

# LG CLOi Autonomous UV-C Robot

The new LG CLOi Autonomous UV-C Robot is expected to enable a new standard of hygiene for commercial environments by automatically disinfecting high-touch, high-traffic areas. The autonomous robot will move easily around tables, chairs and other objects to irradiate and disinfect touchable surfaces. It will be capable of disinfecting multiple areas on a single battery charge. The new addition of LG's CLOi Family of Robots is engineered to be easy to operate and can be integrated into already established cleaning routines without requiring extensive staff training or specialists for operation.

## PROMOTION:

For all LG CLOi UV-C Robot advanced orders placed before May 31, 2021, you will receive LG White Glove Service at no additional cost. White Glove Service consists of unboxing, initial product set-up, training and removal of packaging.
