The module can be easily removed using the suction tool (with front or rear selective service access). The positioning pins and magnets help perform panel adjustments accurately and quickly, ensuring seamless screen assembly.

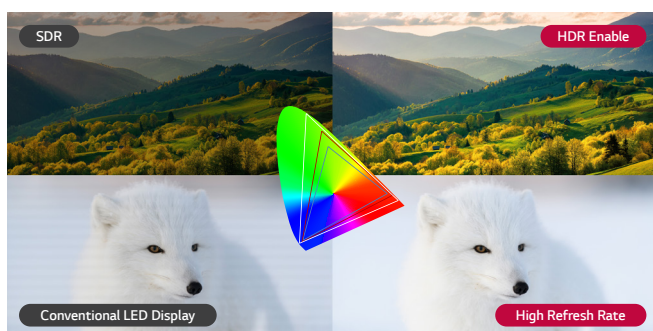

Curve Effect Available

The mechanical connection between the two panels is secured by an angle adapter system and a fast lock, adjustable by 10 degrees in concave areas and 5 degrees in convex areas.

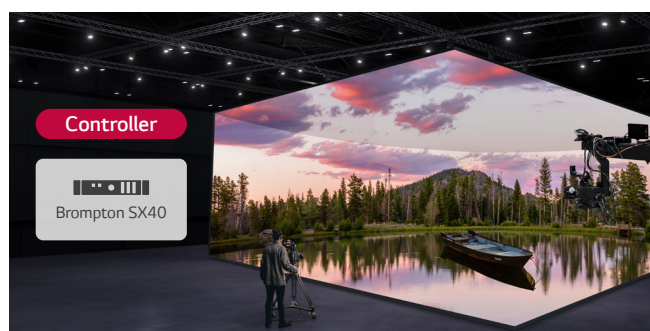

Stacking & Hanging System Available

Installation can be performed by stacking or hanging, using the optional accessories (single, double, triple beams) for customization to the studio environment.

Broadcast Quality Available

Color reproduction as the content creators intended, low latency of video processing, and HDR capability.

Brompton LED Processor & Data Distribution

As Brompton controllers are common in the broadcast and virtual production industry, these series offer support for them.
