Model : LG-C375

LG Electronics’ strategic direction for greener products is to minimize the environmental load in every stage of the product lifecycle. At the highest perspective, it is composed of three factors - Energy, Human, and Resources - as well as being based on a design of higher energy efficiency, reduction in raw/subsidiary materials, and improvements in the human wellbeing.

The LG Electronics Environmental Declarations give information on the most relevant environmental aspects of the product.

### PRODUCT

- **Product Type/Model**: Mobile phone / LG-C375
- **Weight**: 104.55 g (Including battery)
- **Dimension (L×W×H)**: 113.6 mm × 61.9 mm × 12.9mm

### PACKAGE

- **Dimension (L×W×H)**: 120 mm x 98 mm x 66 mm
- **Volume**: 605 cm³
- **Weight**: 36.5 g
- **Material composition**: Paper*: 36.5 g
  *Made from 76% post-consumer recycled paper.

### ENERGY CONSUMPTION

- **Non-Load Power Consumption**: 0.16 W
- **Average charging Efficiency**: 66.28%
- **EU CoC¹ Charger energy rating**: ★★★

### Battery Information

- **Battery Type/Capacity**: Standard Battery Type, Li-Ion/ 950mA
- **Weight**: 24 g
- **Battery Using Time**
  - Standby mode: Up to 600 hours
  - Call mode: Up to 480 minutes

* The battery cell does NOT contain lead, cadmium and mercury in accordance with EU Directives 2006/66/EC.
In order to ensure that all LG Electronics’ products and packaging comply with the environmental directive and regulation on the Use of Hazardous Substances, LG Electronics manage strictly the supplier and the material information used in the all LGE products with the LGE standard for the management of hazardous substances in the product and the hazardous substance management IT system.

This product (including packaging) complies with the below mentioned directives and regulation.

<table>
<thead>
<tr>
<th>Directive 2002/95/EC</th>
</tr>
</thead>
<tbody>
<tr>
<td>REACH Regulation</td>
</tr>
<tr>
<td>Directive 2002/95/EC</td>

Ozone Depleting Substances

CFCs, HFCs, Halons, Chlorofluorocarbons as banned in the Montreal Protocol

LG Electronics phased out the using of Polyvinylchloride(PVC), Brominated flame retardants (BFR), Chlorinated flame retardants (CFR) and Phthalates as defined in hazardous substances list LG Electronics’ Standard for Management of Hazardous Substances.

Further information on the hazardous substance management of LG Electronics’ and hazardous substance phase out program and regarding REACH compliance can be found at:

The product packaging does NOT contain:

- Heavy metals according to 94/62/EC
- Ozone depleting substances as listed in the Montreal protocol
- PVC

Unit Box is made from 76% of post consumer recycled paper. And it is printed with vegetable based ink (Soy). Plastic packaging material is marked in accordance with ISO 11469 and ISO 1043-1 to 4 or the relative regulation in Korea, Japan and China.
Mechanical plastics parts, heavier than 5g have material codes in accordance with ISO 11469 and ISO 1043-1 to -4 to facilitate plastics recycling.

LG Electronics has fulfilled the WEEE directive demands in all EU countries, including countries like the Netherlands, Belgium, and Sweden, which already had take-back regulations of their own prior to August 2005. The following are recycling firms to which LG Electronics has subscribed:

http://www.lg.com/global/sustainability/environment/take-back-recycling.jsp

If product is shipped to EU counties, it has been marked according to WEEE directive requirement for recycling on the case of handset, the poly bag of accessory and user manual.

LG Electronics operates take-back and recycling program for used products in the countries, not only where local take-back regulation is implemented, but also where the regulation does not exist. Customers are advised to contact the local LG service center for further information.

This product provides the user guide printed with soy ink for reducing emit VOC(Volatile Organic Compounds). To download a copy of C375 user guide, visit www.lg.com

Always unplug the charger from the wall socket after the phone is fully charged.

This avoids unnecessary power consumption of the charger in standby and saves energy.

Electronic devices shall not be thrown into household waste but be separated for correct recycling.

Batteries are collected separately for battery recycling. Do not throw used batteries into household waste.

Please separate the packaging material according to responsible waste disposal options and sorting for recycling for environmentally sound recycling; contact your local LGE service center or check local regulations for correct disposal of household electronics.

See the Recycling collection point table on the LGE Webpage to find the nearest collection point for used mobile phone and accessories.

Further Environmental information is presented in LG Electronics’ Sustainability Report (PDF form), available online at:
