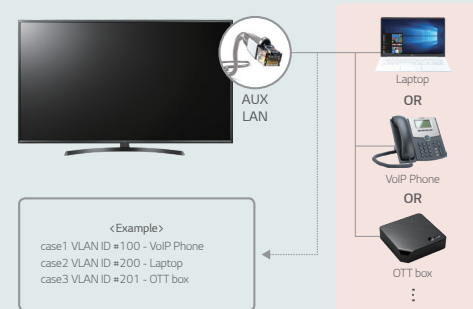

The new LG hospitality displays offer dual LAN connectivity to empower convenient and low cost Google Chromecast Ultra streaming functionality as standard.

Further, with advanced features, Smart customisation and connectivity, commercial build quality and control our new LED UHD HTV models offer real opportunity to captivate and impress your guests and elevate brand impression and facilities.

Create inspiring experiences

Wow your guests with visual solutions that not only compliment the room aesthetic but seriously enhance the technology interaction and brand promise of your hotel.

Provide a more secure platform for entertainment streaming for customers by separating the internal and guest networks.

* When used in conjunction with Google Chromecast
