The accompanying notes are an integral part of these non-consolidated financial statements.

1. The Company

LG Electronics Inc. (the "Company") was spun off from LG Electronics Investment Ltd. (formerly LG Electronics Inc.) on April 1, 2002, to engage in the manufacture and sale of electronic, and information and communication products.

As of March 31, 2004, the Company operates manufacturing facilities mainly in Kuro, Pyeongtaek, Chongju, Gumi, and Changwon in the Republic of Korea.

As of March 31, 2004, the Company has outstanding capital stock amounting to W783,961 million, including non-voting preferred stock. The Company's stock was listed on the Korean Stock Exchange on April 22, 2002, and its depositary receipts ("DRs") were listed on the London Stock Exchange in September 2002.

As of March 31, 2004, LG Corp. owns a total of 32.1% of the Company's common stock, and financial institutions, foreign investors and others own the rest of the Company's common stock.

2. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its non-consolidated interim financial statements are summarized below:

Basis of Financial Statement Presentation

The Company maintains its accounting records in Korean Won and prepares statutory financial statements in the Korean language in conformity with accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been condensed, restructured and translated into English from the Korean language non-consolidated financial statements, but not required for a fair presentation of the Company's financial position, results of operations, or cash flows, is not presented in the accompanying non-consolidated financial statements.

Accounting Estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect amounts reported therein. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may be different from those estimates.

Application of the Statements of Korean Financial Accounting Standards

The Korean Accounting Standards Board ("KASB") has published a series of Statements of Korean Financial Accounting Standards ("SKFAS"), which will gradually replace the existing financial accounting standards established by the Korean Financial Supervisory Commission. SKFAS No. 1, *Accounting Changes and Corrections of Errors,* became effective for the Company on January 1, 2002, SKFAS No. 2, *Interim Financial Reporting,* through No. 9, *Convertible* Securities, became effective for the Company on January 1, 2003, and SKFAS No. 10, *Inventories,* SKFAS No. 12, *Construction-Type Contracts,* and SKFAS No. 13, *Debt Restructuring and Rescheduling,* became effective for the Company on January 1, 2004. The Company has adopted these statements in its interim financial statements for the three-month period ended March 31, 2004.

Revenue Recognition

Revenues from finished products and merchandise are recognized when most of the risks and benefits associated with the possession of goods are substantially transferred. Accordingly, sales of finished products are recognized when inspection is completed, and sales of merchandise are recognized when delivered. Revenue from installation service contracts is recognized using the percentage-of-completion method.

Cash and Cash Equivalents

The Company considers cash on hand, bank deposits and highly liquid marketable securities with original maturities of three months or less to be cash and cash equivalents.

Securities

The Company accounts for equity and debt securities under the provisions of Statement of Korean Financial Accounting Standards ("SKFAS") No. 8, *Securities*. This statement requires investments in equity and debt securities to be classified into three categories: trading, available-for-sale and held-to-maturity.

Securities are initially carried at cost, including incidental expenses, with cost being determined using the gross average method. Debt securities, which the Company has the intent and ability to hold to maturity, are generally carried at cost, adjusted for the amortization of discounts or premiums. Premiums and discounts on debt securities are amortized over the term of the debt using the effective interest rate method. Trading and available-for-sale securities are carried at fair value, except for non-marketable securities classified as available-for-sale securities whose fair value may not be determined, which are carried at cost. Non-marketable debt securities are carried at a value using the present value of future cash flows, discounted at a reasonable interest rate determined considering the credit ratings by independent credit rating agencies.

Unrealized valuation gains or losses on trading securities are charged to current operations, and those resulting from available-for-sale securities are charged to capital adjustments, the accumulated amount of which shall be charged to current operations when the related securities are sold, or when an impairment loss on the securities is recognized. Impairment losses are recognized in the statement of income when the recoverable amounts are less than the acquisition cost of securities or adjusted cost of debt securities after the amortization of discounts or premiums.

Investments in equity securities of companies, over which the Company exercises a significant control or influence (controlled investees), are recorded using the equity method of accounting. Under the equity method, the Company records changes in its proportionate ownership of the book value of the investee in current operations, as capital adjustments or as adjustments to retained earnings, depending on the nature of the underlying change in book value of the investee.

The Company discontinues the equity method of accounting for investments when the Company's share in the accumulated losses of the investees equals the costs of the investments, and until the subsequent cumulative changes in its proportionate net income of the investees equal its cumulative proportionate net losses not recognized during the periods when the equity method was suspended. Differences between the initial purchase price and the Company's initial proportionate ownership of the net book value of the investee are amortized over five years using the straight-line method, and the amortization is charged to current operations.

Unrealized profit arising from sales by the Company to equity method investees is fully eliminated. Unrealized profit arising from sales by the equity method investees to the Company or sales between equity method investees is also eliminated considering the percentage of ownership.

Foreign currency financial statements of equity method investees are translated into Korean Won using the basic exchange rates in effect as of the balance sheet date for assets and liabilities, and annual average exchange rates for income and expenses. Any resulting translation gain or loss is included in the capital adjustments account, a component of shareholders' equity.

Allowance for Doubtful Accounts

The Company provides an allowance for doubtful accounts based on the aggregate estimated collectibility of the accounts.

Inventories

Inventories are stated at the lower of cost or market, with cost being determined using the weighted-average method, except for inventories in-transit which is determined using the specific identification method. If the net realizable value of the inventory is less than its cost, the carrying amount is reduced to the net realizable value. The valuation loss is charged to cost of sales and presented as a deduction from the inventory. However, the recovery of the net realizable value of the inventory before valuation.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost, net of accumulated depreciation. Depreciation is computed using the straight-line method over the following estimated useful lives of the assets, as described below.

Estimated useful life (years)

Buildings	20 - 40 years
Structures	20 - 40 years
Machinery and equipment	5 - 10 years
Tools, furniture and fixtures, and vehicles	5 years

Routine maintenance and repairs are charged to current operations as incurred. Betterments and renewals which enhance the value of the assets over their most recently appraised value are capitalized.

The Company assesses the potential impairment of property, plant and equipment when there is evidence that events or changes in circumstances have made the recovery of an asset's carrying value to be unlikely, and recognizes an impairment loss when the carrying value of an asset exceeds the value of its future economic benefits. The carrying value of the impaired assets is reduced to the estimated realizable value, and an impairment loss is recorded as a reduction in the carrying value of the related asset and charged to current operations. However, the recovery of the impaired assets would be recorded in current operations up to the cost of the assets, net of accumulated depreciation before impairment, when the estimated value of the assets exceeds the carrying value after impairment.

Lease Transactions

Lease agreements that include a bargain purchase option, result in the transfer of ownership at the end of the lease term, have a term longer than 75% of the estimated economic life of the leased property, or have a present value of the minimum lease payments at the beginning of the lease term amounting to more than 90% of the fair value of the leased property, are accounted for as capital leases. Leases that do not meet these criteria are accounted for as operating leases, of which the total minimum lease payments are charged to expense over the lease period on a straight-line basis.

Research and Development Costs

Research costs are expensed as incurred. Development costs directly relating to a new technology or new products, for which the estimated future benefits are probable, are recognized as intangible assets. Amortization of development costs is computed using the straight-line method over five years from the commencement of the commercial production of the related products. Such costs are subject to continual analysis of recoverability. In the event that such amounts are not estimated to be recoverable, they are written-down to their net realizable value.

Intangible Assets

Intangible assets are stated at acquisition cost, net of accumulated amortization. Acquisition cost is the total of the production or purchase cost and other incidental expenses. Amortization is computed using the straight-line method over the estimated useful lives, which range from five to ten years.

The Company assesses the potential impairment of intangible assets when there is evidence that events or changes in circumstances have made the recovery of an asset's carrying value to be unlikely. An impairment loss is recorded as a reduction in the carrying value of the related asset and charged to current operations. However, the recovery of the impaired assets would be recorded in current operations up to the cost of the asset, net of amortization before impairment, when the estimated value of the assets exceeds the carrying value after impairment.

Borrowing Costs

Interest and other financial costs incurred on borrowings used to acquire property, plant and equipment, intangible assets and investments are all charged to expense as incurred.

Discounts (Premiums) on Debentures

Discounts (premiums) on debentures are amortized using the effective interest rate method over the repayment period of the debentures. The amortized amount is included in interest expense.

Treasury Stock

Treasury stock are stated at cost and recorded as a capital adjustment in shareholders' equity. Gain on disposal of treasury stock is recorded as a capital surplus. Any loss on disposal of treasury stock is offset against prior gains on disposal of treasury stock included in capital surplus. The remaining loss is offset against retained earnings.

Product Warranty

The Company provides warranties against product defects for a specified period of time after the sale. Estimated costs of product warranties are charged to current operations at the time of sale and are included in the accompanying non-consolidated balance sheets as a product warranty reserve.

Accrued Severance Benefits

Employees and directors with at least one year of service are entitled to receive a lump-sum severance payment upon termination of their employment with the Company, based on their length of service and rate of pay at the time of termination. Accrued severance benefits represent the amount which would be payable assuming all eligible employees and directors were to terminate their employment as of the balance sheet date.

Contributions made under the National Pension Plan and severance insurance deposits are deducted from accrued severance benefits. Contributed amounts are refunded from the National Pension Plan and the insurance companies to employees upon their retirement.

Income Taxes

The Company recognizes deferred income taxes for anticipated future tax consequences resulting from temporary differences between amounts reported for financial reporting and income tax purposes. Deferred income tax assets and liabilities are computed on such temporary differences by applying enacted statutory tax rates applicable to the years when such differences are expected to be reversed. Deferred income tax assets are recognized to the extent that it is almost certain that such deferred income tax assets will be realized. The total income tax provision includes current tax expenses under applicable tax regulations and the change in the balance of deferred income tax assets and liabilities.

Tax credits for investments and development of research and manpower are accounted for using the flow-through method, whereby income taxes are reduced in the period the assets giving rise to such credits are placed in service. To the extent such credits are not currently utilized, deferred income tax assets, subject to realizability as stated above, are recognized for the carry-forward amount.

Sale of Accounts and Notes Receivable

The Company sells certain accounts or notes receivable to financial institutions at a discount, and accounts for the transactions as a sale of the receivables, if the rights and obligations relating to the receivables are substantially transferred to the buyers. The losses from the sale of the receivables are charged to current operations as incurred.

Foreign Currency Translation

Monetary assets and liabilities denominated in foreign currencies are translated into Korean Won at the basic rates in effect at the balance sheet date, and resulting translation gains or losses are recognized in current operations.

The exchange rate used to translate U.S. Dollar denominated monetary assets and liabilities as of March 31, 2004 and December 31, 2003 is $\mathbb{W}1,153.6$: US\$1 and $\mathbb{W}1,197.8$: US\$1, respectively.

Derivative Financial Instruments

The Company utilizes several derivative financial instruments ("derivatives") such as forward exchanges, swaps and option contracts to reduce its exposure resulting from fluctuations in foreign currency and interest rates. The derivatives are carried at fair market value. Unrealized gains or losses on derivatives for trading or fair value hedging purposes are recorded in current operations. Unrealized gains or losses on derivatives for the portion of the hedge that is not effective. For the portions of cash flow hedges which are effective, unrealized gains or losses are accounted for in the capital adjustments account and recorded in current operations in the period when the underlying transactions have an effect on operations.

(*1) Carrying value was fully written down due to the negative net book value of the investment as of March 31, 2004.

- (*2) Upon a resolution of the Board of Directors on February 6, 2004, the Company purchased commercial papers (having a face value of $\mathbb{W}150,000$ million and maturing in May and June 2004) of LG Card Co., Ltd., as part of the fulfillment of LG Card Co., Ltd.'s business normalization agreement with the creditor financial institutions. The commercial papers are scheduled to be substituted for LG Card Co., Ltd.'s subordinated convertible bonds whose terms, such as the interest rate and conversion price, will be agreed by the creditor financial institutions and the LG Group reflecting market conditions after the debt-for-equity swap implemented by the creditor financial institutions. However, as of March 31, 2004, the terms of the subordinated convertible bonds were not yet determined.
- (*3) For the three-month period ended March 31, 2004, the Company disposed of all the shares (2,360,018 shares) of KT Corp., resulting in a loss amounting to ₩18,697 million.
- (*4) Loss on valuation of available-for-sale securities amounting to $\mathbb{W}13,795$ million was charged to capital adjustments.
- (*5) Upon a resolution of the Board of Directors on December 23, 2003, the Company entrusted its disposal and voting rights for the 10,180,531 shares of the common stock of LG Investment & Securities Co., Ltd. to Woori Bank, the representative of the creditor banks, as a part of the business normalization plan of LG Card Co., Ltd. In April 2004, in accordance with the business normalization plan, Korea Development Bank exercised its preemptive right to purchase the shares of LG Investment & Securities Co., Ltd., and the Company will dispose of the 10,180,531 shares.

The annual maturities of debt securities classified as available-for-sale securities and held-to-maturity securities as of March 31, 2004 are as follows:

In order to reduce the impact of changes in interest rates and exchange rates, the Company has entered into a cross currency swap contract. An unrealized valuation gain of W6,777 million was recorded to current operations for the three-month period ended March 31, 2004. A summary of the terms of the outstanding cross currency swap contract as of March 31, 2004 is as follows:

	Transact	ion amount	Annual	interest rate (%)	
(in millions)	Receipts	Disbursement	Receipts	Disbursement	Maturity
Standard Chartered Bank	₩110,000	US\$93	4.50%	3M Libor + 0.79%	November 7, 2005
Barclays Bank	117,150	100	5.00%	3M Libor + 1.17%	February 26, 2007

As a result of the above derivatives contracts, a realized gain of \Im 3,003 million and a realized loss of \Im 3,288 million were recorded as a non-operating income and expense, respectively, for the three-month period ended March 31, 2004.

As of March 31, 2004, the Company is named as the defendant in legal actions which were brought against the Company by AVS Corporation in Canada and Mahmood Saleh Abbar Co. in Saudi Arabia. In addition, the Company is named as the defendant or the plaintiff in various foreign and domestic legal actions arising from the normal course of business. The aggregate amounts of domestic claims as the defendant amounted to approximately W12,257million as of March 31, 2004. The Company believes that the outcome of these legal actions is uncertain but, in any event, they would not result in a material ultimate loss for the Company. Accordingly, no provision for potential losses arising from these claims is reflected in the accompanying non-consolidated financial statements.

In common with certain other Asian countries, the economic environment in the Republic of Korea continues to be volatile. In addition, the Korean government and the private sector continue to implement structural reforms to historical business practices, including corporate governance. The Company may be either directly or indirectly affected by these volatile economic conditions and the reform program described above. The accompanying non-consolidated financial statements reflect management's assessment of the impact to date of the economic environment on the financial position and results of operations of the Company. Actual results may differ materially from management's current assessment.

18. Capital Stock

As a result of the issuance of foreign currency convertible bonds in August 2003, a premium for conversion rights amounting to $\mathbb{W}15,833$ million was recorded as a capital surplus representing the difference between the issuance price of convertible bonds and the present value of bonds under identical conditions without conversion rights.

20. Retained Earnings

The Commercial Code of the Republic of Korea requires the Company to appropriate, as a legal reserve, an amount equal to a minimum of 10% of cash dividends paid until such reserve equals 50% of its issued capital stock. The reserve is not available for the payment of cash dividends, but may be transferred to capital stock through an appropriate resolution by the Company's Board of Directors or used to reduce accumulated deficit, if any, through an appropriate resolution by the Company's shareholders.

In accordance with the regulations regarding securities' issuance and disclosure, the Company is required to appropriate, as a reserve for improvement of financial structure, a portion of retained earnings equal to a minimum of 10% of its annual income plus at least 50% of the net gain from the disposal of property, plant and equipment after deducting related taxes, until shareholders' equity equals 30% of total assets. This reserve is not available for the payment of dividends, but may be transferred to capital stock through an appropriate resolution by the Company's Board of Directors or used to reduce accumulated deficit, if any, through an appropriate resolution by the Company's shareholders.

Pursuant to the Special Tax Treatment Control Law, the Company is allowed to appropriate retained earnings as a reserve for research and manpower development. This reserve is not available for the payment of dividends until used for the specified purposes or reversed.

The income tax effect of temporary differences comprising the deferred income tax assets as of March 31, 2004 and December 31, 2003 are as follows:

(in millions of Won)	2004	2003
Depreciation	₩ 2,067	₩ 1,499
Allowance for doubtful accounts	36,315	37,829
Product warranty	29,257	23,095
Amortization of intangible assets	(18,628)	(21,470)
Equity method investment securities	74,740	169,227
Others	53,821	39,548
Deferred income tax assets	₩ 177,572	₩ 249,728

The Company periodically assesses its ability to recover deferred income tax assets. In the event of a significant uncertainty regarding the Company's ultimate ability to recover such assets, a valuation allowance is recorded to reduce the assets to its estimated net realizable value. The statutory income tax rate, including resident tax surcharges, applicable to the Company was approximately 29.7% in 2004 and 2003, and was amended to 27.5% effective for fiscal years beginning January 1, 2005, in accordance with the Corporate Income Tax Law enacted in December 2003. Deferred income tax assets were computed by applying the present tax rate of 29.7% for the temporary differences expected to be realized by 2004, and by applying the amended tax rate of 27.5% for the temporary differences expected to be realized in fiscal years beginning January 1, 2005 and thereafter.

23. Earnings Per Share

Basic earnings per share is computed by dividing net income allocated to common stock by the weighted-average number of common shares outstanding during the period. Basic ordinary income per share is computed by dividing ordinary income allocated to common stock, which is net income allocated to common stock as adjusted by extraordinary gains or losses, net of related income taxes, by the weighted-average number of common shares outstanding during the period.

Basic earnings per share for the three-month periods ended March 31, 2004 and 2003 are calculated as follows:

(in millions of Won, except per share amounts)	2004	2003
Net income as reported on		
the statement of income	₩ 584,702	₩ 188,857
Less: Preferred stock dividends	(5,553)	(5,904)

Net income allocated to common stock	520,256	165,474
Weighted-average number		
of common shares outstanding	139,280,084	139,313,966
Basic earnings per share (in Won)	₩ 3,735	₩ 1,188

Basic ordinary earnings per share for the three-month periods ended March 31, 2004 and 2003 are the same as basic earnings per share for the three-month periods ended March 31, 2004 and 2003, respectively, because there were no extraordinary gains or losses.

Diluted earnings per share is computed by dividing diluted net income, which is adjusted by adding back the after-tax amount of interest expense on any convertible debt and dividends on any convertible preferred stock, by the weighted-average number of common shares and diluted securities outstanding during the period. Diluted ordinary income per share is computed by dividing diluted ordinary income allocated to common stock, which is diluted net income allocated to common stock as adjusted by extraordinary gains or losses, net of related income taxes, by the weighted-average number of common shares and diluted securities outstanding during the period.

Diluted earnings per share for the three-month periods ended March 31, 2004 and 2003 are calculated as follows:

(in millions of Won, except per share amounts)	2004	2003
Net income allocated to common stock Add: Interest expense on convertible	₩ 520,256	₩ 165,474
bonds, net of tax (*)	1,376

Diluted earnings per share and ordinary		
income per share (in Won)	₩ 3,618	₩ 1,188

(*) This is computed based on the effective tax rate of 20.2% (Note 22).

Diluted ordinary income per share for the three-month periods ended March 31, 2004 and 2003 is the same as diluted earnings per share for the three-month periods ended March 31, 2004 and 2003, respectively, because there were no extraordinary gains or losses.

Diluted earnings per share and diluted ordinary income per share for the year ended December 31, 2003 amounted to W4,187.

The diluted securities outstanding as of March 31, 2004 are as follows:

Diluted security	Face value	Conversion period	Number of shares of common stock to be issued	Conversion price
Foreign currency denominated	₩339,796 million	September 12, 2003	4,887,500 shares	₩68,900
convertible bonds, issued in 2003	(US\$287.5 million)	through July 28, 2006		per share
