

INVERTER SCROLL CHILLER

WHY LG INVERTER

SCROLL CHILLER

ULTIMATE INVERTER COMPRESSOR

As the core technology of the air conditioning system, the Ultimate Inverter Compressor of MULTI V 5 boasts its ultimate efficiency and durability, designed based on the unique technology and innovation of LG HVAC.

All Inverter

Provide high efficiency with low vibration and low noise

Six By-pass Valves

Prevent compressor damage due to excessively compressed refrigerant more efficiently than 4 by-pass valves

01. Vapor Injection

Wide operating range via two-stage compression

02. Enhanced Bearing with PEEK Material

Newly invented system motivated by PEEK (Polyetheretherketone) bearing used for aero engine to increase operation range and durability

03. Wide Operation Range from 30 to 130 Hz

Improved part load efficiency at all operation ranges

04. HiPOR™ (High Pressure Oil Return)

Resolve compressor efficiency loss caused by oil return

Smart Farm

Small Industry (Process Water)

Hotel / Office

WHY LG INVERTER SCROLL CHILLER

All Inverter Scroll Compressor

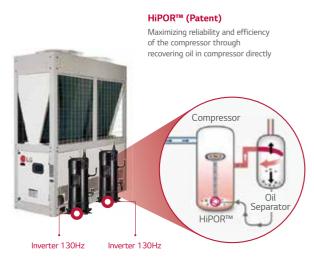

All inverter scroll compressor with HiPOR™ (Patent) is applied to improve full load and part load energy efficiency.

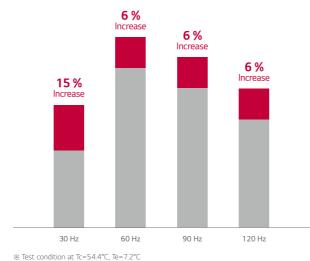

All Inverter System

Wide operation frequency range 30 ~ 130Hz

Compressor Efficiency

Compressor efficiency by Hz is increased through HiPOR™ application

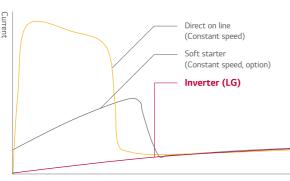

App. Inverter Comp. vs Constant Speed Comp.

Inverter compressor is more stable and efficient solution than Constant speed compressor.

Comparison of starting type

/ Inverter (LG)	
Elaps	ed time

Compressor	Starting type	Starting current (Is / FLA*, %)		
Constant	Direct on line	About 650 %		
speed	Soft starter	200 ~ 350 %		
Inverter (LG)	Inverter	No inrush current		

^{*} FLA : Full load ampere

Inverter's feature & benefits

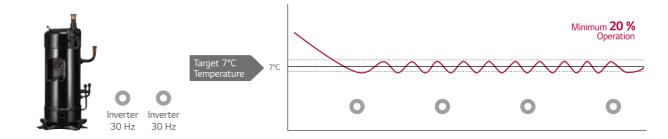

Continuously adjust compressor output according to the load (Compressor 15~125Hz)

⇒ Save energy

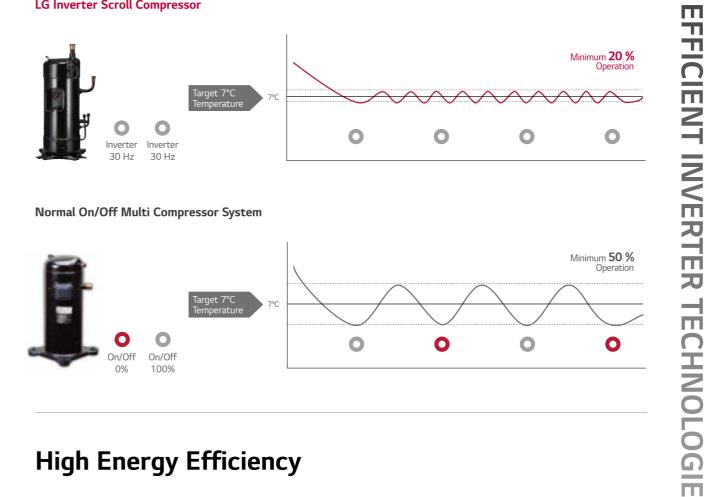

Lower Load Operation

20% part load operation and minimized water outlet temperature haunting with Inverter scroll compressor.

LG Inverter Scroll Compressor

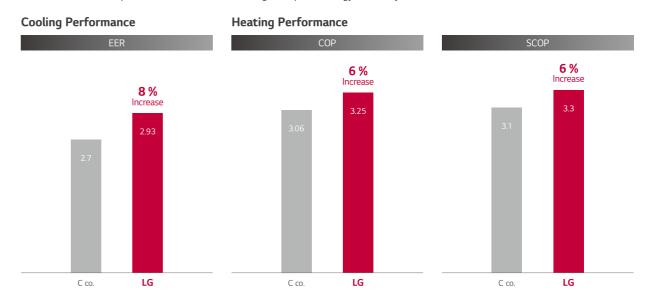

Normal On/Off Multi Compressor System

High Energy Efficiency

All inverter scroll compressors with Multi V technologies improve energy efficiency.

% 65 kW Heat pump model comparison

INVERTER SCROLL CHILLER KEY FEATURES 220 I 221

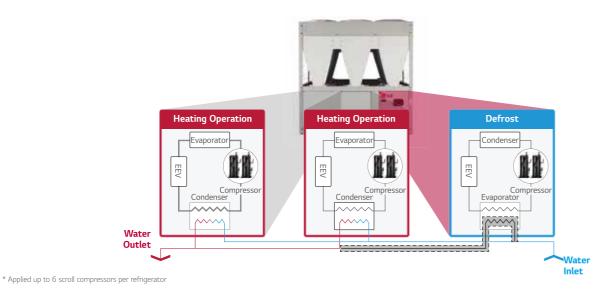

^{**} Power factor : Ratio between active power(kW) and total power(kVA)

RELIABILITY &

Continuous Heating Operation

Continuous heating minimizes the decrease of water outlet temperature during defrosting for multi circuit model.

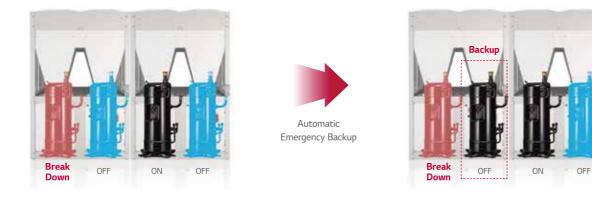

Multi cycle can defrost each cycle individually to supply hot water continuously multi cycle.

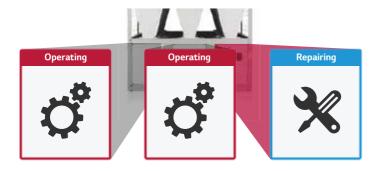

Back Up Operation

If one compressor or one cycle needs to be repaired, backup operation helps the whole system to operate continuously.

All Inverter System

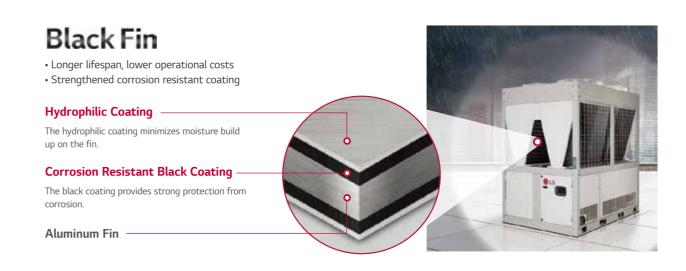

Cycle back up

Corrosion Resistance (Black Fin)

'Black Fin' heat exchanger is highly corrosion resistant, designed to perform in corrosive environments such as contaminated and humid condition.

Black Box Function

Quick service can be done because operation data can be saved for 180 seconds before system failure.

Without Black Box Function

Check many failure causes and error codes in person

ke much service time and undergo trial and error

With Black Box Function

Search for the failure cause conveniently using recorded data

Save service time and diagnose it more accurately

INVERTER SCROLL CHILLER KEY FEATURES

224 I 225

Compact Size

Compact size reduces concern about installation and service space.

Low Noise Level

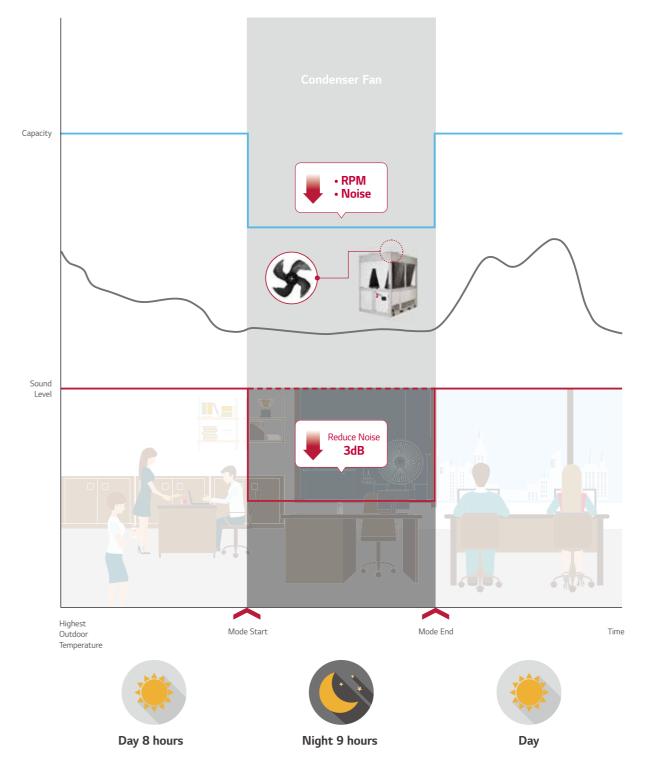

Lower noise can reduce noise pollution and provide a quieter environment.

Noise Comparison

Silent Operation Function (Cooling Mode)

Silent operation function can reduce noise levels at night time by adjusting the fan RPM.

Notes:

1. Due to our policy of innovation some specifications may be changed without prior notification.

2. Capacities and Inputs are based on the following conditions
Cooling: Outdoor air temp. 35°C, Water inlet temp. 12°C, Water Outlet temp. 7°C
Heating: Outdoor air temp. 7°C, Water inlet temp. 40°C, Water Outlet temp. 45°C

3. Sound pressure level is measured on the rated condition in the anechoic rooms by ISO 3745 standard.
Sound power level is measured ISO 9614:2009 by sound intensity method. Therefore, these values can be increased owing to ambient conditions during operation.
