#### **DIMENSIONS / CLEARANCES**

#### STACKING OR PEDESTAL INSTALLATION

#### INSTALLATION NOTES

- To ensure sufficient clearance for water lines, the drain line and airflow, allow minimum clearances of at least 1 inch (2.5 cm) at the sides and 4 inches (10 cm) behind the unit. Be sure to allow for wall, door, or floor moldings that may increase the required clearances.
- Install the washing machine on a solid floor that is strong and rigid enough to support the weight of the washing machine, even when fully loaded, without flexing or bouncing. If the floor has too much flex, you may need to reinforce it to make it more rigid. If the floor is not solid, it may cause severe vibration and noise.
- If installing with an optional pedestal or SideKick<sup>™</sup>, refer to the instructions packaged with pedestals for dimensions and clearances.

\*Adjusted by sensor except during Speed Wash
