

## Go Cloud with LG's Zero-Client

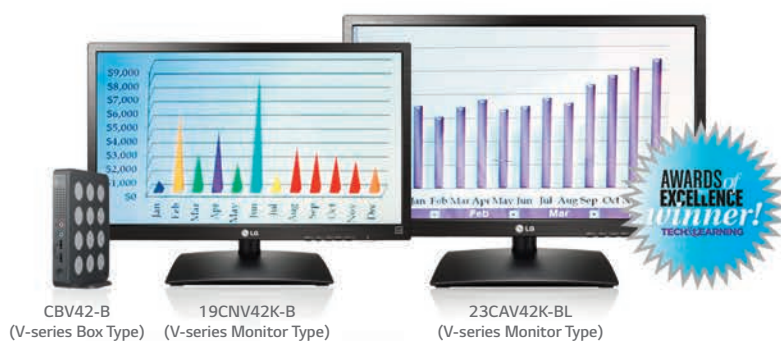

Elevating to the next level for a fast, ultra-secure and efficient multi-virtual computing solution.

LG's Zero-Client utilizes a Teradici® PCoIP® (PC-over-IP) TERA2 Chipset and VMware to deliver a powerful and secure virtual computing solution. Compared to a traditional desktop computing system, zero-client allows advanced computing with greater security, thanks to PCoIP Zero-Client, while reducing system-building and maintenance costs. LED backlight technology also provides a bright and clear display to facilitate a comfortable computing experience for daily work and multimedia applications.

The LG's zero-client provides a perfect solution for the education market whereas it encompasses a true all-in-one device. This breakthrough in technology streamlines the workplace and integrates existing VMware view.

LG excels in bringing innovation in information technology including Ultra Wide (21:9 Aspect Ratio) and WQHD LED monitors that are designed to help improve your productivity.
