Emergency Key

Booming Speakerphone

You can talk to the kids
at play or after school,
And the kids can have fun
and look really cool.

Now, with Chaperone
service,
You'll see where they go,
With a push of a button,
Your mobile will know!

So simple to use -
just press and call,
4 speed-dials plus
emergency key does it all!
Talk about style, talk about fun!

The LG Migo will please Everyone!

LEGAL STUFF

All materials in this datasheet including, without limitation, the design, the text, and any marks are the property of LG Electronics, Inc. ALL RIGHTS RESERVED Copyright © 2005 LG Electronics, Inc. All product and service marks contained herein that are not LG Electronics, Inc. proprietary marks are the trademarks of their respective owners. LG Electronics, Inc. makes no claim to such properties. Phone features and specifications are subject to change without prior notice. The use of non-LG or non-Verizon Wireless approved accessories will void the warranty and may result in damage to the phone, the phone exploding, or other dangerous conditions. Battery usage and standby times are estimates only. Use of certain features and other conditions including, but not limited to, battery age and condition, charging habits, temperatures to which the battery is exposed, and use in digital mode will cause actual standby and usage time to vary. The amount of usage time used will impact the standby time. In the same way, the amount of time that the phone is in standby mode will impact the usage time.

Carrier Service Required with Family Share Plan® account with at least one line of service with the Chaperone subscription and one line of service with an LG Migo device with either the Chaperone or Chaperone with Child Zone subscription. Migo must be powered on, must be within the Verizon Wireless National Enhanced Services Rate and Coverage Area and must be accessible to satellites or cell sites to perform the location functions. Location accuracy is within 50 to 150 meters in most cases but may be affected by terrain, satellite visibility or other conditions. The Migo is typically located within 2 minutes, however, the duration may vary due to other factors such as atmospheric, environmental and geographic conditions, satellite location or other factors associated with use of satellites and satellite data, cell site location and information or other network conditions.
