Some of contents in this manual may differ from your phone depending on the software of the phone or your service provider.
1. WHAT THIS WARRANTY COVERS:

LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

1. The limited warranty for the product extends for TWELVE (12) MONTHS beginning on the date of purchase of the product with valid proof of purchase, or absent valid proof of purchase, FIFTEEN (15) MONTHS from date of manufacture as determined by the unit’s manufacture date code.

2. The limited warranty extends only to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.

3. This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S, including Alaska, Hawaii, U.S. Territories and Canada.

4. The external housing and cosmetic parts shall be free of defects at the time of shipment and, therefore, shall not be covered under these limited warranty terms.

5. Upon request from LG, the consumer must provide information to reasonably prove the date of purchase.

6. The customer shall bear the cost of shipping the product to the Customer Service Department of LG. LG shall bear the cost of shipping the product back to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

1. Defects or damages resulting from use of the product in other than its normal and customary manner.

2. Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized connections, unauthorized repair, misuse, neglect, abuse, accident, alteration, improper installation, or other acts which are not the fault of LG, including damage caused by shipping, blown fuses, spills of food or liquid.

3. Breakage or damage to antennas unless caused directly by defects in material or workmanship.

4. That the Customer Service Department at LG was not notified by consumer of the alleged defect or malfunction of the product during the applicable limited warranty period.

5. Products which have had the serial number removed or made illegible.

6. This limited warranty is in lieu of all other warranties, express or implied either in fact or by operations of law, statutory or otherwise, including, but not limited to any implied warranty of marketability or fitness for a particular use.

7. Damage resulting from use of non-LG approved accessories.

8. All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.
10. Products used or obtained in a rental program.
11. Consumables (such as fuses).

3. STATE LAW RIGHTS:

No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY, IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY HEREIN. LG INFOCOMM INC. SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY APPLICABLE TO THIS PRODUCT.

Some states do not allow the exclusive of limitation of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

4. HOW TO GET WARRANTY SERVICE:

To obtain warranty service, please call or fax to the following telephone numbers from anywhere in the continental United States:

Tel. 1-800-793-8896 or Fax. 1-800-448-4026

Or visit www.lgeservice.com. Correspondence may also be mailed to:

LG Electronics MobileComm U.S.A., Inc.
201 James Record Road Huntsville, AL 35824

DO NOT RETURN YOUR PRODUCT TO THE ABOVE ADDRESS. Please call or write for the location of the LG authorized service center nearest you and for the procedures for obtaining warranty claims.

User Guide
For Your Safety

Important Information

This user guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment.

Before You Start

Safety Instructions

WARNING! To reduce the possibility of electric shock, do not expose your phone to high humidity areas, such as the bathroom, swimming pool, etc.

Always store your phone away from heat. Never store your phone in settings that may expose it to temperatures less than 32°F or greater than 104°F, such as outside during extreme weather conditions or in your car on a hot day. Exposure to excessive cold or heat will result in malfunction, damage and/or catastrophic failure.

Be careful when using your phone near other electronic devices. RF emissions from your mobile phone may affect nearby in adequately shielded electronic equipment. You should consult with manufacturers of any personal medical devices such as pacemakers and hearing aides to determine if they are susceptible to interference from your mobile phone.

Turn off your phone in a medical facility or at a gas station. Never place your phone in a microwave oven as this will cause the battery to explode.

IMPORTANT! Please read the TIA SAFETY INFORMATION on page 78 before using your phone.

Safety Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

▶ Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.

▶ Never place your phone in a microwave oven as it will cause the battery to explode.

▶ Do not dispose of your battery by fire or with hazardous or flammable materials.

▶ Make sure that no sharp-edged items come into contact with the battery. There is a risk of this causing a fire.

▶ Store the battery in a place out of reach of children.

▶ Be careful that children do not swallow any parts such as rubber plugs (earphone, connection parts of the phone, etc.). This could cause asphyxiation or suffocation.
Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is activated, you may be seriously injured.

Do not use a hand-held phone while driving.

Do not use the phone in areas where its use is prohibited. (For example: aircraft).

Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.

Never store your phone in temperatures less than -4°F or greater than 122°F.

Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of this causing a fire.

Do not drop, strike, or shake your phone severely. Such actions may harm the internal circuit boards of the phone.

Do not use your phone in high explosive areas as the phone may generate sparks.

Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause a fire or electric shock.

Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause fire or electric shock.

Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

Do not disassemble the phone.

Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

Only use the batteries, antennas, and chargers provided by LG. The warranty will not be applied to products provided by other suppliers.

Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.

Do not hold or let the antenna come in contact with your body during a call.

An emergency call can be made only within a service area. For an emergency call, make sure that you are within a service area and that the phone is turned on.
For Your Safety

FCC RF Exposure Information

WARNING! Read this information before operating the phone.
In August 1996, the Federal Communications (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.
The design of this phone complies with the FCC guidelines and these international standards.

CAUTION
Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations with the back of the phone kept 0.6 inches (1.5cm) between the user’s body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.6 inches (1.5cm) must be maintained between the user’s body and the back of the phone. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.6 inches (1.5cm) separation distance between the user’s body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.
Vehicle Mounted External Antenna (optional, if available)
A minimum separation distance of 8 inches (20cm) must be maintained between the user/bystander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements. For more information about RF exposure, visit the FCC website at www.fcc.gov

FCC Part 15 Class B Compliance
This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

Cautions for Battery
▶ Do not disassemble.
▶ Do not short-circuit.
▶ Do not expose to high temperature: 60°C (140°F).
▶ Do not incinerate.

Battery Disposal
▶ Please dispose of your battery properly or bring to your local wireless carrier for recycling.
▶ Do not dispose in fire or with hazardous or flammable materials.

Adapter (Charger) Cautions
▶ Using the wrong battery charger could damage your phone and void your warranty.
▶ The adapter or battery charger is intended for indoor use only.
Do not expose the adapter or battery charger to direct sunlight or use it in places with high humidity, such as the bathroom.
Phone Components

11. Confirmation key
12. Right soft key
13. Message key
14. Camera key
15. End/Power key
16. Clear key
Your Phone’s Features

1. Earpiece

2, 12. Left soft key/Right soft key: Each of these keys perform the functions indicated by the text on the display immediately above them.

3. PTT key: Use for quick access to the PTT function.
   - Pressing and releasing this key while idle displays your PTT contacts.
   - Pressing and holding this key while idle displays your PTT history.
   - Pressing and holding this key while in a PTT call allows you to speak to the other call participants.

4. Side keys: These keys are used to control the volume of ringtone in standby mode and speaker volume during a call.

5. Send key: You can dial a phone number and answer incoming calls. Press this key in standby mode to quickly access the most recent incoming, outgoing and missed calls.

6. Alphanumeric keys: These keys are used to dial a number in standby mode and to enter number or characters in edit mode.

7. Microphone: Can be muted during a call for privacy.

8. Active flip: Open the flip to answer an incoming call and close to end the call.

9. Display screen: Displays phone status icons, menu items, web information, pictures and more in full color.

11. Confirmation key: Short press will launch the WAP browser. Allows you to select and confirm menu options.

13. Message key: Use to retrieve or send text messages.

14. Camera key: Press this key to use the camera feature. Directly goes to the camera mode.

15. End/Power key: Allows you to power the phone on or off, end calls, or return to Standby Mode.

16. Clear key: Allows you to delete the characters entered or return you to the previous screen.
Backlight
A backlight illuminates the display and the keypad. When you press any key or open the folder, the backlight turns on. It turns off if no key is pressed within a given period of time, depending on the Backlight Timer menu option. After 30 seconds, the display turns off to conserve your battery power. To specify the length of time the backlight is active, set the Backlight Timer menu option (Menu 9.2.2).

External Display
Your phone has an external display on the cover. It indicates when you have an incoming call or a message. It also alerts you at the specified time when you set an alarm by turning on its backlight and showing corresponding icon on it.

</tbody>
</table>
Getting Started

Installing the SmartChip

When you subscribe to a cellular network, you are provided with a plug-in SmartChip loaded with your subscription details, such as your PIN, any optional services available and many others.

⚠️ Important!
The plug-in SmartChip and its contacts can be easily damaged by scratches or bending, so be careful when handling, inserting or removing the card. Keep all SmartChips out of the reach of small children.

1. If necessary, switch off the phone by holding down the key until the power-off image displays.

2. Remove the battery. To do so:
   ① Pull and hold the battery lock above the battery toward the top of the phone.
   ② Lift the battery away, as shown.
3. Slide the SmartChip into the SmartChip socket so that it locks the card into place. Make sure that the notched corner is bottom left and the gold contacts of the card face into the phone.

⚠️ Note
When you need to remove the SmartChip, slide it, as shown, and take it out of the socket.

4. To insert the battery, align the golden contacts of the battery with the corresponding connectors on the battery compartment. Press down on the opposite end of the battery until it snaps into place.

5. Attach back cover by sliding up into position until it clicks.
Getting Started

Charging the Battery

Use of unauthorized accessories could damage your phone and void your warranty.

To use the travel charger provided with your phone:

1. With the battery in position on the phone, connect the lead from the travel charger to the bottom of the phone. Check that the arrow on the lead connector is facing towards the front of the phone.

2. Connect the travel charger to a standard AC wall outlet. Only use the travel charger that comes included with the package.

⚠️ Warning

The travel charger must be unplugged before you remove the battery, otherwise, the phone could be damaged.

3. When charging is finished, disconnect the travel charger from the phone by pressing on the gray tabs on both sides of the connector while pulling the connector out.

⚠️ Notice

- If your phone is powered on while charging, you’ll see the bars in the battery indicator icon cycle. When the battery is fully charged, the bars in the battery indicator icon will flash on and off.
If the battery fails to charge completely:

- After turning the phone on and off, please attempt to recharge the battery.
- After detaching and reattaching the battery, please attempt to recharge the battery.

Turning Your Phone On and Off

1. Press the [END] key to switch on the phone.
2. If the phone asks for a PIN, enter the PIN and press the [OK] key.

The phone searches for your network and after finding it goes to the idle screen as illustrated below. From the idle screen, you can make or receive a call.

Note

The display language is preset to Automatic at the factory. To change the language, use the Languages menu option (Menu 9.2.4).

3. When you wish to switch the phone off, hold down the [END] key until the power-off image displays.

Access Codes

You can use the access codes described in this section to avoid unauthorized use of your phone. The access codes can be changed by using the Change Codes feature (Menu 9.6.3).

Security code (4 digits)

The security code protects the unauthorized use of your phone. The default security code is set to ‘0000’ and the security code is required to delete all phone entries and to activate the Restore Factory Settings menu. The security code default setting can be modified from the Security Settings menu.
General Functions

Making a Call

1. Make sure your phone is powered on.
2. Enter a phone number including the area code. To edit a number on the display screen, simply press the key to erase one digit at a time.
   - Press and hold the key to erase the entire number.
3. Press the [SEND] key to call the number.

Making a Call by Send Key

1. Press the [SEND] key, and the most recent incoming, outgoing and missed phone numbers will be displayed.
2. Select the desired number by using the navigation key.
3. Press the [SEND] key.

Making International Calls

1. Press and hold the [02] key and the international access character ‘+’ will appear.
2. Enter the country code, area code, and the phone number.
3. Press the [SEND] key.

Ending a Call

When you have finished a call, press the [END] key.

Making a Call From the Contacts

You can store names and phone numbers dialed frequently in the SmartChip as well as in the phone memory known as the Contacts.

You can dial a number by simply selecting a name in the contacts and pressing the [SEND] key.
**Adjusting the Volume**

During a call, if you want to adjust the earpiece volume, use the side keys of the phone. In idle mode, you can adjust the ring volume using the side keys.

**Answering a Call**

When you receive a call, the phone rings and the flashing phone icon appears on the screen. If the caller can be identified, the caller’s phone number (or name if stored in your Address Book) is displayed.

1. Open the Flip and press the [SEND] key or the left soft key to answer an incoming call. If Any Key has been set as the answer mode (Menu 9.5.2), any key press will answer a call except for the [END] key or the right soft key.

**Notice**
- To reject an incoming call, press and hold the side keys on the left side of the phone.
- If Flip Open has been set as the Answer Mode (Menu 9.5.2), you do not need to press any key. You can answer the call simply by opening the flip.

2. End the call by closing the phone or pressing the [END] key.

**Notice**
You can answer a call while using the Address Book or other menu features.

**Using the Speakerphone**

You can use the speakerphone during a call by pressing the [speakerphone] key located on the top of the phone. The loudspeaker is automatically deactivated when you end the call.

**Warning**
Due to higher volume levels, don’t place the phone near your ear while the speakerphone is enabled.

**Vibrate Mode (Quick)**

Vibrate Mode can be activated by pressing and holding down the [Star] key.

**Signal Strength**

If you are inside a building, being near a window may give you better reception. You can see the strength of your signal by the signal indicator on your phone’s display screen.
General Functions

**Entering Text**

You can enter alphanumeric characters by using the phone’s keypad. For example, storing names in the Address Book, writing a message, or creating scheduling events in the calendar all require entering text.

The following text input methods are available in the phone.

**T9 Mode**

This mode allows you to enter words with only one keystroke per letter. Each key on the keypad has more than one letter. The T9 mode automatically compares your keystrokes with an internal linguistic dictionary to determine the correct word, thus requiring far fewer keystrokes than the traditional ABC mode.

**ABC Mode**

This mode allows you to enter letters by pressing the key labeled with the required letter once, twice, three or four times until the letter is displayed.

**123 Mode (Numbers Mode)**

Type numbers using one keystroke per number.

To change to 123 mode in a text entry field, press key until 123 mode is displayed.

A long press changes mode to 123.

**Symbolic Mode**

This mode allows you to enter special characters.

**Notice**

You can select a different T9 language from the menu option. The default setting on the phone is T9 disabled mode.

**Changing the Text Input Mode**

Change the text input mode by pressing . You can check the current text input mode in the upper right corner of the screen.

**Using the T9 Mode**

The T9 predictive text input mode allows you to enter words easily with a minimum number of key presses. As you press each key, the phone begins to display the characters that it thinks you are typing based on a built-in dictionary. As new letters are added, the word changes to reflect the most likely candidate from the dictionary.
1. When you are in the T9 predictive text input mode, start entering a word by pressing keys 2-9 to *. Press one key per letter.
   - The word changes as letters are typed - ignore what’s on the screen until the word is typed completely.
   - If the word is still incorrect after typing completely, press the up/down navigation keys once or more to cycle through the other word options.
   - If the desired word is missing from the word choices list, add it by using the abc/ABC mode.
2. Enter the whole word before editing or deleting any keystrokes.
3. Complete each word with a space by pressing the space key or the right navigation key.
   To delete letters, press * . Press and hold down * to erase the letters continuously. Continue holding to erase entire words.

**Using the ABC Mode**
Use the keypad keys to enter your text.
1. Press the key labeled with the required letter:

   - Once for the first letter
   - Twice for the second letter
   - And so on

2. To insert a space, press the space key once. To delete letters, press the space key. Press and hold down the space key to erase the letters continuously.

**Notice**
Refer to the table below for more information on the characters available using the keys.
General Functions

Using the 123 (Numbers) Mode
The 123 Mode enables you to enter numbers in a text message (a telephone number, for example) more quickly.

Press the keys corresponding to the required digits before manually switching back to the appropriate text entry mode.

Using the Symbol Mode
The Symbol Mode enables you to enter various symbols or special characters.

To enter a symbol, press the [Star] key. Use the navigation keys to select the desired symbol and press the [OK] key.
Selecting Functions and Options

Your phone offers a set of functions that allow you to customize the phone. These functions are arranged in menus and sub-menus, accessed via the two soft keys marked the left soft key and the right soft key. Each menu and sub-menu allows you to view and alter the settings of a particular function.

The soft key functions vary depending on the mode of the phone. The label on the bottom of the display screen immediately above the soft keys indicates current function.

Press the left soft key to access the available Menu.

Press the right soft key to access the available Names.

Short press will launch the WAP browser (in standby mode). Short press allows you to select and confirm menu options.
In-Call Menu

Your phone provides a number of control functions that you can use during a call. To access these functions during a call, press the right soft key [Options].

During a Call

The menu displayed on the handset screen during a call is different than the default main menu displayed when in idle screen, and the options are described below.

Making a Second Call

You can select a number you wish to dial from the Address Book to make a second call. Press the right soft key then select Contacts.

Swapping Between Two Calls

To switch between two calls, press the right soft key or the [SEND] key, and then select Swap.

Answering an Incoming Call

To answer an incoming call when the handset is ringing, simply press the [SEND] key. The handset is also able to warn you of an incoming call while you are already on a call. A tone sounds in the earpiece, and the display will show that a second call is waiting. This feature, known as Call Waiting, is only available if your network supports it.

If Call Waiting is on, you can put the first call on hold and answer the second call, by pressing the [SEND] key.

Rejecting an Incoming Call

You can reject an incoming call without answering by simply pressing the [END] key.

During a call, you can reject an incoming call by pressing the [END] key.

Muting the Microphone

You can mute the microphone during a call by pressing the [Options] key then selecting Mute or the left soft key [Mute]. The handset can be unmuted by pressing the Unmute menu or the left soft key [Unmute]. When the handset is muted, the caller cannot hear you, but you can still hear the caller.
Conference Calls

The conference service provides you with the ability to have a simultaneous conversation with more than one caller. The conference call feature can be used only if your network service provider supports this feature. The conference call can only be set up when you have one call active and one call on hold, meaning both calls must have been answered. Once a conference call is set up, calls may be added, disconnected or separated (that is, removed from the conference call but still connected to you) by the person who set up the conference call. These options are all available from the In-Call menu. The maximum number of callers in a conference call is five. Once started, you are in control of the conference call, and only you can add calls to the conference call.

Making a Second Call

You can make a second call while currently on a call simply by entering the second number and pressing the [SEND] key. When the second call is connected, the first call is automatically placed on hold. You can swap between calls, by pressing the [SEND] key.

Setting Up a Conference Call

To set up a conference call, place one call on hold, conference in the second active call by pressing the right soft key and select the Join Calls sub menu option from the Conference Call menu.

Activate the Conference Call on Hold

To activate a conference call on hold, press the [SEND] key.

Adding Calls to the Conference Call

To add a call to an existing conference call, press the right soft key, and then select the Join Calls sub menu from the Conference Call option.

Private Call in a Conference Call

To have a private call with one caller from a conference call, press the right soft key and select the Private Menu from the Conference Call option. When the numbers of the callers are displayed, select the one you wish to speak in private.

Ending a Conference Call

Currently active conference call can be disconnected by pressing the [END] key.
The following illustration shows the available menu structure and indicates the:

- Number assigned to each menu option.
- Page where you can find the feature description.

1. **IM (see page 32)**

2. **Messaging (see page 36)**

The Instant Messaging feature can only be used with the support of the network operator or communities such as AIM, ICQ, and YAHOO! Messenger. For Instant Messaging users, a valid User ID and Password will be required in order to login and exchange messages as well as checking the online status.

There are two ways to use the Instant Messaging feature.

1. Through the Main Menu.

2. Through the IM hotkey (the right navigation key).
   Short pressing the hotkey will bring up the available IM clients. The menu items below might not appear since not all IM communities support the various options. Also the menu strings may appear differently based on the selected IM communities. The keywords such as User ID, Login and Contact will be used as general terms in IM menus according to the currently selected communities such as AIM, ICQ and YAHOO! Messenger.

**Offline Menu**

**Sign In**
This allows users to login by filling in the User ID and Password.

⚠️ **Note**
If your phone number is not registered on SmartChip, you would not be able to log into the IM client
You can check your phone number in My Numbers menu (Menu 8.8.3)

⚠️ **Note**
Once the User ID and Password are saved, you will not be required to type them in again during Login process. This feature is optional.

**Saved Conversations**
This is where a user can view saved conversations.

**Settings**

- **My Status:** Allows you to set your status to Available, Busy or Invisible.
- **Status Text:** You may set your current status in free text format.
- **Set Sound:** Allows you to set an alert for the Contact when they have activity on their session.
- **Default Provider:** Allows you to set the default IM community to login.
**Automatic Sign On:** You may set the automatic IM Login process by choosing between the 'When Power On' or 'When IM Start' options.

**Network:** You may set your IM Network Profiles or Server Address information. Please check with your network provider before making any changes.

**IM Information**
This indicates the Instant Messaging Client Information such as Client Name and Version Number.

**Online Menu / 1 to 1 conversation**
After successful Login, a list of contacts with Screen Names will appear on screen. Depending on the cursor location in the contacts, following menu options will be available.

**When cursor is located on a Conversations List**

**Note**
Conversations List contains both the active contact where a conversation has taken place as well as unknown contact.

**Note**
When you select the left/right navigation key or the Confirm key on the Conversation List, it offers the ability to view or hide conversations.

**Send to Others:** This offers the ability to send a message to an unknown contact. When selected, User ID must be typed in prior to starting an IM session or conversation.

**Saved Conversations:** You may view or delete the stored conversation session.

**Search:** This allows you to search for the contact by Email address or name.

**Settings**
- **My Status:** Allows you to set your status to Available, Busy or Invisible.
- **Status Text:** You may set your current status in free text format.
- **Set Sound:** Allows you to set an alert for the Contact when they have activity on their session.
- **Automatic Sign On:** You may Login to an IM client automatically with the 'When Power On' or 'When IM Start' options.
IM

Log Out: This begins the Logout process.

When cursor is located on a Conversation

End Conversation: This closes the selected conversation. If an unknown contact was selected, that contact is deleted.

Block/Unblock Contact: This allows you to block/unblock the selected Conversations Contact.

View Information: This allows you to view the User ID and Status Text information.

Search: This allows you to search for the contact by Email address or name.

Settings: Please refer to the previous Settings Menu.

Log Out: This begins the Logout process.

When cursor is located on a Contact List

Add Contact: This adds a new contact to the selected contacts list; in the meantime this searches for the contact on the basis of E-mail Address, First Name, or Last Name.

Refresh List: This refreshes the presence information of the contacts within the contacts.

Send to Others: This offers the ability to send a message to an unknown contact. When selected, the User ID must be typed in prior to starting an IM session or conversation.

Saved Conversations: This is where a user can view saved conversations.

Search: This allows you to search for the contact by Email address or name.

Settings: Please refer to the previous Settings Menu.

Log Out: This begins the Logout process.

When cursor is located on a Contact

Add Contact: This adds a new contact to the selected contacts list; in the meantime this searches for the contact on the basis of E-mail Address, First Name, or Last Name.

Delete Contact: This deletes the selected Contact.

Set/Clear Alert: When the user sets this contact as “Set Alert”, if presence information of the selected contact is changed to online from offline afterwards, it alerts as the icon and sound. This option will be shown if your network provider supports this service.
Block/Unblock Contact: This allows or blocks conversation with the selected Contact.

Refresh Contact: This refreshes the presence information of the selected contact.

View Information: This allows you to view information. It provides User ID, Status Text.

Search: This allows you to search for the contact by Email address or name.

Settings: Please refer to the previous Settings Menu.

Log Out: This begins the Logout process.

Menu options available in the Conversation screen

Back To List: This brings the screen back to the contacts.

Insert: You can insert Symbol, Template and emoticons in the conversation screen.

Block/Unblock Contact: This allows or blocks conversation with the selected Contact.

Save Conversation: Stores currently active conversation.

End Conversation: This ends the active conversation and clears the conversation buffer.

Settings: Please refer to the previous Settings Menu.

Text Entry Mode: Sets the text input mode such as abc, Abc, ABC, T9 abc, T9 Abc, T9 ABC and 123.

Text Entry Mode Settings: This selects the T9 predictive mode Language.

Note

- In the conversation window, you can use the up/down navigation key for scrolling through the conversation.
- Maximum number of characters supported by a message is 400 characters for receiving and 128 characters for sending.
- The presence information might not update in real time so the “Refresh List”/“Refresh Contact” option can be used for most up to date status.
New Message

Text (Menu 2.1.1)

You can write and edit text messages of up to 918 characters.

1. Type in a message using key presses. For details on how to enter text, refer to page 22 (Entering Text).

2. After completing the message select the required option by pressing the right soft key [Options].

The following options are available.

- **Insert**
  - **Symbol**: Attach special characters.
  - **Picture**: Send and receive text messages that contain pictures, known as Enhanced Messaging Service. Several preset pictures are available in the phone and they can be replaced with new ones received from other sources.
  - **Animation**: Attaching an animation in a message can be done through EMS (Enhanced Messaging Service).
  - **Audio**: Attach sounds that are available for short message.

- **Text Templates**: Use the text templates already set in the phone.
- **Contact**: Attach a phone number.
- **Business Card**: Attach your name card.
- **Save to Drafts**: Save the message so that it can be sent later.
- **Set T9**: Choose between English or Spanish T9 language. For details on how to enter text, refer to page 22 (Using the T9 Mode).
- **Clear Text**: Deletes the written message.
- **Cancel**: Exit the text editor.

Press the left soft key [Send To].

- **Send To**: Enter the phone number or select the number from the address book.

Multimedia (Menu 2.1.2)

You can write and edit multimedia messages, checking message size.

You can create a new message or choose one of the multimedia message templates already made.
Press the left soft key [Send To].

► Send To: You can send multimedia messages to multiple recipients, prioritize your message, and make it sent later as well.

The following options are available.

► Insert: Symbol, Graphic, Audio, New Slide, Text Templates, Contact or Business card.

► Preview: You can preview multimedia messages you wrote.

► Save: You can save multimedia messages To Drafts or As Template.

► Delete Slide: You can delete current slide.

► Set Timer: You can set timer for slide, text, picture and sound.

► Set T9: Select a T9 input mode.

► Cancel: You can back to the Message menu.

⚠️ Note

If you select the photo on writing multimedia message, loading duration will take about 5 seconds. At that time, you can’t activate any key during loading time. After that time, it is available to write multimedia message.

Inbox

You will be alerted when you receive a message. They will be stored in the Inbox.

In the Inbox, you can identify each message by icons. If you are notified that you have received a multimedia message, you can download the whole multimedia message by selecting it in the Receive menu.

The following [Options] are available in the Inbox list.

► Delete: You can delete the current message.

► Forward: You can forward the selected message to another party.

► Extract: Extract picture, audio, text webpage and email address from the message.

► Return Call: Call back the sender.

Drafts

You can view the messages saved as a draft.

The following [Options] are available.

► Delete: Deletes the message you choose.

► Delete All: Deletes all messages in the folder.
Outbox  

Outbox is a temporary storage place for messages waiting to be sent.

When you press the [SEND] key, the message moves to the Outbox and from there the message is sent.

If the message fails to be sent from the Outbox, you will receive a sound alert along with a Message Sending Fail notice on the screen. Another attempt will be made to send the failed message and after two unsuccessful attempts, the message will no longer be sent automatically. In order to send the message that has failed, you must press Resend.

After the maximum number of Send attempts has been reached the Send function has failed.

If you were trying to send a text message, open the message and check that the Sending options are correct.

When the message Send has failed, the following [options] are available.

- **Delete**: Deletes the selected message which has been failed to send.
- **Edit**: You can edit a selected message.

Delete All: Deletes all messages which have been failed to send.

Sent  

This is where you can view the lists and contents of sent messages and also verify if transmission was successful.

- **Forward**: Forwards the current message to other recipients.
- **Delete**: Deletes the selected message from the Sent list.
- **Delete All**: Deletes all messages from the Sent list.

IM  

Instant Messaging feature can only be used with the support of the network operator or communities. For Instant Messaging users, a valid User ID and Password will be required in order to login and exchange messages as well as checking the online status. For further details, see page 32.
**Voice Mail**  
*Menu 2.7*

This menu provides you with a quick way of accessing your voice mailbox (if provided by your network).

Before using this feature, you must enter the voice server number obtained from your service provider. This may already be available; to check the voicemail, press and hold the key.

When new voicemail is received, the symbol will be displayed on the screen.

**Chat**  
*Menu 2.8*

This menu option connects to Cingular’s chat site.

**Templates**  
*Menu 2.9*

There are 6 predefined messages in the list. You can view and edit the template messages or create new messages.

**Text**  
*Menu 2.9.1*

- Please call me back
- Where are you now?
- Urgent! Please contact.
- I’m late. I will be there at
- I’m on the way.
- I love you

The following options are available.

- **Edit**: You can edit the selected template message.

- **Send via**
  - **Text**: Sends the selected template message by SMS.
  - **Multimedia**: Sends the selected template message by MMS.

- **Delete**: Allows you to delete the selected template message.

**Multimedia**  
*Menu 2.9.2*

For further details, see page 36.

**Business Card**  
*Menu 2.9.3*

This option allows you to make your own name card. Key in the Name, Mobile number, Office number, Fax number and E-mail address.

- **Send Via**
  - **Text**: Sends the selected name card by SMS.
  - **Multimedia**: Sends the selected name card by MMS.

- **Delete**: Allows you to delete the selected name card.
Messaging

**Settings (Menu 2.0)**

**Text Message (Menu 2.0.1)**

- **Message Center Number**: If you want to send the text message, you can receive the address of the SMS center through this menu.
- **Email Gateway**: You can send the text message to an Email Address via this gateway.
- **Subject**: If you set it to on, allows you to enter the subject.
- **Bearer Setting**: You can select GPRS or GSM. Contact your network operator or service provider for information related to setting a selected bearer, pricing and connection speed.

**Multimedia Message (Menu 2.0.2)**

Via this menu, you can set up default multimedia message information. The following options are available:

- **Subject**: Enter the message title.
- **Slide Duration**: Display the duration of each page when writing the message.

- **Priority**: You can set the priority of the message you choose.
- **Validity Period**: This network service allows you to set how long your multimedia messages will be stored at the message center.
- **Delivery Reports**: If it is set to Yes in this menu, you can check whether your message is sent successfully.
- **Read Receipts**: This menu allows you to determine whether to request a read confirmation mail to a recipient.

**Auto Download**

- **On**: You can always receive multimedia messages automatically.
- **Off**: You receive only notification messages in the inbox and then you can check the notifications.

**Network Profile**: For further details, see page 45.
Voicemail Number *(Menu 2.0.3)*
This menu allows you to get the voice mail if this feature is supported by the network service provider. Please check with your network service provider for details of their service in order to configure the handset accordingly.

Download Messages *(Menu 2.0.4)*
You can set the Service option to determine whether you will receive the service messages or not.
You can set the Automatic Download option to determine whether you will automatically connect to the service or not.

► Receive: You can set the option whether you will receive the message or not.

Check Memory *(Menu 2.*)*
You can check the current memory status of each memory for Text and Multimedia.
You can check the record of missed, received, and dialed calls only if the network supports the Calling Line Identification (CLI) within the service area. The number and name (if available) are displayed together with the date and time of the call. You can also view call times.

**Missed Calls**  
- View the number, if available, and call it or save it in the Address Book  
- Enter a new name for the number and save both in the Address Book  
- Send a message by this number  
- Delete the call from the list

**Received Calls**  
- View the number, if available, and call it or save it in the Address Book  
- Enter a new name for the number and save both in the Address Book  
- Send a message by this number  
- Delete the call from the list

**Dialed Calls**  
- View the number, if available, and call it or save it in the Address Book  
- Enter new name for the number and save both in the Address Book  
- Send a message by this number  
- Delete the call from the list

**Delete Recent Calls**  
Allows you to delete Missed, Received and Dialed call lists. You can delete all call lists at one time.

**Call Duration**  
This allows you to view the duration of the incoming and outgoing calls. You can also reset the call times. The following timers are available:

- **Last Call** *(Menu 3.5.1)*  
  Length of the last call.

- **Dialed Calls** *(Menu 3.5.2)*  
  Length of the outgoing calls.
**Received Calls** *(Menu 3.5.3)*
Length of the incoming calls.

**All Calls** *(Menu 3.5.4)*
Total length of all calls made and incoming calls received since the timer was last reset.

**Data Information** *(Menu 3.6)*
You can check the amount of data transferred over the network through the GPRS (General Packet Radio Service) information option. In addition, you can also view how much time you are online.

**Web Data** *(Menu 3.6.1)*
You can check the data volume and the duration through WAP.

**Data Call** *(Menu 3.6.2)*
You can check the data volume and the duration through GPRS by using an external device such as a serial port.

**Total Data** *(Menu 3.6.3)*
You can check the total amount of data through WAP and an external device.
You can access various WAP (Wireless Application Protocol) / Web services such as news, and weather. These services are specially designed for mobile phones and they are maintained by the service providers.

⚠️ Note
Check the availability of WAP services, pricing and tariffs with your network operator and/or the service provider whose service you wish to use. Service providers will also give you instructions on how to use their services. Please contact your service provider to open an Internet account.

To launch the browser in standby mode, press the  key.

Once connected, the homepage is displayed. The content depends on the service provider.

To exit the browser at any time, press the  [END] key. The idle screen is displayed.

**Menus for the Browser**
You can surf the Internet using either the phone keys or the WAP Browser menu.

<table>
<thead>
<tr>
<th>Key Description</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>up/down navigation key</td>
<td>Scroll each line of the content area</td>
</tr>
</tbody>
</table>

**Using the Navigation Keys**
When surfing the Internet, the keys function differently than when in the phone mode.

**Using the WAP Browser Menu**
There are various menus available when surfing the Internet.

**MEdia Net Home**
Connect to Cingular’s homepage. The homepage is defined in the activated account and cannot be changed.

**Favorites**
This function allows you to store and edit frequently accessed sites. The following [Options] are available.

⚠️ Note
Your phone may have some pre-installed bookmarks for sites not affiliated with LG. LG does not warrant or endorse these sites. If you choose to access them, you should take the same precautions for security or content as you would with any site.
Options in the Favorites view

- **View**: Display the bookmark title and URL.
- **Delete**: Allow you to erase the selected bookmark.
- **Edit**: Modify the existing bookmark item.
- **Move to Folder**: Move the Favorite to other folder.
- **New Favorite**: Create new Favorite in current folder.
- **New Folder**: Create new sub-folder.
- **Send URL**: Allows the bookmark information to be sent via SMS to another person.
- **Delete All**: Allows you to erase all bookmarks.

**Go To URL**  
Menu 4.3

You can directly connect to the site you want by entering a specific URL.

**Network Profile**  
Menu 4.4

A Profile is the network information used to connect to the internet. Cingular supports three kinds of profiles: MEdia Net, Home and Roam. MEdia Net is used to connect to the internet using GPRS, Home uses CSD (Circuit Switched Data) with Cingular gateways, and Roam uses CSD without the Cingular network.

Because Cingular also selects a bearer automatically according to the current network status, the user doesn’t need to select any of them.

Each profile has submenus as follows:

<table>
<thead>
<tr>
<th>MEdia Net</th>
<th>Home</th>
<th>Roam</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Edit</td>
<td>1. Edit</td>
<td>1. Edit</td>
</tr>
<tr>
<td>2. Rename</td>
<td>2. Rename</td>
<td>2. Rename</td>
</tr>
<tr>
<td>5. Delete All</td>
<td>5. Delete All</td>
<td>5. Delete All</td>
</tr>
</tbody>
</table>

- **Edit**: Edit the various items of the current profile.
- **Rename**: Revise the name of profile.
New Network Profile: Create new profile.
Delete: Delete the profile.
Delete All: Allows all Profiles within the Access Point to be deleted so please take precaution prior to using this option.

Note
The changes using these options may affect the other application function.

Cache Settings
The web pages you have accessed are stored in the memory of the phone.

Clear Cache (Menu 4.5.1)
Remove all cached data in the memory.

Allow Cache (Menu 4.5.2)
Set a value whether a connection attempt is made through cache or not.

Note
A cache is a buffer memory, which is used to store data temporarily.

Security Certificates
A list of the available certificates is shown.

Information
The WAP Browser version is displayed.
Cingular Mall

Shop Tones Menu 5.1
This menu option connects to Cingular’s ringtone download site.

⚠️ Note
Additional charges may incur when downloading ringtones. Contact your service provider for further information.

Shop Games Menu 5.2
This menu option connects to Cingular’s game download site. This allows users to download the various games by connecting to the Internet.

⚠️ Note
Additional charges may incur when downloading games. Contact your service provider for further information.

Shop Graphics Menu 5.3
This menu option connects to Cingular’s graphic download site.

⚠️ Note
Additional charges may incur when downloading graphics. Contact your service provider for further information.

Shop Multimedia Menu 5.4
This allows you to connect to Cingular’s multimedia site to download multimedia content.

Shop Applications Menu 5.5
This menu option connects to Cingular’s application download site. This allows users to download the various applications by connecting to the Internet.

MEdia Net Home Menu 5.6
This connects to the homepage. The homepage may be the site which is defined in the activated profile. It will be defined by the Service Provider if you have not defined it in the activated profile.
Welcome to PTT

Push to Talk (PTT) from Cingular let’s you see whether your family, friends, and co-workers are available to talk before you call. You can reach them individually or all at once via a group call, all in an instant. Read on to hear about all of the features Cingular Push to Talk has to offer.

Initialize your PTT Service

Begin initializing your PTT service by pressing the PTT Key (gray button on left side of phone) or by entering Push to Talk(6) from the Main Menu.

You will then register your name and, once initialization completes, begin adding your family, friends, and co-workers who are also Cingular PTT subscribers.

PTT Tips

PTT is a great way of communicating instantly with the people who are important to you. Here are a few tips to help you.

1. Make sure you are holding the PTT Key down while you talk.
2. Make sure you don’t start talking until AFTER you hear the tone.
3. Note the location of the speakerphone and microphone to make sure you aren’t covering either with your grip.
4. PTT calls can be easily started with the flip closed. During a PTT call with the flip open and speaker OFF, the call will be terminated when the flip is closed. When the speaker is ON, closing the flip will not terminate the call.
5. Turn the volume up high to more clearly hear your PTT calls.
Icon Descriptions

My Availability: Your availability icon appears next to the signal indicator on your idle screen. This icon indicates the availability others will see for you when you are listed in their PTT Contacts.

🎉 Available
This will be your availability state once you initialize service and it will not change unless you change it as noted below.

😔 Unavailable
This becomes your availability state if you power off your phone, turn PTT Off, or if the system detects you have moved out of coverage.

🚫 Do Not Disturb
This becomes your availability state if you change My Availability (Menu 6.4.1) to Do Not Disturb. In this state you may place PTT calls but will not receive a PTT call.

📞 PTT Message
This icon appears in place of your availability status notifying you that a PTT message is waiting. To access these messages go to Push to Talk (6) on the Main Menu. The message will either immediately display or may be found under Pending Invitations (5).

PTT Contact Availability: This section covers the icons which will appear next to individuals and groups in your PTT Contacts list indicating their availability.

• INDIVIDUALS:

🎉 Available
This contact is available to talk.

😔 Unavailable
This contact has turned PTT Off, powered down their phone, or moved out of coverage.

🚫 Do Not Disturb
This contact is not receiving PTT calls.

铙 Silent/Vibrate
This contact is available to receive PTT calls. However they will be given the option to accept or reject your PTT call.

✉️ Invitation in Progress
You are waiting for this contact to accept your invitation.
Push to Talk (PTT)

• GROUPS:
  ✔️ Available
  At least one member of the group is available to talk.
  ✔️ Unavailable
  Every member has powered down their phone, turned PTT Off, or moved out of coverage.
  ✔️ Do Not Disturb
  None of the members of the group can be contacted.
  ✔️ Silent/Vibrate
  All members of the group are available to receive a PTT call but each will be given the option to accept or reject your call.
  ✔️ Invitation in Progress
  You have sent an invitation to join a group and none of the members have yet accepted. Once one member accepts this status will change and calls will complete to all members who have accepted and are available.

PTT Calls
A PTT call can only be made to individuals or groups you have established in your PTT Contacts. See PTT Contacts for instructions to set up individuals/groups.

Making a PTT Call
1. Push and quickly release the PTT Key to access your contact list. To access frequently called numbers, Push and hold the PTT Key to access your PTT Call History.
2. Select the individual or group you want to call. Make sure an available icon is displayed next to the name.

⚠️ Note
Calls can not be placed to Quick Groups in your PTT Call History.

3. Press and hold the PTT Key to activate the call. A tone will immediately play indicating you have the floor and may begin speaking.
4. Release the PTT Key when you are done speaking.

Receiving a PTT Call
1. For the best experience your ringer should be set to the highest possible volume.
2. If your status is Available you will hear a PTT Call tone and then the caller’s voice.
3. If your status is Vibrate All your phone will vibrate and then you must accept or reject the call. If set to Silent their will be no call notification tone.
   a. Accepting the call then plays the callers voice over the earpiece.
   b. Rejecting the call terminates the call. PTT calls are not forwarded to voicemail.

Convert to Cellular
During a PTT call the call originator may convert the call over to a cellular call.
1. Call originator selects Options and then selects Convert to Cellular. The originator no longer has to press the PTT key to be heard.
2. Other participants on the call will remain in a PTT call until they press the PTT Key.

Call Waiting
- While on a PTT call you will be notified of incoming PTT calls. Accepting the incoming PTT call suspends the first call. Rejecting the incoming PTT call terminates it.
- While on a PTT call you will be notified of incoming cellular calls. Accepting the incoming cellular call suspends the PTT call. Rejecting the incoming cellular call forwards it to voicemail.
- While on a cellular call you will be notified of incoming PTT calls. Accepting the incoming PTT call suspends the cellular call. Rejecting the incoming PTT call terminates it.

How a PTT call works
When you make a PTT call, you can instantly speak to other Cingular PTT subscribers. During a PTT call only one person can speak at a time. You can tell whether it is your turn to speak by listening for the following tones:

PTT Floor Held tone
This tone plays when you press and hold the PTT Key. It indicates you have the floor and your speech will be heard by the other call participants.
Push to Talk (PTT)

PTT Floor Release tone
When you let go of the PTT Key you will hear this tone as will the other participants on the call. All of your speech prior to this tone has been heard by other participants. Others on the call are now aware that the floor is open and they have an opportunity to speak by pressing their PTT Key.

Error tone
If you attempt to speak by pressing your PTT Key and someone else still has the floor you will hear this tone.

The PTT Key
The gray key on the left hand side of the phone is your PTT Key.
- Pressing and releasing this key while idle displays your PTT contacts.
- Pressing and holding this key while idle displays your PTT history.
- Pressing and holding this key while in a PTT call allows you to speak to the other call participants.

To make a call press and release your PTT key to display your contacts. Select the person or group you wish to connect with and Press and Hold the PTT Key.

⚠️ Note
Customers should not initiate or participate in a PTT call whilst driving. The current version of our PTT product requires you to press the button while talking. For this reason we advise against using PTT while driving, including with a car kit or personal handsfree kit.

PTT Contacts
When accessing your PTT Contacts, Options displays on your Right Soft Key. Options may change depending on whether an individual or a group was highlighted when you selected Options.

- INDIVIDUALS:
  - Call Me Alert: This option allows you to send a message to an individual in your PTT Contacts whose status is Available, Silent/Vibrate, or Do Not Disturb. First select the individual, select Options, and then select Call Me Alert. A message will display on their idle screen "Please Call" and your name. They can simply press their PTT Key to call you back.
Quick Group Call: This option allows you to make a group call without pre-establishing it in your PTT Contacts. After selecting this menu item from PTT Contacts, Options, a list of available individuals will present. Select those you wish to include in your call (up to 6). Then press the PTT Key to begin your Quick Group call.

Voice Message: This option allows you to leave a voicemail instantly. For a message to a contact, simply highlight the contact on your PTT Contacts, select Options, and select Voice Message. Pushing the PTT Key begins the recording. Releasing the PTT Key ends the recording and deposits your message.

Add Contact: This option allows you to send an invitation to the contact that the user has selected. After the person accepts the invitation, he or she will be listed as an available PTT contact.

Rename: You can edit the name of the individual.

Delete: You can delete the individual.

Copy to Address: This option allows you to copy the name and number to your Address Book.

New Message: You can send a new text or multimedia message to selected member.

• GROUPS:

View Members: This option displays all members of a group along with their Availability.

Dynamic Call: It is similar to Quick Group Call however the participants you select from are only those participants in the group.

Voice Message: This option allows you to leave a voicemail to a group in your PTT Contacts or select members from the group. Select the members of Voice Message and press Ok once. Select the group to receive the message. Pushing the PTT Key begins the recording. Releasing the PTT Key ends the recording and deposits your message.

Add Group: This option allows you to create a new PTT group.

Leave Group: If you have joined a group originated by another this option allows you to leave the group but the group remains intact for all other participants.
Push to Talk (PTT)

**Add member:** This option displays only when you have highlighted a group which you have originated. After adding any additional members, a notification is sent to the other group participants of the new group members.

**Remove Member:** This option displays only when you have highlighted a group which you have originated. After removing a member a notification is sent to the individual.

**Rename:** If you have joined a group originated by another this option allows you to edit the name of the group.

**New Message:** You can send a new text message to all members of the selected group.

**Delete Group:** Deleting a group which you originated deletes the group from PTT Contacts for all participants.

**Add Contact**

1. Select Add Contact in the PTT menu.
2. Enter the contact’s name and phone number and then select [Save]. An invitation to join your PTT Contacts will be sent.
3. The availability icon will be Invitation in Progress until the individual accepts.
4. Once accepted they are part of your PTT Contacts and you are part of theirs.

**Add Group**

Setting up a PTT group is a great way to quickly call a group of people you routinely need to reach. A group can be made up of individuals in your PTT Contacts or other Cingular PTT subscribers you don’t necessarily want to add to your PTT Contacts.

1. After selecting Add Group you will be asked to name your group.
2. Next step is to choose members. Choosing Select In Contacts lets you chose from your PTT Contacts. Choosing New Contact lets you add someone not in your PTT Contacts.
   a. If you want to add both types of contacts then you will need to select one option and save the group.
   b. Then using Add Member in the PTT Contacts Options menu you can add the remaining members.
3. Once you have saved your group invitations will be sent to each contact for their acceptance. The Invitation in Progress icon will display next to the group until one member accepts. Availability will then update each time a person accepts.

4. When a participant accepts your invitation the group is now in their PTT Contacts and they may also place calls to the group.

5. Maximum members in a group is 30, 29 participants and yourself. You may have up to 30 groups in your PTT Contacts.

PTT Settings

1. Once Contact Alerts is selected a list of individuals from PTT Contacts will display. Select those individuals for whom you want to receive alerts for availability changes.

2. Once selected you will receive alerts for availability changes until you de-select them.

3. An alert consists of a tone as well as a PTT message when you access the PTT Menu.

   ▶ **Set Your Name**: When you initialized service you set a name for yourself. This name is presented in Contact Invitations. Changing your name will not impact invitations already sent but will be reflected in future invitations.

   ▶ **Auto Accept Invites**: If you do not want to pre-screen all additions to your PTT Contacts you can use this menu item to automatically accept your invitations.

   • **Disable All** allows you to pre-screen all invitations.
   • **Contact Only** automatically accepts individual invitations.
   • **Group Only** automatically accepts group invitations.
   • **Enable All** automatically accepts all invitations.

   ▶ **PTT is On/PTT is Off**: This menu item allows you to turn your PTT Service off or turn it on.
Pending Invitations  

This menu item only displays if you have invitations which have been waiting for your review. Selecting this menu item displays a list of invitations pending. Invitations not disposed of within 7 days will expire.
Favorites

Menu 7.1

Your phone may have some pre-installed bookmarks for sites not affiliated with LG. LG does not warrant or endorse these sites. If you choose to access them, you should take the same precautions, for security or content, as you would with any site. For further details, see page 44.

Games & Apps

Menu 7.2

Java is a technology developed by Sun Microsystems. Similar to the way you would download the Java Applet using the standard Netscape or MS Internet Explorer browsers, Java MIDlet can be downloaded using a WAP enabled phone. Depending on the service provider, Java based programs such as Java games can be downloaded and run on a phone. Once downloaded, the Java program can be viewed within the Games & Apps menu where you can select, execute or delete. The Java program files saved in the phone are in .JAD and .JAR formats.

Note

The JAR file is a compressed format of the Java program and the JAD file is a description file that includes all detailed information. From the network, prior to download, you can view all detailed file descriptions from the JAD file.

Warning

Only J2ME (Java 2 Micro Edition) based programs will run in a phone environment. The J2SE (Java 2 Standard Edition) based programs will only run in a PC environment.

Audio

Menu 7.3

➤ Shop Tones: This menu option connects to Cingular’s ringtone download site.

➤ Send via
- Text: iMelody Sound can be sent via SMS.
- Multimedia: Downloaded Sound can be sent via MMS.

➤ Set as Ringtone: This sets the Ring Tone with currently selected Sound.

➤ Delete: This deletes currently selected Sound.

➤ Rename: This deletes the Title of currently selected Sound.

➤ Delete All: This deletes all sounds.
Note
Sounds supplied as default can only be used under the Set As Ring Tone mode.

Graphics

- **Shop Graphics:** This menu option connects to Cingular’s graphic download site.
- **Set as Wallpaper:** Currently selected Picture can be set as a Wallpaper.

Tools

Camera (Menu 7.5.1)
The phone supports 3 modes that can be set to capture images and they are 160X120, 320X240 and 640X480. You can access camera feature directly by pressing and holding the about or (camera key) 2 seconds.

Take Photo
Using the camera module built in your phone, you can take pictures of people or events while on the move.

Additionally, you can send photos to other people in a picture message. The right soft key [Options] will bring up the following options.

- **Image Size:** Sets the image size to 160X120, 320X240, 640X480 (default). The selected image size displays on the capture screen.
- **Brightness:** This adjusts the brightness level of the screen and there are 9 levels of setting.
- **White Balance:** This adjusts the Light Effect level and you can select from the following options: Auto / Daylight / Incandescent / Cloudy / Fluorescent.
- **Zoom:** You can zoom in/out by the up/down navigation key except 640X480 (default phone setting).

Note
The maximum zoom scale depends on the resolution as follows.

<table>
<thead>
<tr>
<th>Resolution</th>
<th>Zoom scale</th>
</tr>
</thead>
<tbody>
<tr>
<td>640x480</td>
<td>x1</td>
</tr>
<tr>
<td>320x240</td>
<td>x1, x2</td>
</tr>
<tr>
<td>160x120</td>
<td>x1, x2, x3</td>
</tr>
</tbody>
</table>
► **Color Effect:** Allows you to apply special effects to the picture. Press the left or right navigation key to find the tone you want to use. Color, Sepia, Mono are available.

► **Self Timer:** Determines the delay time.

► **Flash:** Turns the flash feature on and off.

► **Multishot:** This feature enables the amount of continuous frames that can be taken at one time. The number of frames is determined by the image size setting.

► **Shutter Sound:** Allows you to select a sound when you press the shutter. Sound 1 / Sound 2 / Sound 3 / Silent

► **Default Settings:** This restores the original camera settings (Size, Brightness, Zoom, etc.).

---

### Photo Album

In this menu, you can review the pictures you have taken. This feature offers the ability to store all captured photo images in an album. When no images have been captured, the *Empty* message will be displayed. The picture will display the last image viewed. The title of the image will be displayed on top as well as the index number of the displayed image. The left or right navigation key is used to view previous or next image.

► **View:** You can view one image at a time.

► **Send Photo:** Allows you to send a multimedia message using the taken picture.

► **Take Photo:** Go to the camera application which enables you to take a still picture.

► **Set as Wallpaper:** Set selected photo image as a wallpaper.

► **Set as Photo ID:** You can add the selected image to a address book contact to use Photo Caller ID feature.

► **Delete:** Delete current image.

► **Print via Bluetooth:** For further details, see page 60 (Menu 7.5.2).

► **Slideshow:** The Slide Show mode will display the images in slide show format. The images are shown every 1.5 second intervals.

► **Rename:** Allows you to rename the taken picture.

► **Delete All:** Delete all images in the album.
Information: Displays Title, Size, Date and Time information on selected image.

Check Memory
This indicates the available memory capacity. The total available memory is 1.3MB and the remaining capacity is displayed.

Print via Bluetooth (Menu 7.5.2)
Most pictures that you've taken in the camera mode and downloaded through WAP can be transmitted via Bluetooth to a printer.
1. Scroll to highlight the desired picture, and press the left soft key [Print].
2. Select the [New] by pressing the left soft key to search the printer device can be connected in range.
3. If the correct printer is found, the display of your phone shows the name of the printer.

Alarm Clock (Menu 7.5.3)
Set the alarm to ring at a specific time. In the Alarm Clock menu, the following options are available:
On: Set the time(hour and minute) for activating the alarm.
1. Enter the menu.
2. Select [On] by pressing the right/left navigation keys.
3. If you want to set the time for activating the alarm, press the down navigation key.
4. Enter the required time, press the down navigation key.
5. The following options are available.
   • Once: The alarm rings only once and is then deactivated.
   • Daily: The alarm rings every day at the same time.
   • Weekly: The alarm rings every week on the same day and at the same time.
   • Monthly: The alarm rings every month on the same day and at the same time.
6. Allows you to select the alarm melody by using the right/left navigation keys.
7. Press the left soft key [Set].

Off: Cancel the alarm.

⚠️ Notice
If this option is set to On, the alarm will ring at the specified time, even when the phone is switched off. To stop the alarm when it rings, open the phone and press the right soft key [Quit].

Calendar (Menu 7.5.4)
When you enter this menu a calendar will be displayed. The square cursor is used to locate a particular day. The under bar on the calendar indicates schedule(s) on for that day. This function helps to remind you of the schedule. The phone will sound an alarm tone if it has been set for a specific schedule item.

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>up/down navigation key</td>
<td>Weekly</td>
</tr>
<tr>
<td>left/right navigation key</td>
<td>Daily</td>
</tr>
<tr>
<td>❗️ key/ ❌ key</td>
<td>Yearly</td>
</tr>
<tr>
<td>❗️ key/ ❌ key</td>
<td>Monthly</td>
</tr>
</tbody>
</table>

The following [Options] are available:

► View: Allows you to view the schedule.
► Delete: Allows you to delete the schedule.
► New Schedule: You can edit maximum of 30 characters and create up to 30 notes.
► Edit: Allows you to edit the schedule.
► Calendar: Allows you to consult the calendar.
► Scheduler Tone: The phone can sound an alarm tone when the scheduled date for an event has been reached with this option.
► All Schedules: Shows the notes that are set for all days. Use the up/down navigation keys to browse through the note lists.
► Go to Date: Allows you to jump to a specific date.
► Delete Old: Delete past schedule event that has already been notified.
► Delete All: Delete all schedules. You are asked to confirm your action.

⚠️ Note
You can see Edit, Delete, View all schedules, Delete past, and Delete all menus dependent on setting of the schedule.
**Voice Memo (Menu 7.5.5)**

Allows you to record a memo. You can record up to 3 voice messages with each message up to 30 seconds.

You can use the Voice Memo feature to:

- Play the recorded voice memos
- Delete one or all voice memos

1. Once recording is started, the message ‘Recording...’ and the remaining time is displayed.

**Note**

If all memo locations are full, you must delete an old memo before recording a new one.

2. If you want to finish recording, press the left soft key [Save].

- **Play**: Allows you to play back all memos recorded, starting with the most recent memo. The screen displays the date and time when the memo was recorded.

- **Delete**: Allows you to delete a specific memo. All memos recorded are played back, starting with the most recent one.

- **Record New**: Allows you to record a memo.

- **Rename**: Allows you to rename a specific memo.

- **Send via Multimedia Message**: Sends the selected voice memo by MMS.

- **Delete All**: Allows you to delete all memos.

**Calculator (Menu 7.5.6)**

The calculator function allows you to add, subtract, multiply and divide. You can input numbers using the number keys, and input operators using the up, down, left, and right navigation keys.

You can input a decimal point by pressing the [Star] key.

Whenever you press the [Clear] key, characters are sequentially deleted in reverse direction.

**Memo (Menu 7.5.7)**

To write, edit and delete a memo on a specific date, proceed as follows.

1. Press the left soft key [New].

2. Input the memo and press the right soft key [Options].

The following options are available.

- **Set T9**: Allows you to select the T9 language to use in memo.
Exit Editor: Allows you to exit in memo editor.

Or

1. Select a Memo.
2. Press the right soft key [Options].

The following options are available.

- **Delete**: Allows you to delete the memo. You can press the right soft key [Options → Delete] to edit the memo displayed.
- **New Note**: Add a new memo, up to 20 memos and 40 characters per each memo.
- **Edit**: If you select a memo that already exists, you can press the right soft key [Options → Edit] to edit the memo displayed.
- **Delete All**: Allows you to delete all memos. You are asked to confirm your action.

World Clock (Menu 7.5.8)

Allows you to check the current Greenwich Mean Time (GMT) and major cities around the world, using the left/right navigation keys.

The screen shows the city name, current date and time.

To select the time zone in which you are located, proceed as follows:

1. Select the city corresponding to your time zone by pressing the left/right navigation keys one or more times. The local date and time are displayed.
2. If you want to set, press the left soft key.

⚠️ Note

The time zone setting of each city in World time menu may be affected by network condition.

Unit Converter (Menu 7.5.9)

This converts any measurement into a unit you want. There are 4 types that can be converted into units: Length, Surface, Weight, and Volume.

1. You can select one of four unit types by pressing the left soft key [Unit].
2. Select the standard value by using the left/right navigation keys.
3. Select the unit you want to convert by pressing the up/down navigation keys.
4. You can check the converted value for the unit you want. Also, you can input a decimal number by pressing the # key.

**Tip Calculator  *(Menu 7.5.0)*

This feature allows you to quickly and easily calculate the tip amount based on the total bill as well as the split of the total bill based on the number of people.
Contacts
Menu 8.1
This menu allows you to save and manage contact address information. The Contacts functions allow you to add a new address or search saved contact addresses by name.

New Contact
Menu 8.2
This menu allows you to add a new contact address. You can input contact address information including name, phone numbers, email addresses, group information items, memos, ringtones, and image (photograph).

You have to select the Handset or the SmartChip memory using the left and right navigation keys.

Speed Dial List
Menu 8.3
This menu allows you to configure the speed dial numbers. You can select a number as a speed dial from 2 to 9. You can configure speed dial numbers for any of the 8 numbers for a specific contact address so that a contact address may have multiple speed dial numbers.

Caller Groups
Menu 8.4
There are 6 predefined groups as well as one additional group labeled Others where you can create your own lists.

1. You can set the phone to ring in a specific way and display a preselected graphic icon when a particular person calls you.

2. Scroll to Caller Groups then press the left soft key [OK] to enter this menu.

3. Every Group list will be displayed: Family, VIP, Friends, Colleague, Group 1, Group 2, No Group.

4. Select the Group name that you want to manage by pressing the right soft key [Options].

5. You will see the following submenus under the predefined groups except for the No Groups group.

   • Group Ringtone: Allows you to select the ring tone to be used when you receive a voice phone call from a person in the group.

   • Group Icon: Allows you to select the graphic icon to be displayed when you receive a call from a person in the group.

   • Add Member: Allows you to add the member to the group.
• **Remove Member**: Allows you to delete the member in the group.

• **Rename**: Allows you to assign a name to the group.

**Copy All Contacts**  
Menu 8.5
This menu allows you to copy all of the information from your SmartChip, e.g. name, handset number, etc., to your handset. If a name is duplicated during the copying operation, the information is also duplicated.

**SmartChip To Phone (Menu 8.6.1)**
You can copy the entry from the SmartChip card to the phone memory.

**Phone To SmartChip (Menu 8.6.2)**
You can copy the entry from the handset memory to the SmartChip card (not all the data will be copied).

➤ **Keep Original**: When copying, Original Dial Number is kept.

➤ **Delete Original**: When copying, Original Dial Number will be erased.

**Delete All Contacts**  
Menu 8.6
You can delete all entries in the SmartChip and the Phone.

Press the [ END ] key to return to standby mode.

**Set Memory**  
Menu 8.7
Scroll to highlight the Set Save Location option, then press the left soft key [OK].

➤ If you select Ask Always when adding entry, the phone will ask where to store.

➤ If you select SmartChip or Phone, the phone will store an entry to the SmartChip or the phone.

**Information**  
Menu 8.8

**Service Dial Number (Menu 8.8.1)**
You can view the list of Service Dialing Numbers (SDN) assigned by your network provider. Such numbers could include the emergency, directory assistance and voice mail numbers.

1. Select the Service dial number option.

2. The names of the available services will be shown.
3. Use the up/down navigation keys to select a service. Press the [SEND] key.

Check Memory *(Menu 8.8.2)*
You can check how many names and numbers are stored in the Address Book (SmartChip card and phone memories).

My Numbers *(Menu 8.8.3)*
This displays your phone numbers stored in the SmartChip.
Audio  (Menu 9.1)

You can use the Sound Settings feature to customize various settings, such as the:

► Ring melody, volume and type
► Sounds made when you press a key, make an error or receive a message

In addition, pressing and holding the [Star] key on idle screen mode can swap Normal and Manner mode. Ear Mic is available when respective instruments are attached.

Shop Tones (Menu 9.1.1)

Connects to Cingular Ringtone Shops.

Ringtones (Menu 9.1.2)

Shows and plays ringtones. These can be downloaded ringtones from Ringtone shops.

Volume (Menu 9.1.3)

► Ringtone: To set the volume level for the ringing tones.
► Key Tone: To set the volume level for keypad tones.
► Earpiece: This can adjust the volume level.

► Headset: When using the Headset, volume level can be adjusted.
► Handsfree: When using the Car Kit, volume level can be adjusted.

Ring Alert Type (Menu 9.1.4)

Supports 3 ring alert types. Ring, Ring and Vibrate, and Vibrate then Ring.

Message Alert Tones (Menu 9.1.5)

Allows you to select an alert tone which is played when a message is received. You can select any one from 5 message alert tones.

Key Tones (Menu 9.1.6)

This menu option allows you to select a tone that the phone sounds when a key is pressed. You can select an option from Beep and Voice.

Voice Memo (Menu 9.1.7)

For further details, see page 62 (Menu 7.5.5).
**Display (Menu 9.2)**

**Wallpaper (Menu 9.2.1)**
You can select the background picture in standby mode.

**Backlight Timer (Menu 9.2.2)**
Use this to select whether or not the phone uses the backlight.

**Contrast (Menu 9.2.3)**
This option allows you to adjust the brightness level of the display screen.
You can adjust by using the right/left and up/down navigation key.

**Languages (Menu 9.2.4)**
You can change the language for the display text in your phone.

**Menu Style (Menu 9.2.5)**
You can configure the menu style to Icon View or List View.

**Bluetooth (Menu 9.3)**

Your phone has built-in Bluetooth wireless technology, which makes it possible for you to connect your phone wirelessly to other Bluetooth devices such as a handsfree, headset, BIP printer.

You can have a conversation via a cordless Bluetooth handsfree or browse the Internet, wirelessly connected via a mobile phone.

**Note**
We recommend that your phone and the Bluetooth device you are communicating with be within a range of 10 meters. The connection may be improved if there are no solid objects in between your phone and the other Bluetooth device.

**Bluetooth On/Off (Menu 9.3.1)**
This menu sets the Bluetooth on or off using the navigation key.
Device List *(Menu 9.3.2)*

This function allows you to view the list of all devices that are paired with your phone at once.

To add a new device, press the left soft key **[New]**

1. Select the **[New]** key to search the device that can be connected and within range.

2. If you want to stop searching, press the right soft key **[Cancel]**.

3. All of the searched devices are displayed in the pop-up menu.

Select the desired device by pressing the OK key, and entering the password of the device you are pairing (for example "0000").

**Settings *(Menu 9.3.3)*

This menu allows you to configure the profile for a Bluetooth.

- **My Name:** Allows you to change the handset's name that can be seen by other Bluetooth devices.

**Date & Time *(Menu 9.4)*

**Set Date *(Menu 9.4.1)*

This allows you to enter the day, month and year. You can change the date format via the Date Format menu option.

**Date Format *(Menu 9.4.2)*

- YYYY/MM/DD(year/month/day)
- DD/MM/YYYY(day/month/year)
- MM/DD/YYYY(month/day/year)

**Set Time *(Menu 9.4.3)*

This allows you to enter the current time. You can choose the time format via the Time Format menu option.

**Time Format *(Menu 9.4.4)*

- 24 Hours/12 Hours
**Auto Update** *(Menu 9.4.5)*
Select On to set the phone to automatically update the time and date according to the current local time zone.

**Call** *(Menu 9.5)*

**Call Forwarding** *(Menu 9.5.1)*
When this network service is activated, you can direct your incoming calls to another number, for example, to your voice mailbox number. For details, contact your service provider. Select one of the divert options, for example, select If busy to divert voice calls when your number is busy or when you reject incoming calls.

The following options are available:

- **All Voice Calls**: Diverts voice calls unconditionally.
- **If Busy**: Diverts voice calls when the phone is in use.
- **If No Reply**: Diverts voice calls which you do not answer.
- **If Out Of Reach**: Diverts voice calls when the phone is switched off or out of coverage.
- **All Data Calls**: Diverts to a number with a PC connection unconditionally.
- **All Fax Calls**: Diverts to a number with a fax connection unconditionally.
- **Cancel All**: Cancels all call divert service.

**Answer Mode** *(Menu 9.5.2)*
This allows you to determine when to answer the phone.

- **Flip Open**: When the phone rings, you can answer a call simply by opening the flip.
- **Any Key**: You can answer an incoming call by pressing any key, except the [END] key.
- **Send Key Only**: You can answer an incoming call by only pressing the [SEND] key.

**Send My Number** *(Menu 9.5.3)*
This network service allows you to set your phone number to be displayed *(On)* or hidden *(Off)* from the person to whom you are calling. You can select **Set by Network** if you prefer to have different settings for different service provider.
Call Waiting (Menu 9.5.4)
The network will notify you of a new incoming call while you have a call in progress. Select Activate to request the network to activate call waiting, Cancel to request the network to deactivate call waiting, or View Status, to check if the function is active or not.

Minute Minder (Menu 9.5.5)
This option allows you to specify whether the phone will beep every minute during an outgoing call to keep you informed of the length of the call.

Auto Redial (Menu 9.5.6)
Select On, your phone redials the number you're trying to call up to 10 times after you hear a quick, busy signal. Press [END] to stop the call attempts. This feature attempts to redial numbers that are busy due to the wireless network. It does not redial numbers to a busy party.

TTY (Menu 9.5.7)
Allows you to attach a TTY device enabling you to communicate with parties also using a TTY device. A phone with TTY support is able to translate typed characters to voice. Voice can also be translated into characters and then displayed on the TTY.

Send DTMF Tones (Menu 9.5.8)
You can send the DTMF (dual tone multi-frequency) tones of the number on the display during a call.
This option is helpful for entering a password or account number when you call an automated system, like a banking service.

Security (Menu 9.6)
Various codes and passwords are used to protect the features and settings of your phone. They are described in the following sections.

Request PIN Code (Menu 9.6.1)
When the PIN code request feature is set to ‘On’, you must enter your PIN each time you switch the phone on. Consequently, any person who does not have your PIN cannot use your phone without your approval.
Note
Before setting to Off the PIN code request feature, you must enter your PIN.

The following [Options] are available:

- **Enable**: You must enter the PIN each time the phone is switched on.
- **Disable**: The phone connects directly to the network when you switch it on.

**Fixed Dial Number (FDN) (Menu 9.6.2)**
Allows you to restrict your outgoing calls to selected phone numbers, if this function is supported by your SmartChip. The PIN2 code is required.

The following options are available:

- **Disable**: You can call any number.
- **Enable**: You can only call phone numbers stored in the Address Book. You must enter your PIN2.
- **Number List**: You can view the number list saved as fixed dial number.

Note
Not all SIM cards have a PIN2. If your SmartChip does not, this menu option is not displayed.

**Change Codes (Menu 9.6.3)**
The Change codes feature allows you to change your current password to a new one. You must enter the current password before you can specify a new one.

You can change the access codes for: **Security Code**, **PIN1 Code**, **PIN2 Code**

Note
PIN: Personal Identification Number.

**Connection (Menu 9.7)**

**GPRS Attach (Menu 9.7.1)**
If you select **Power On** and you are in a network that supports packet data, the phone registers to the GPRS network and sending short messages will be done via GPRS. Also, starting an active packet data connection, for example, to send and receive e-mail, is quicker. If you select **When Needed**, the phone will use a packet data connection only if you start an application or action that needs it. The GPRS connection is closed after it is not used by any application.
Settings

⚠️ Note
If there is no GPRS coverage and you have chosen Power On, the phone will periodically try to establish a packet data connection.

Network Profile (Menu 9.7.2)
This menu shows the Network Profile. You can register, delete and edit by using the Option Menu. However, you cannot delete or edit default configurations provided by Cingular.

Reset Network Profile (Menu 9.7.3)
This allows Profile information to be restored to original setting. For example, this option will restore the Profile that has been deleted by the Delete All selection from the Network Profile (Menu 4.4) submenu.

⚠️ Note
The password is preset to 0000.

Reset Default (Menu 9.8)
Restores the settings (e.g.: Audio, Display, Language, Date & Time, Bluetooth Settings) stored in handset memory to default values.
Please check to see if any problems you have encountered with the phone are described in this section before taking the phone in for a service or calling a service engineer.

Q How do I view the list of outgoing calls, incoming calls and missed calls?
A Press the \text{key}.

Q How do I clear all call history?
A Press the left soft key [Menu] and then the \text{key}.

Q How do I view all numbers stored in memory?
A Press right soft key [Names] and then \text{ }.

Q Why is the connection inconsistent or not audible in certain areas?
A When frequency environment is unstable in a certain area, connection may be inconsistent and not audible. Relocate to another area and try again.

Q Why is the connection not consistent abruptly disconnects even when established?
A When frequency is unstable or weak or if there are too many users, connection may be cut off even after it was established. Please try again later or attempt after relocating to other areas.

Q Why does the LCD not turn on?
A Remove the battery and turn on the power after placing it back on. If there is no change, fully charge the battery and try again.

Q Why is there an echo when a connection is made with certain telephones in a certain area?
A This is called the ‘Echo Phenomenon’, where it occurs if connection volume is too high or caused by special properties (semi electronic telephone exchange) of the equipment on the other end.
Q: Why does the phone heat up?
A: The phone may get hot when there is a very long call duration or when games are played or even when surfing the Internet for a long time. This has no effect upon the life of the product or performance.

Q: Why does the battery life get shorter in standby mode?
A: The battery is worn out. As time passes, the battery life gradually becomes shorter. If the battery lasts about half the amount of time as when first purchased, it’s time to purchase a new battery.

Q: Why does the battery run out so quickly during normal use?
A: It is due to the user environment or a large number of calls or weak signal.

Q: Why is no number dialed when you recall a Address Book entry?
A: Check that the number has been stored correctly by using the address book Search feature. Re-store them, if necessary.

Q: Why can’t my correspondent reach me?
A: Is your phone switched on (pressed for more than three seconds)? Are you accessing the right cellular network? Or, you may have set an incoming call barring option.
Accessories

There are a variety of accessories available for your mobile phone. You can select these options according to your personal communication requirements. Consult your local dealer for availability.

**Travel Adapter**
This adapter allows you to charge the battery. It supports standard U.S. 120Volt 60Hz outlets. It takes 5 hours to charge a completely discharged battery.

**Battery**
Standard battery is available.

**Vehicle Power Adapter**
You can operate the phone and trickle charge the phone battery from your vehicle by using the vehicle power adapter. It takes 5 hours to charge a completely discharged battery.

**Headset**
Connects to your phone, allowing hands-free operation. Includes earpiece, microphone, and integrated call answer/termination button.

**Data Cable Kit**
Connects your phone to a PC.

**Bluetooth Headset**
Safety Guidelines

TIA Safety Information

Provided herein is the complete TIA Safety Information for Wireless Handheld phones. Inclusion of the text covering Pacemakers, Hearing Aids, and Other Medical Devices is required in the owner’s manual for CTIA Certification. Use of the remaining TIA language is encouraged when appropriate.

Exposure to Radio Frequency Signal

Your wireless handheld portable telephone is a low-power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- ANSI C95.1 (1992) *
- NCRP Report 86 (1986)
- ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

*American National Standards Institute; National Council on Radiation Protection and Measurements; International Commission on Non-Ionizing Radiation Protection

The design of your phone complies with the FCC guidelines (and those standards).

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

Phone Operation

NORMAL POSITION: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.
Tips on Efficient Operation
For your phone to operate most efficiently:

► Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

Driving
Check the laws and regulations on the use of wireless phones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:

► Give full attention to driving - driving safely is your first responsibility;
► Use hands-free operation, if available;
► Pull off the road and park before making or answering a call if driving conditions so require.

Electronic Devices
Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers
The Health Industry Manufacturers Association recommends that a minimum separation of six (6’) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:

► Should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON;
► Should not carry the phone in a breast pocket.
► Should use the ear opposite the pacemaker to minimize the potential for interference.
► If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

Hearing Aids
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider.
Other Medical Devices
If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Health Care Facilities
Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to external RF energy.

Vehicles
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle.

You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities
Turn your phone OFF in any facility where posted notices so require.

Aircraft
FCC regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an aircraft.

Blasting Areas
To avoid interfering with blasting operations, turn your phone OFF when in a ‘blasting areas or in areas posted: ‘Turn off two-way radio’. Obey all signs and instructions.

Potentially Explosive Atmosphere
Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, marked clearly. Potential areas...
may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

**For Vehicles Equipped with an Air Bag**
An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

**Safety Information**
Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all the times after reading it.

**Charger and Adapter Safety**
► The charger and adapter are intended for indoor use only.

**Battery Information and Care**
► Please dispose of your battery properly or take it to your local wireless carrier for recycling.
► The battery does not need to be fully discharged before recharging.
► Use only LG-approved chargers specific to your phone model since they are designed to maximize battery life.
► Do not disassemble or impact the battery as it may cause electric shock, short-circuit, and fire. Store the battery in a place out of reach of children.
► Keep the battery’s metal contacts clean.
► Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
► Recharge the battery after long periods of non-use to maximize battery life.
► Battery life will vary due to usage patterns and environmental conditions.
► Use of extended backlighting, MEdia Net Browsing, and data connectivity kits affect battery life and talk/standby times.
Safety Guidelines

The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal state. In this case, remove the battery from the phone, reinstall it, and turn the phone on.

Explosion, Shock, and Fire Hazards

Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.

Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it is dirty.

When using the power plug, ensure that it is firmly connected. If it is not, it may cause excessive heat or fire.

If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.

Do not short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving.

Short-circuit of the terminal may damage the battery and cause an explosion.

General Notice

Using a damaged battery or placing a battery in your mouth may cause serious injury.

Do not place items containing magnetic components such as a credit card, phone card, bank book or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.

Talking on your phone for a long period of time may reduce call quality due to heat generated during use.

When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.

Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.

Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized
Service Center to replace the damaged antenna.

- Do not immerse your phone in water. If this happens, turn it off immediately and remove the battery. If the phone does not work, take it to an LG Authorized Service Center.
- Do not paint your phone.
- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.
- When you use the phone in public places, set the ring tone to vibration so as not to disturb others.
- Do not turn your phone on or off when putting it in your ear.
FDA Consumer Update

The U.S. Food and Drug Administrations Center for Devices and Radiological Health Consumer Update on Mobile Phones.

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the standby mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is the FDA’s role concerning the safety of wireless phones?

Under the law, the FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, the FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace, or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

The FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. The FCC relies on the FDA and other health agencies for safety questions about wireless phones.

The FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term ‘wireless phone’ refers here to handheld wireless phones with built-in antennas, often called ‘cell’, ‘mobile’, or ‘PCS’ phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user’s head.

These RF exposures are limited by FCC safety guidelines that were developed with the advice of the FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called ‘cordless phones,’ which have a base unit connected to the telephone wiring in a
house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don’t know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, menigioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years follow-up may be needed to provide answers about some health effects, such as cancer.
This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is the FDA doing to find out more about the possible health effects of wireless phone RF?

The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF).

The FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues. The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much radio frequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radio frequency energy (RF) exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a
Safety Guidelines

Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body’s ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your phone’s RF exposure level in the online listing.

8. What has the FDA done to measure the radio frequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radio frequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, ‘Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques,’ sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?

If there is a risk from these products - and at this point we do not know that there is - it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure
a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure. If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?

Radio frequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device manufacturers, and many other groups, was completed in late 2000. This
standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a ‘compatible’ phone and a ‘compatible’ hearing aid at the same time. This standard was approved by the IEEE in 2000. The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct testing to assess the interference and work to resolve the problem.

**12. Where can I find additional information?**

For additional information, please refer to the following resources:

- FDA web page on wireless phones (http://www.fda.gov/cdrh/phones/index.html)
- Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)
- International Commission on Non-Ionizing Radiation Protection (http://www.icnirp.de)
- World Health Organization (WHO) International EMF Project (http://www.who.int/emf)
- National Radiological Protection Board (UK) (http://www.nrpb.org.uk/)

**10 Driver Safety Tips**

Your wireless phone gives you the powerful ability to communicate by voice almost anywhere, anytime. An important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When operating a car, driving is your first responsibility.

When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:
1. Get to know your wireless phone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

2. When available, use a hands-free device. A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.

3. Position your wireless phone within easy reach. Make sure you place your wireless phone within easy reach and where you can reach it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.

4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

5. Do not take notes or look up phone numbers while driving. If you are reading an address book or business card, or writing a “to-do” list while driving a car, you are not watching where you are going. It is common sense. Don’t get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.

6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simple tip— dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix; they are distracting and even dangerous when you are behind the wheel of a car. Make people you are talking with aware you are driving and if necessary, suspend conversations which have the potential to divert your attention from the road.
Safety Guidelines

8. Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations — with your phone at your side, help is only three numbers away. Dial 911 or other local emergency number in the case of fire, traffic accident, road hazard or medical emergency. Remember, it is a free call on your wireless phone!

9. Use your wireless phone to help others in emergencies. Your wireless phone provides you a perfect opportunity to be a “Good Samaritan” in your community. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special wireless nonemergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call for emergency services. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

Consumer Information on SAR (Specific Absorption Rate)

This Model Phone Meets the Government’s Requirements for Exposure to Radio Waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.
The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. * Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.04 W/kg and when worn on the body, as described in this user’s manual, is 1.40 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements.) While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID BEJCG300.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.wow-com.com

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.
Hearing Aid Compatibility (HAC) with Mobile Phones

When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box. The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T Switch” or “Telephone Switch”) than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device. The more immune your hearing aid is, the less likely you are to experience interference noise from mobile phones.
Glossary

To help you understand the main technical terms and abbreviations used in this booklet and take full advantage of the feature on your mobile phone, here are a few definitions.

**Call Barring**
Ability to restrict outgoing and incoming calls.

**Call Divert**
Ability to reroute calls to another number.

**Call waiting**
Ability to inform users that they have an incoming call when engaged on another call.

**GPRS (General Packet Radio Service)**
GPRS guarantees continuous connection to the Internet for mobile phone and computer users. It is based on the Global System for Mobile Communication (GSM) circuit-switched cellular phone connections and the Short Message Service (SMS).

**GSM (Global System for Mobile Communication)**
International standard for cellular communication, guaranteeing compatibility between the various network operators. GSM covers most European countries and many other parts of the world.

**Java**
Programming language generating applications that can run on all hardware platforms, whether small, medium or large, without modification. It has been promoted for and geared heavily to the Web, both for public Web sites and Intranets. When a Java program runs from a Web page, it is called a Java applet. When it is run on a mobile phone or pager, it is called a MIDlet.

**Line Identification Services (Caller ID)**
Service allowing subscribers to view or block the telephone numbers of callers.

**Multiparty Calls**
Ability to establish a conference call involving up to five additional parties.

**Phone Password**
Security code used to unlock the phone when you have selected the option to lock it automatically each time it switches on.
**Glossary**

**Roaming**
Use of your phone when you are outside your home area (when traveling for example).

**SDN (Service Dial Number)**
Telephone numbers supplied by your network provider and giving access to special services, such as voice mail, directory inquiries, customer support and emergency services.

**SmartChip**
Card containing a chip with all the information required to operate the phone (network and memory information, as well as the subscriber’s personal data). The SmartChip fits into a small slot on the back of the phone and is protected by the battery.

**SMS (Short Message Service)**
Network service sending and receiving messages to and from another subscriber without having to speak to the correspondent. The message created or received (up to 160 characters long) can be displayed, received, edited or sent.

**Patent Information**
This product was manufactured under one or more of the following U.S. patents: 5276765 5749067 6061647
