

# Safety and Health Policy

LG Electronics places top priority on the safety and health of its employees, customers, and communities. Through active leadership, we will strive to ensure safety and health in our workplaces while continuously enhancing our performance.

- In our business decision-making, safety and health will precede economic and operational efficiencies.
- We shall ensure full compliance with safety and health laws, regulations, and processes, and establish our own rules that meet or exceed legal requirements.
- We shall actively invest in foundations for safety and health systems and continue to identify and eliminate potential risks.
- We shall establish and implement emergency response plans to properly address any potential accident or disease in our work place, and be prepared for emergencies accordingly.
- All of our organizations and members must recognize their roles and responsibilities for full compliance with safety and health policies and shall actively participate in relevant activities.
- Our information concerning safety and health shall be accessible to all employees and stakeholders.

# Environmental Policy

LG Electronics recognizes the environment as a key pillar in our business operations. We will do our utmost to preserve the environment, pursue sustainable social development, and improve the quality of our stakeholders' lives by minimizing resource consumption, developing eco-friendly production processes & products, and optimizing our energy efficiency.

- In our business decision-making, environmental protection will precede economic and operational efficiencies.
- We shall ensure full compliance with international conventions and regulations on the environment and establish our own rules that meet or exceed the legal requirements to strive for continuous improvement.
- We shall minimize environmental impact of our business operations by developing eco-friendly processes with reduced consumption of chemical substances and decreased emission of pollutants.
- We shall accurately assess environmental impact of the entire product lifecycle from product design to usage and disposal, while taking the initiative to develop eco-friendly products.
- We shall spare no effort to minimize greenhouse gas emissions by optimizing energy efficiency, investing in low carbon technologies, and expanding usage of renewable energy.
- Our employees shall actively participate and be involved in the conservation of energy and resources and recycling in our overall business operations.

※ This Policy shall be applicable to all global sites of LG Electronics, all employees working for LGE, and stakeholders in our value chain.
