INSTALLATION NOTES

- The installation location chosen for the refrigerator should allow space behind the unit for connections and airflow and space in front to open the doors and drawers.
- Too small of a distance from adjacent items may result in lowered freezing capability and increased electricity consumption charges. Allow at least 34 inches (863.6mm) in front of the refrigerator to open the doors, and at least 2 inches (50.8mm) between the back of the refrigerator and the wall.
