TNF5J / TNF3K

Slim & Light

The In-Cell Touch Open Frame has a touch function built into the display, allowing for the implementation of a slim design and a narrow bezel compared to general touch products that require additional touch parts (Film).

Clear Picture Quality

Compared to general touch products, TNF5J implements clear picture quality without milk effects caused by additional touch sensor film parts.

Design Flexibility

By providing integrated parts such as touchscreen, display, and webOS, users can realize free design for their own needs.

Ready for Commercial Uses

All Day Viewing

TNF5J's excellent durability allows for use in kiosks that require a full 24/7 operation. TNF3J's strong 16/7 operation also provides a strong retail alternative.

Wide Viewing Angle

IPS panel technology provides better control of the liquid crystals, which in turn allows the screen to be viewed at virtually any angle.

45-degree Tilt (Face up) Installation Possible

When a display is installed at low places, it is usually tilted for the user's viewing comfort. Considering this, the installation with a max tilt of 45 degrees is supported.

10 Points of Multi-Touch

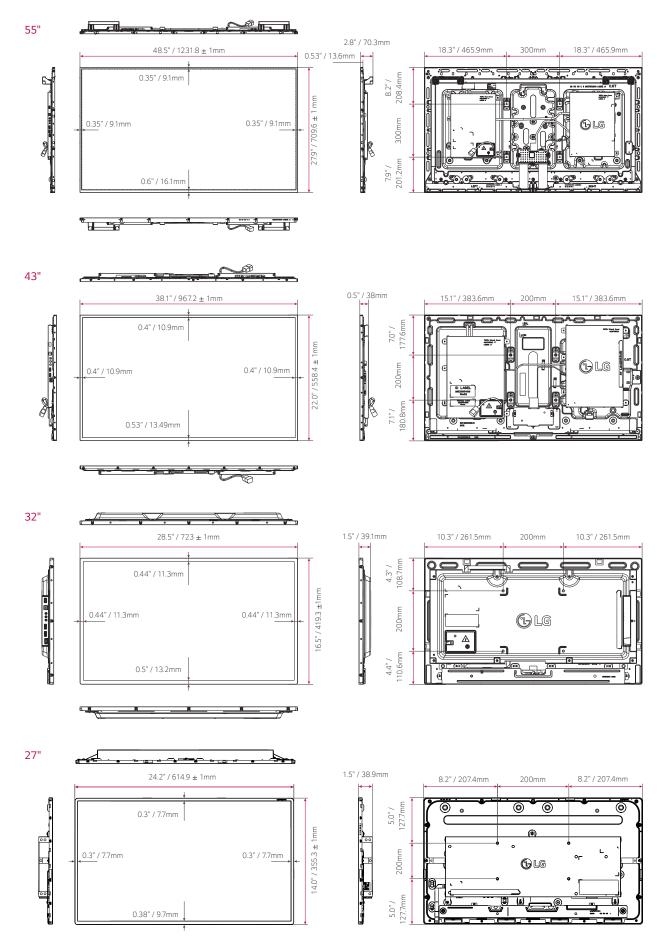

The TNF5J provides a more realistic touch sensation since it can recognize up to 10 points of multi-touch at once, and various touch-based user services can be provided through the screen.

High-Performance with webOS 6.0

webOS 6.0, upgraded in SoC* and web engine, is available on TNF5J for a smooth execution of several tasks. LG webOS smart signage platform enhances user convenience with intuitive GUI** and provides to SI or/and developers simple app development tools such as SDK (Software Development Kit), SCAP, sample applications.

DIMENSIONS

* Dimensions may differ from the above image, so please contact LG sales team to verify before ordering.
