Important Safety Precautions

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

⚠️ Warning

Violation of the instructions may cause serious injury or death.

- Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.

- Never place your phone in a microwave oven as it will cause the battery to explode.

- Never store your phone in temperatures less than -4°F or greater than 122°F.

- Do not dispose of your battery near fire or with hazardous or flammable materials.

- When riding in a car, do not leave your phone or set up the hands-free kit near the air bag. If wireless equipment is improperly installed and the air bag is deployed, you may be seriously injured.

- Do not use a hand-held phone while driving.

- Do not use the phone in areas where its use is prohibited. (For example: aircraft)
Important Safety Precautions

- Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.

- Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. This could cause a fire.

- Do not drop, strike, or shake your phone severely. It may harm the internal circuit boards of the phone.

- Do not use your phone in high explosive areas as the phone may generate sparks.

- Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause electric shock or fire.

- Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause electric shock or fire.

- Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

- Do not disassemble the phone.
• Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

• Do not hold or let the antenna come in contact with your body during a call.

• Make sure that no sharp-edged items, such as animal’s teeth or nails, come into contact with the battery. This could cause a fire.

• Store the battery out of reach of children.

• Be careful that children do not swallow any parts (such as earphone, connection parts of the phone, etc.) This could cause asphyxiation or suffocation resulting in serious injury or death.

• Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

• Only use the batteries and chargers provided by LG. The warranty will not be applied to products provided by other suppliers.

• Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.

• Your service provider programs one or more emergency phone numbers, such as 911, that you can call under any circumstances, even when your phone is locked. Your phone’s preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

Welcome

Thank you for choosing the Glance™ cellular phone designed to operate with the latest digital mobile communication technology, Code Division Multiple Access (CDMA). Along with the many advanced features of the CDMA system, such as greatly enhanced voice clarity, this compact phone offers:

- Built-in 1.3 Megapixel digital camera
- Mobile Web
- Sleek and Compact Design
- Large, easy-to-read, 8-line backlit LCD with status icons
- Media Center capable for Games, Pictures and Tunes & Tones downloads
- 17-key keypad and a directional Joystick.
- Long battery standby and talk time
- Easy operation using menu-driven interface with prompts
- Paging, messaging, Voicemail, caller ID, IM and chat
- Advanced Voice Command
- Quick calling functions including, auto answer, auto retry, 999 speed dials, and voice commands
- Flash Wallpaper with fun animations
- Bilingual (English and Spanish) Capability
- Bluetooth® wireless technology (for certain profiles)

**NOTE** The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by LG Electronics is under license. Other trademarks and trade names are those of their respective owners.

**NOTE** Find the interactive user guide on the web for your convenience where you can freely surf and interactively learn how to use your phone step-by-step. Go to http://www.verizonwireless.com/b2c/HowToControllerServlet?path=phoneGuides&manufacturer=LG&go=GO --> Browse Equipment Guides -> then choose your phone model -> then select Equipment Guide.
Important Information

This user’s guide provides important information on the use and operation of your phone. Please read this guide carefully prior to using the phone to be able to use your phone to its greatest advantage and to prevent any accidental damage or misuse. Any unapproved changes or modifications will void your warranty.

FCC Part 15 Class B Compliance

This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that causes undesired operation.

Information to User

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment under FCC rules.
Technical Details

The Glance™ is an all digital phone that operates on both Code Division Multiple Access (CDMA) frequencies: Cellular services at 800 MHz and Personal Communication Services (PCS) at 1.9 GHz.

CDMA technology uses a feature called DSSS (Direct Sequence Spread Spectrum) that enables the phone to keep communication from being crossed and to use one frequency channel by multiple users in the same specific area. This results in a 10-fold capacity increase when compared with analog mode. In addition, features such as soft / softer handoff, hard handoff, and dynamic RF power control technologies combine to reduce call interruptions.

The Cellular and PCS CDMA networks consist of MSO (Mobile Switching Office), BSC (Base Station Controller), BTS (Base Station Transmission System), and MS (Mobile Station).

* TSB -74: Protocol between an IS-95A system and ANSI J-STD-008 1xRTT system receives twice as many subscribers in the wireless section as IS-95. Its battery life is twice as long as IS-95.

The following table lists some major CDMA standards.

FCC RF Exposure Information

WARNING! Read this information before operating the phone.
In August 1996, the Federal Communications Commission (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to Radio Frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Bodily Contact During Operation
This device was tested for typical use with the back of the phone kept 0.79 inches (2 cm) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.79 inches (2 cm) must be maintained between the user’s body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Avoid the use of accessories that cannot maintain 0.79 inches (2 cm) distance between the user’s body and the back of the phone and have not been tested for compliance with FCC RF exposure limits.

Vehicle-Mounted External Antenna
(Optional, if available.)
To satisfy FCC RF exposure requirements, keep 8 inches (20 cm) between the user / bystander and vehicle-mounted external antenna. For more information about RF exposure, visit the FCC website at www.fcc.gov.

FCC Notice and Cautions
This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that causes undesired operation. Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment. Use only the
supplied antenna. Use of unauthorized antennas (or modifications to the antenna) could impair call quality, damage the phone, void your warranty and/or violate FCC regulations. Don't use the phone with a damaged antenna. A damaged antenna could cause a minor skin burn. Contact your local dealer for a replacement antenna.

**Part 15.105 statement**

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
1. **Earpiece**

   Lets you hear the caller and automated prompts.

2. **LCD Screen**

   Displays messages and indicator icons.

3. **Center Select Key / Directional Key**

   This key is a multifunctional “joystick-like” key. Use the Center Select Key (○) to select a field or option, by pushing in. Use the Directional Key (○) to scroll through the menu items and highlight a specific field or object by moving up, down, left or right.

4. **Left Soft Key**

   Use to access Messaging menu while in Standby mode. It also performs the functions indicated by the text on the display immediately above it.

5. **SEND Key**

   Use to make and answer calls.

6. **Alphanumeric Keypad**

   Use to enter numbers and characters and select menu items.

7. **International Call Prefix Key**

   To make an international call, press and hold (○) for 2 or 3 seconds. + is the international calling code.

8. **Camera Lens**

   Used to take a photo. Keep it clean for optimal photo quality.
Phone Overview

9. Right Soft Key Use to access Contact List while in Standby mode. It also performs the functions indicated by the text on the display immediately above it.

10. PWR / END Key Use to turn the power on/off and to end a call. Also returns to standby mode.

11. CLR / Voice Commands Key Deletes single spaces or characters with a quick press, but press and hold to delete entire words. Also backs out of menus, one level at a time. When in Standby mode, use for quick access to Voice Commands.

12. Vibrate Mode Key Use to set Vibrate mode (from standby mode press and hold for about 3 seconds).

13. Microphone Allows other callers to hear you clearly when you are speaking to them.

14. Keyguard Lock Key When pressed for 2 seconds, the keyguard lock is activated.

15. 2.5 mm Headset Jack Allows you to plug in an optional headset for convenient, hands-free conversations.

16. Side Keys / Volume Keys Up/Down Use to adjust the Master Volume in standby mode* and the Earpiece Volume during a call.

17. Speakerphone Key Use to change to speakerphone mode.

18. Accessory Charger Port Connects the phone to the battery charger, or other compatible accessory.

19. Camera Key Use for quick access to Camera function. Press the camera key to take pictures.

* Standby mode is when the phone is waiting for input from you. No menu is displayed and the phone isn’t performing any action. It’s the starting point for all of the instruction steps. This User Manual gives navigation instructions according to the default “Grid” Main Menu Layout in the Display Settings menu. If other themes or menus are set, navigating the phone’s menus may be different.

Rear view

NOTES • It’s important to fully charge the battery before using the phone for the first time.

• Battery life and signal strength are significant factors (among others) that affect your phone’s ability to send/receive calls.
Installing the Battery

1. Insert the bottom of the battery into the opening on the back of the phone.
2. Push the battery down until it clicks into place.
3. Align the top of the battery cover with the two slots on the phone, then press down on the bottom part of the battery until it clicks.

Removing the Battery

1. Turn the phone off. While pressing down on the button below the battery cover, lift the battery cover from the bottom.
2. Remove the battery from the battery compartment by lifting the top of the battery.

# Set-up Wizard

Some content in this user guide may differ from your phone depending on the phone software. Features and specifications are subject to change without prior notice.
Charging the Battery

Your Glance™ device comes with a cableless travel adapter and a USB data cable which are connected together to charge your phone. To charge your phone:

NOTICE Please use only an approved charging accessory to charge your LG phone. Improper handling of the charging port, as well as the use of an incompatible charger, may cause damage to your phone and void the warranty.

1. Connect the cableless wall adapter and USB data cable. When connecting as shown below, the LG logo on the USB cable should face toward you.

2. Gently uncover the accessory charging port, then plug the end of the AC adapter into the phone’s charger port and the other end into an electrical outlet.

3. The charge time varies depending upon the battery level.

NOTICE Please make sure that the LG logo faces down before inserting a charger or data cable into the charger port of your phone.
Getting Started with Your Phone

Charging with USB
You can use your computer to charge your phone. Connect one end of the USB cable to the charging accessory port on your phone and the other end to a high-power USB port on your PC.

**NOTE** Low power USB port is not supported, such as the USB port on your keyboard or bus-powered USB hub. USB driver should be installed before charging with USB.

Battery Temperature Protection
Though extremely rare, should the battery ever become overheated, the phone will automatically turn off. When you turn the phone back on, a message pops up alerting you that the phone was powered off for your safety.

Battery Charge Level
You can find the battery charge level at the top right of the LCD screen. When the charge level becomes low, the battery sensor sounds a warning tone, blinks the battery icon, and displays a warning message. As the charge level approaches empty, the phone automatically switches off without saving.

Signal Strength
Call quality depends on the signal strength in your area. You can tell how much signal strength you have by the number of bars next to the signal strength icon: the more bars, the stronger the signal. If you’re having problems with signal quality, move to an open area or, when inside a building, try moving near a window.

Turning the Phone On and Off

**Turning the Phone On**

1. Install a charged battery or connect the phone to an external power source.
2. Press (located above the key on the keypad) until the LCD screen lights up.

20  Glance
Turning the Phone Off

Unlock the screen, then press and hold $\text{END}$ until the display turns off.

Making Calls

1. Make sure the phone is turned on.
   If not, press $\text{END}$ for about three seconds.
   If necessary, enter the lock code.
2. Enter the phone number.
3. Press $\text{SEND}$.
4. Press $\text{END}$ to end the call.

NOTE Your phone has a Voice Commands feature that also lets you make calls by saying a phone number, name, or location.

Correcting Dialing Mistakes

Press $\text{CLR}$ once to erase the last digit entered, or hold it down for at least two seconds to delete all the digits.

Redialing Calls

Press $\text{SEND}$ twice to redial the last number dialed.

Receiving Calls

1. When the phone rings or vibrates, you can answer the call by pressing $\text{SEND}$.

NOTE If the Answer Options setting is set to Any Key, you can:
   - Press the Left Soft Key $\text{[Quiet]}$ to mute the ringing or vibration for that call. Press the Center Select Key $\text{[TXT]}$ to end the call or send quick text.
   - Press the Center Select Key $\text{[TXT]}$ to end the call or send quick text message.
   - Press the Right Soft Key $\text{[Ignore]}$ to end the call or send it directly to Voicemail.
2. Press $\text{END}$ to end the call.

Screen Icons

When the phone is on, the top line of the LCD screen displays phone status icons.

To see the icon glossary, go to $\text{MENU} \rightarrow \text{Settings & Tools} \rightarrow \text{Phone Info} \rightarrow \text{Icon Glossary}$ on your phone.
Quick Access to Convenient Features

**Vibrate Mode**
Sets the phone to vibrate instead of ring (.isPlaying) is displayed). To set Vibrate Mode, Press and hold Vibrate Mode. To return to Normal Mode, press and hold Vibrate Mode.

**Sounds Off**
Quickly deactivate your phone’s sounds when you’re in a place where phone sounds would be disruptive. From standby mode Press and hold the down side volume key for 3 seconds. To return to normal sounds mode, press and hold the up side volume key.

**Mute Function**
The Mute Function prevents the transmission of your voice to the caller. To quickly activate Mute while in a call, press the Left Soft Key Mute, then to unmute press the Left Soft Key Unmute.

**Volume Quick Adjustment**
Quickly adjust ringer and earpiece volumes by pressing the up side volume key on the left side of the phone to increase and down side volume key to decrease volume.

**NOTE**
The earpiece volume can only be adjusted during a call and keypad volume can only be adjusted through the Sounds Settings menu.

**Call Waiting**
During a call, one beep indicates another incoming call. Press SEND to answer it and put the first call on hold. Press SEND again to return to the first call.

**Caller ID**
Caller ID displays the number and/or name and/or picture if applicable of the person calling when your phone rings.

**Voice Commands**
Voice Commands allow you to do things by verbal command (e.g., make calls, check Voicemail, etc.). Press the Voice Commands Key (on the middle of the phone) and follow the prompts.

**NOTE**
Voice Commands can also be started with the designated key on your Bluetooth® device. Please check the manual of the Bluetooth® device for further instructions.
Text Input

The following key functions are available to help with text entry:

**Left Soft Key:** Press to change text input mode.

**Shift:** Press to change capitalization (initial cap, caps lock, lowercase).

**Next:** Press to change to other matching words in the database when in T9 mode. Also changes to other punctuation characters when inserting punctuation.

**Space:** Press to complete a word and insert a space.

**Clear:** Press to delete a single space or character. Hold to delete words.

**Punctuation:** Press to insert punctuation.

Text Input Modes

In a text field, press the Left Soft Key to display text input modes.

T9 Word/ Abc/ ABC/ 123/ Symbols
Contacts in Your Phone’s Memory

4. Use the Directional Key to highlight **Mobile 1/Home/Work/Mobile 2/Fax**, then press to save.

**From the Contact List Screen**

1. With the Keyguard unlocked, press the Right Soft Key **Contacts**.
2. Use the Directional Key to highlight an entry, then press the Left Soft Key **Edit**.
3. Use the Directional Key to highlight the phone number field to add, then enter the number and press to save.
Contacts in Your Phone’s Memory

Changing Saved Information
To edit any information you stored, access the Edit Contacts screen:

1. With the Keyguard unlocked, press the Right Soft Key [Contacts].
2. Use the Directional Key to highlight a Contact entry, then press the Left Soft Key [Edit].
3. Use the Directional Key to highlight the field you want to change.
4. Enter the changes, then press to save.

Adding a Pause to a Contact Entry

1. With the Keyguard unlocked, press the Right Soft Key [Contacts].
2. Use the Directional Key to highlight a Contact entry, then press the Left Soft Key [Edit].
3. Use the Directional Key to highlight the number, then press the Right Soft Key [Options].
4. Press Add 2-Sec Pause or Add Wait.
5. Enter additional number(s), then press .

Changing the Default Number

The Default Number is the first phone number you entered when you first created a the Contact. However, any number can be saved as the Default Number.

1. With the Keyguard unlocked, press the Right Soft Key [Contacts].
2. Use the Directional Key to highlight an entry.
3. Press the Left Soft Key [Edit].
4. Use the Directional Key to highlight a phone number, then press the Right Soft Key [Options].
5. Use the Directional Key to highlight Set As Default, then press .
6. Press Yes to set the new number as the default.
7. Press again to save.
Deleting

Deleting a Contact Entry
1. With the Keyguard unlocked, press the Right Soft Key [Contacts].
2. Use the Directional Key to highlight an entry.
3. Press the Right Soft Key [Options].
4. Press Erase. You will be able to mark additional entries to delete, then press the Left Soft Key [Done].
5. Press Yes to confirm.

Deleting a Speed Dial
1. With the Keyguard unlocked, press the Right Soft Key [Contacts].
2. Use the Directional Key to highlight a Contact entry to edit and press [VIEW].
3. Select the phone number with the Speed Dial, then press [EDIT].
4. Press the Right Soft Key [Options].
5. Press Remove Speed Dial.
6. Press Yes to confirm.
7. Press again to save.

Speed Dialing
Allows you to make phone calls quickly and easily to numbers stored in Contacts.

NOTE  Speed Dial 1 is for Voicemail. Speed Dial 411 is for Directory Assistance.

Single Digit Speed Dials
Press and hold the Speed Dial digit. Your phone recalls the phone number from your Contacts, displays it, and dials it for you.

Multiple Digit Speed Dials
To dial Speed Dials with multiple digits, press the first digit(s) as necessary, then press and hold the last digit. For example, to Speed Dial 25, press 2, then press and hold 5.

NOTE  You can also enter the Speed Dial digit(s), then press SEND.
Contacts in Your Phone’s Memory

**Speed Dials 95, 96, 97, 98, and 99**

Speed Dials 95, 96, 97, 98, and 99 are preset to access certain phone account information: 95 (#Warranty Center), 96(#Data), 97 (#BAL), 98 (#MIN), and 99 (#PMT). Unlike Speed Dial 1, these can be changed if you want.

**NOTE**  Set or Remove is not available for Speed Dial 411.
The Contacts Menu allows you to store names, phone numbers and other information in your phone’s memory.

**SHORTCUT** While in Standby mode, pressing the Right Soft Key is a shortcut to the CONTACT LIST

1. **New Contact**
   Allows you to add a new number to your Contact List.

   **NOTE** Using this submenu, the number is saved as a new Contact, not into an existing Contact.

   1. With the Keyguard unlocked, press [MENU].
   2. Press Contacts.
   3. Press New Contact.
   4. Enter the name and press the Directional Key downward.
   5. Use the Directional Key to highlight the different fields.
   6. Enter the information then press to save.

   **NOTE** For more detailed information, see page 23.

2. **Contact List**
   Allows you to view your Contact List.

   1. With the Keyguard unlocked, press [MENU].
   2. Press Contacts.
   3. Press Contact List.
   4. Use the Directional Key to highlight a contact, then:

   - Press the Right Soft Key [Options] to select one of the following:
     New Contact/Erase/ New TXT Message/ New Picture Message/ New Voice Message/ Set As ICE Contact/ Call/ Erase All/ Set As Favorite/ Send Name Card

   - Press the Left Soft Key [Edit] to edit.

   - Press to view the entry details.

   **TIP** Use the Go To field, for quick access to an entry without scrolling, by entering text with the keypad. For example, to go to "Vet", enter the letter V.
3. Backup Assistant

Backup Assistant safeguards your mobile phone’s address book and automatically saves a copy of the names, phone numbers, and email addresses stored in your phone. You can also view, print, add, delete, and edit your contacts online.

If you lose, damage, or upgrade your phone, Backup Assistant will restore your contact list to a new or replacement phone.

Additional fees may apply. See brochure for details.

NOTE To use the Backup Assistant service, you are required to activate the service from your phone.

1. With the Keyguard released by pressing the Left Soft Key [ ], then press [MENU].
2. Press  Contacts.
3. Press  Favorites.
4. Press [ADD], then again to mark a Contact entry to add.
5. Press the Left Soft Key  Done.

Once you have added Contacts to the Favorites list - the following options will become available in the Favorites menu:

- Left Soft Key : Call
- Center Select Key : MSG
- Right Soft Key : Options
- View/ Add/ Remove/ Send Name Card/ Move Position/ Set As ICE Contact/ Remove All

5. Groups

Allows you to view your grouped Contacts, add a new group, change the name of a group, delete a group, or send a message to everyone in the selected group.

1. With the Keyguard unlocked, press [MENU].
2. Press  Contacts.
• **View a Group**
  Use the Directional Key (욘) to highlight a group, then press (.)

• **Add a New Group**
  Press the Left Soft Key (좌드) [New] to add a new group to the list.

• **View the Options Available for a Group**
  Press the Right Soft Key (우드) [Options] to select one of the following:

  - New TXT Message/ New Picture Message/ New Voice Message/ Rename/ Erase Group/ Edit/ Send Name Card

6. **Speed Dials**

Allows you to view your list of Speed Dials or designate Speed Dials for numbers entered in your Contacts.

1. With the Keyguard unlocked, press (yon) [MENU].
2. Press 1 Contacts.
4. Use the Directional Key (yon) , or enter the Speed Dial digit, to highlight the Speed Dial position, then press (yon) [SET].

5. Use the Directional Key (yon) to highlight the Contact then press (yon) . (For Contacts with multiple numbers, highlight the number for the Speed Dial, then press (yon).)

6. Press (yon) Yes to confirm.

7. **In Case of Emergency (ICE)**

This menu allows you to store names, phone numbers and other information, which may be very helpful in case of emergency. It also allows you to add, read, edit, or erase Personal Info (in the form of Notes) which may also be useful in cases of emergencies.

**Adding an ICE Contact**

1. With the Keyguard unlocked, press (yon) [MENU].
2. Press 1 Contacts.
3. Press 7 In Case of Emergency.
4. Use the Directional Key (yon) to highlight Contact 1, 2, or 3, then press (yon) [ADD].
5. Press 1 to add Contact from your Contact List.
CONTACTS

Highlight the Contact, then press 

OR

Press 2abc to add Contact from Favorites.

Highlight the Contact, then press 

Press 3def to enter information not stored in your Contact List.

NOTE The generic Contact label changes to the specified name.

Entering Your ICE Personal Info

1. With the Keyguard unlocked, press [MENU].
2. Press Contacts.
3. Press In Case of Emergency.
4. Use the Directional Key to highlight Personal Info, then press .
5. Use the Directional Key to highlight one of the Note entries, then press .
6. Enter information that would be helpful in an emergency (e.g., your medical record number), then press .

TIP When you've assigned ICE Contacts and your phone is locked, the Left Soft Key appears as [ICE] allowing the emergency information to be viewed without unlocking the phone.

8. My Name Card

Allows you to have all of your personal Contact information including name, phone numbers, and email address in one entry.

1. With the Keyguard unlocked, press [MENU].
2. Press Contacts.
3. Press My Name Card.
4. Press [EDIT] to enter your personal Contact information.
5. Use the Directional Key to scroll to the fields you wish to edit.
6. Enter your information as necessary, then press .

NOTE Press the Right Soft Key [Send] to send your name card.
**MESSAGING**

**SHORTCUT**
When in Standby mode, pressing the Left Soft Key  is a shortcut to MESSAGING.

Text messages, Picture messages, and Voicemails are available in this menu. Depending on the type, content and size of your messages, the phone can store up to 540 messages. The information stored in the message is determined by phone model and service capability. Other limits may exist, please check with your service provider for system features and capabilities.

---

**New Message Alert**
Your phone will alert you when you have new messages.

1. The phone displays a message on the screen.

2. The message icon ( ) is displayed on the display screen. In the case of a high priority message, the icon ( ) will be displayed.

---

**1. New Message**
Allows you to send messages (Text, Picture, and Voice). Depending on the type you select to create, you can attach files to your messages including pictures, sounds, and name cards.

**Deleting Text/Number Entered**
When entering text or numbers, press to clear the last number, letter, or symbol. Press and hold CLR to clear the input field completely.

**Initiating a Phone Call From the Browser**
You can make a phone call from the Browser if the site you are using supports the feature (the phone number may be highlighted and the Left Soft Key appears as Call). The browser connection is terminated when you initiate the call. After you end the call, your phone returns to the screen from which you initiated the call.
5. Browse & Download

Everything you need to know while you’re on the go.

1. With the Keyguard unlocked, press [MENU].
2. Press MEDIA CENTER.
4. Press Get New Applications or highlight one of the pre-installed applications and press .

6. Extras

1. With the Keyguard unlocked, press [MENU].
2. Press MEDIA CENTER.
3. Press Extras.
From the My Pictures gallery, you can view, manage and edit the pictures saved onto your phone. You can also take and send pictures from your friends and family or use them as Picture ID or Wallpaper images. Please see the My Pictures section on page 51.

1. With the Keyguard released by pressing the Left Soft Key [ ], then press [MENU].

The VZ Navigator Menu allows you to get directions to locations when you’re out and about. Now you can find the address of a great restaurant or the nearest ATM, Check movie times, Discover the latest hot spots, and know exactly how to get where you’re going. VZ Navigator puts all the advanced features of the latest GPS devices and systems on your wireless device — at a fraction of the price. Some of the features included are:

- Voice-prompted turn-by-turn directions with auto-rerouting if you miss a turn
- View detailed color maps that can be panned and zoomed
- Find points of interest

1. With the Keyguard unlocked, press [MENU].
2. Press VZ Navigator.

**NOTE**
- To use VZ Navigator, you must turn location on. (See page 80)
- Download, subscription and airtime required for use; only in National Enhanced Service Coverage Area: accuracy and completeness of information is not guaranteed; information about location of device will be used to deliver service.
BLUETOOTH

The Glance™ is compatible with devices that support the Headset, Handsfree, Phonebook Access and Object Push for vCard & vCal. You may create and store 20 pairings within the Glance™ and connect to one device. The approximate communication range for Bluetooth® wireless technology is up to 30 feet (10 meters).

Bluetooth® QD ID B015119

NOTE  Read the user guide of each Bluetooth® accessory that you are trying to pair with your phone because the instructions may be different.

NOTE  Your phone is based on the Bluetooth® specification, but it is not guaranteed to work with all devices enabled with Bluetooth® wireless technology. Phone does not support ALL Bluetooth® OBEX Profiles.* For vehicle/accessory compatibility go to www.verizonwireless.com/bluetoothchart.

TIPS  ● HEADSET: Supports use of a compatible Bluetooth® headset for mono voice.
      ● HANDSFREE: Supports Bluetooth® headsets, and may also support other installed compatible Bluetooth® devices with speakerphone capabilities, such as car kits or a conference room device. For Handsfree Car Kit Compatibility, refer to www.verizonwireless.com/bluetoothchart on the Verizon Wireless website.

      ● PHONEBOOK ACCESS: Allows sharing of your name card, phonebook entries, and call history with a compatible Bluetooth® device.

      ● OBJECT PUSH: Allows sending and receiving of contact name cards, calendar events and to do.

1. With the Keyguard unlocked, press [MENU].

2. Press Bluetooth.
1. My Verizon

Check your subscription information ranging from your payment plan to your software upgrade or other available service.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.

Shortcut

Pressing the Directional Key upward from standby mode is a hot key to My Verizon by default.

2. Tools

Your phone tools include Voice Commands, Calculator, Ez Tip Calculator, Calendar, To Do List, Alarm Clock, Info Search, Stopwatch, World Clock, and Notepad.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.

2.1 Voice Commands

This feature provides you with the following options equipped with AVC (Advanced Voice Commands System) technology. Each option has its detailed information on the phone and you can check it out by pressing the Left Soft Key [Info].

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.

Access and Options

The Voice Commands feature has several settings which allow you to customize how you want to use it.

1. Press the Voice Commands Key (on the middle of the phone).
2. Press the Right Soft Key [Settings].

Confirm Choices

Automatic/Always Confirm/Never Confirm
Sensitivity  Control the sensitivity as More Sensitive/ Automatic/ Less Sensitive.

Adapt Voice  If the phone often asks you to repeat voice command, train the phone to recognize your voice patterns. Train Words/ Train Digits.

Prompts  Mode/ Audio Playback/ Timeout
For Mode, set Prompts/ Readout + Alerts/ Readout/ Tones Only. For Audio Playback, set Speakerphone or Earpiece. For Timeout, set 5 seconds or 10 seconds.

CLR Key Activation  If set to On, this setting allows you to activate Voice Command feature with CLR key from Main Screen.

2.1.1 Call <Name or Number>
Say "Call" and then call someone simply by saying the name or phone number. Please speak clearly and say the name or number exactly as it is entered in your Contact List. When you have more than one contact number, you can state the name and number type of the contact (for example, 'Call John Work').

2.1.2 Send Msg to <Name or Number>
Say "Send Message" and the command will prompt you for the type of message. After choosing the message type, you will be prompted for the contact name, number or group. It will automatically start a message. If you say a full-sentence command, such as 'Send Picture Message to Bob', it will automatically start a picture message. When using 'Send Message' command, speak clearly and say the name, number or group exactly as it is entered in your Contact List.

2.1.3 Go to <Menu>
The 'Go to' command allows you to access a menu within the phone (for example, 'Go to Calendar'). If no menu option is stated, a list of options will be provided.

2.1.4 Check <Item>
The ‘Check’ command allows you to check out a wide range of items such as Phone Status, Voicemail, Messages, Missed Calls, Time, Signal Strength, Battery Level, Volume, Balance, Minutes, Payment and My Number.
2.1.5 Contacts <Name>
You can look up names in your Contacts (for example, 'Contacts John') as well as manage your Contact List including call, creating, erasing or modifying. There are more Contacts options available. Say 'Contacts' and you will be prompted for one of the following: Call/ Read out/ Create New/ Modify/ Erase

2.1.6 Redial
To make a call to the last number that you called, say, 'redial'.

2.1.7 My Verizon
The 'My Verizon' command provides you with direct access to your Verizon Wireless account information.

2.1.8 Help
Provides a general guideline to using Voice Commands.

2.2 Calculator
Allows you to perform simple mathematical calculations. You can enter numbers up to eight digits and the sixth decimal place.

1. With the Keyguard unlocked, press [MENU].
3. Press 2 abc Tools.
4. Press 2 abc Calculator.
5. Enter the numbers to get the value you want. To clear the values entered, press the Left Soft Key [Clear].
6. Use the Right Soft Key [Operators] to add parenthesis or power among numbers for calculation.
7. Use the Directional Key to enter the operations as displayed on the screen and press [ = ] for the result.

NOTE To insert a decimal, press . To insert ±, press .

2.3 Ez Tip Calculator
Allows you to quickly and easily calculate bill amounts using the bill total, tip % and number of people as variables.

1. With the Keyguard unlocked, press [MENU].
3. Press 2 abc Tools.
4. Press 3 def Ez Tip Calculator.
5. Enter the variable fields (Total bill, Tip (%), Split) and the corresponding calculation fields (tip and total for each person) appear automatically.

6. Press the Left Soft Key [Reset] for another calculation.

2.4 Calendar

Allows you to keep your agenda convenient and easy to access. Simply store your appointments and your phone will alert you with the optional reminder.

To Create a New Calendar Event

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Calendar.
5. Use the Directional Key to highlight a scheduled day.
   Left : Previous Day
   Right : Next Day
   Up : Previous Week
   Down : Next Week
5. Press the Left Soft Key [Add].
6. Press the Left Soft Key [Add].
7. Enter Subject, then scroll down to set remaining settings.
8. Highlight a Calendar setting field, then press the Left Soft Key [Set]. For each Calendar event you can set:
   • Start Date
   • End Date
   • Repeat
   • Alerts
   • Vibrate
   • Start Time
   • End Time
   • Until
   • Tones
9. Press [SAVE] when Calendar information is complete.
2.5 To Do List
Allows you to create a To Do list.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press To Do List.
5. Press the Left Soft Key [Add].
6. Enter Subject.
7. Highlight the Due Date field, then press the Left Soft Key [Date]. Use the keypad to enter the date (for example, press to select June). The press the Right Soft Key [More] for the following options:
   - Start Date
   - Priority
   - Alert Date
   - Tones
8. Press [SAVE].

2.6 Alarm Clock
Allows you to add up to ten alarms. At the alarm time, your Alarm will be displayed on the LCD screen and the alarm will sound.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Alarm Clock.
5. Press the Left Soft Key [Add] to create a new alarm or use the Directional Key to highlight an Alarm, then press .
6. Use the Directional Key to highlight the information you want to set, then press the Left Soft Key [Set] to view your setting choices. Enter the alarm information including:
   - Turn On/Off
   - Set Time
   - Repeat
   - Ringtone
7. Press [SAVE] after setting all of the Alarm fields as necessary.

NOTE At the Alarm time, you can choose to Snooze or Dismiss the Alarm.

2.7 Info Search
Allows you to search information stored on the phone.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Info Search.
5. Press [SEARCH] or the Right Soft Key [Options].

Last Search/ Cancel

2.8 Stopwatch

Allows you to use your phone as a typical stopwatch. Pressing will start and stop Stopwatch time. While measuring time, press the Left Soft Key [Lap] to save lap times. After you've stopped the Stopwatch, reset by pressing the Right Soft Key [Reset].

1. With the Keyguard unlocked, press [MENU].
2. Press 9 wxyz Settings & Tools.
3. Press 2 abc Tools.
4. Press 8 tuv Stopwatch.

2.9 World Clock

Allows you to determine the current time in another time zone or country by navigating with the Directional Key to the right or left.

1. With the Keyguard unlocked, press [MENU].
2. Press 9 wxyz Settings & Tools.
3. Press 2 abc Tools.
4. Press 8 tuv World Clock.
5. Press the Right Soft Key [Cities] for a list of available cities.
6. Select a city from the list, then press . The display shows the position of the city on a global map.
7. Press again to zoom in on the city and view its date and time information.

NOTE With the Left Soft Key [Set DST], set to Daylight Savings Time.

2.0 Notepad

Allows you to add, read, edit, and erase notes to yourself.

1. With the Keyguard unlocked, press [MENU].
2. Press 9 wxyz Settings & Tools.
3. Press 2 abc Tools.
4. Press 0 next Notepad.
5. Press the Left Soft Key [Add] to write a new note.
6. After entering the note, press to save it.
3. Bluetooth® Menu

3.1 Add New Device

Pairing is the process that allows the handset to locate, establish, and register 1-to-1 connection with the target device.

3.1.1 For pairing with a new Bluetooth® device

1. Follow the Bluetooth® accessory instructions to set the device to pairing mode.

2. With the Keyguard unlocked, press [MENU].

3. Press Settings & Tools.

5. Press Add New Device.
   Set the desired device to pairing.

6. If Bluetooth® power is set to off, you will be prompted to turn power on. Highlight Yes and press .

7. The device will appear in Add New Device menu once it has been located. Highlight the device and press [PAIR].

8. The handset will prompt you for the passcode. Consult the Bluetooth® accessory instructions for the appropriate passcode (typically “0000” - 4 zeroes). Enter the passcode and press . When Auto Pair Handsfree is set to On, the device will try to autopair for headset.

9. When pairing with the Computer, PC or PDA is successful, highlight either Always Ask or Always Connect and press to connect with the device.

10. Once connected, you will see the device listed in the Bluetooth® Menu and Bluetooth® indicator will change to the will show up on your screen when connected to the Bluetooth® device. You can also check out the connection with a blue icon on the list.

3.1.2 Icon Reference in Adding New Device

When the Bluetooth® wireless connection is built and paired devices are found, the following icons are displayed.
**Icon References When a Bluetooth® Wireless Connection is Searched** (neither connected nor paired).

3. Press Sounds Settings.
4. Press Alert Sounds.
5. Select TXT Message/ Multimedia Message/ Voicemail/Emergency Tone/ Missed Call
6. The Alert Sounds menu has these options:
   Tone/ Vibrate/ Reminder
The exception for this is the Emergency Tone menu. This menu has these options:
Alert/ Vibrate/ Off

5.5 Keypad Volume
Allows you to set the keypad volume.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Sounds Settings.
5. Adjust the volume with the Directional Key then press [SET] to save the setting.

5.6 Digit Dial Readout
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Sounds Settings.
5. Use the Directional Key to highlight a setting, then press [OK].

5.7 Service Alerts
Allows you to set any of the four Alert options to either On or Off.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Sounds Settings.
4. Press Service Alerts.
5. Select an alert option.
   ERI Alerts you to the status of cellular service.
   ERI: Enhanced Roaming Indicator
   Minute Beep Alerts you 10 seconds before the end of every minute during a call.
   Call Connect Alerts you when the call is connected.
   Charge Complete Alerts you when the battery is completely charged.
6. Use the Directional Key to highlight a setting, then press [OK].
   On/ Off
5.8 Power On/Off

Allows you to set the phone to sound a tone when the phone is powered on/off.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Sounds Settings.
5. Select Power On/ Power Off.
6. Use the Directional Key to highlight a setting, then press [OK].

5.9 Voice Clarity

Allows you to set the phone to automatically adapt to noisy environments by adjusting the listening level and improving speech intelligibility.

**NOTE** The Voice Clarity feature is automatically disabled when you use the speakerphone or the hands-free devices.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Sounds Settings.
4. Press Voice Clarity.
5. Use the Directional Key to scroll to a setting, then press [OK].

6. Display Settings

Provides options to customize the phone’s display screen.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Easy Set-up.

6.1 Easy Set-up

Allows you to easily set the Display Settings.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Easy Set-up.
6.2 Banner

Allows you to enter a string of up to 23 characters which displays on the LCD screen.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Banner.

6.2.1 Personal Banner

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Banner.
5. Press Personal Banner.
6. Enter your own banner text.

NOTE Press the Directional Key to change the color of the text. Use the to select the color you want.
Black/ White/ Yellow/ Orange/ Red/ Brown/ Blue/ Green/ Sky Blue

6.2.2 ERI Banner

If you use ERI Service, ERI Text is shown on the sub banner.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Banner.
5. Press ERI Banner.
6. Use the Directional Key to highlight a setting, then press [OK].

6.3 Backlight

Allows you to set the duration for illuminating the backlight. Display and Keypad are set separately.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Banner.
5. Press Personal Banner.
6. Enter your own banner text.

NOTE Press the Directional Key to change the color of the text. Use the to select the color you want.
Black/ White/ Yellow/ Orange/ Red/ Brown/ Blue/ Green/ Sky Blue
**6.4 Brightness**

Allows you to set the brightness levels.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Brightness.
5. With the , set the brightness level and press [OK].

**6.5 Wallpaper**

Allows you to choose the kind of background to be displayed on the phone’s LCD in standby mode.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
5. Highlight a Wallpaper submenu and press .

**My Pictures/ Fun Animations**

6. Use the Directional Key to browse the pictures, then press [OK] to select a picture.
7. Zoom in or out is available using the Soft Keys, then press to set.

**6.6 Display Themes**

Allows you to choose between the different themes for the phone’s menus.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Display Themes.
5. Use the Directional Key to highlight a setting, then press .

**White/ Glance/ Gold Square**

**NOTE** Press the Left Soft Key [Preview] to preview the selected display theme.
6.7 Main Menu Settings

Allows you to choose how the Main Menu displays for menu selection.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Main Menu Settings.
5. Use the Directional Key to highlight a setting, then press [OK].

Menu Layout/ Replace Menu Items/ Position Menu Items/ Reset Menu Settings

1. Menu Layout
   TAB/ LIST/ GRID
2. Replace Menu Items
   Select the item you want to replace then press "Edit". Select in the list the item you want to replace it with, then press "Set".
3. Position Menu Items
   Select the item you want to move, then press "MOVE". Move highlight to desired position by pressing Up, Down, Right and Left Directional Keys, then press "SWAP".
4. Reset Menu Settings
   Menu Layout/ Menu Items/ Item Positions/ All

6.8 Menu Font Type

Allows you to set the font type.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Menu Font Type.
5. Use the Directional Key to scroll to a setting, then press.

VZW Font/ LG Edge/ LG Script

NOTE Press the Left Soft Key [Preview] to preview the selected menu font type.

6.9 Font Size

Allows you to set the Dial Digits font size, Menu & Lists font size, and Message font size. This setting is helpful for those who need the text to display a little bit larger.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Font Size.
5. Use the Directional Key to select Dial Digits/ Menu & Lists/ Message.
6. Press the Left Soft Key [Set].

7. Use the Directional Key to highlight a setting, then press.

Dial Digits: Large/ Medium/ Small

Message: Normal/ Large

6.0 Clock Format
Allows you to choose the kind of clock to be displayed on the LCD Screen.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
4. Press Clock Format.
5. Highlight a Clock Format submenu and press.
Small Digital 12/ Small Analog/
Large Analog/ Large Digital 12/
Large Digital 24/ Dual City/ Off
6. Use the Directional Key to highlight a setting, then press.

**NOTE** Press the Left Soft Key [Preview] to preview the selected clock format.

7. Phone Settings
The Phone Settings Menu allows you to designate specific settings to customize how you use your phone.

7.1 Airplane Mode
Turning on Airplane Mode will disable all wireless communications.

1. With the Keyguard unlocked, press [MENU].
2. Press [Settings & Tools].
3. Press [Phone Settings].
4. Press [Airplane Mode].
5. Use the Directional Key to highlight a setting, then press [OK].

7.2 Set Shortcuts
Allows you to set shortcuts to phone menus using the down, up, left and right Directional Key.

7.2.1 Set My Shortcuts
To access these shortcuts, press the Directional Key when in Standby mode to display your four shortcuts.

1. With the Keyguard unlocked, press [MENU].
2. Press \[9\] Settings & Tools.
3. Press \[7\] Phone Settings.
4. Press \[2\] Set Shortcuts.
5. Press \[1\] Set My Shortcuts.
6. Use the Directional Key \(\odot\) to highlight a shortcut key you want to set.

Shortcut 1/ Shortcut 2/ Shortcut 3/ Shortcut 4
7. Press \(\odot\) to display the available shortcuts. Use the Directional Key \(\odot\) to select one, then press \[OK\].

7.2.2 Set Directional Keys
To access these shortcuts, press the Directional Key to access the option that you configured for that specific directional key.
1. With the Keyguard unlocked, press \(\odot\) [MENU].
2. Press \[9\] Settings & Tools.
3. Press \[7\] Phone Settings.
4. Press \[2\] Set Shortcuts.
5. Press \[2\] Set Directional Keys.
6. Use the Directional Key \(\odot\) to highlight a shortcut key you want to set.

Up Directional Key/ Left Directional Key/ Down Directional Key
7. Press \(\odot\) to display the available shortcuts. Use the Directional Key \(\odot\) to select one, then press \(\odot\) [OK].

7.3 Voice Commands
1. With the Keyguard unlocked, press \(\odot\) [MENU].
2. Press \[9\] Settings & Tools.
3. Press \[7\] Phone Settings.
4. Press \[3\] Voice Commands.

Confirm Choices  Automatic / Always Confirm/ Never Confirm
Sensitivity  Control the sensitivity as More Sensitive/ Automatic/ Less Sensitive
Adapt Voice  If the phone often asks you to repeat voice command, train the phone to recognize your voice patterns.
Train Words/ Train Digits
Prompts Mode/ Audio Playback/Timeout
- For Mode: set Prompts/ Readout + Alerts/ Readout/ Tones Only.
- For Audio Playback: set
7.4 Language
Allows you to use the bilingual (English or Spanish) feature according to your preference.

1. With the Keyguard unlocked, press [OK] [MENU].
2. Press 9 Settings & Tools.
3. Press 7 Phone Settings.
4. Press 4 Language.
5. Use the Directional Key [OK] to highlight a setting, then press [OK].

English/ Español

7.5 Location
Allows you to set the GPS (Global Positioning System: Satellite assisted location information system) mode.

1. With the Keyguard unlocked, press [MENU].
2. Press 9 Settings & Tools.
3. Press 7 Phone Settings.
4. Press 5 Location.
5. Use the Directional Key [OK] to highlight a setting, then press [OK].

Location On/ E911 Only

NOTES
• GPS satellite signals are not always received by the phone, especially under bad atmospheric and environmental conditions, indoors, etc.
• When a Location Setting Restriction is activated in the Security Menu, the lock code is required when you enter location menu. The lock code is the same 4 digits you use as your device lock code; the default is the last 4 digits of your phone number.
• When in Airplane Mode, services supporting Location On functionality (such as Chaperone) will be suspended.
7.6 Current Country
The Current Country menu allow to select your current location.
1. With the Keyguard unlocked, press \(\# [\text{MENU}]\).
2. Press 9wxs Settings & Tools.
3. Press 7pqs Phone Settings.
5. Use the Directional Key \(\circ\) to highlight a setting, then press \(\circ [\text{OK}]\).

**NOTE** To assure that your phone works properly while you travel, please verify the country of your current location, so the correct Country Code can be applied.

7.7 Security
The Security menu allows you to secure the phone electronically.
1. With the Keyguard unlocked, press \(\# [\text{MENU}]\).
2. Press 9wxs Settings & Tools.
3. Press 7pqs Phone Settings.
5. Enter the four-digit lock code. The lock code is the last 4 digits of your mobile phone number if the number is set.
   The lock code is the last 4 digits of your MEID if your mobile phone number is not set.

7.7.1 Edit Codes
Allows you to enter a new four-digit lock code.
1. With the Keyguard unlocked, press \(\# [\text{MENU}]\).
2. Press 9wxs Settings & Tools.
3. Press 7pqs Phone Settings.
5. Enter the four-digit lock code.
6. Press 1\# Edit Codes.
7. Select Phone Only or Calls & Services.
8. Enter your new four-digit lock code.
9. For confirmation, it will ask you to enter the new lock code again.
7.7.2 Restrictions
Allows you to set separate restrictions for Location Setting, Calls and Messages.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
5. Enter the four-digit lock code.
6. Press Restrictions.
7. Enter the four-digit lock code.
8. Browse the sub-menus in the Restrictions menu then press [OK].

Location Setting/ Calls/ Messages

9. Use the Directional Key to highlight the option then press [OK].

Location Setting  Lock Setting/ Unlock Setting
Calls: Incoming Calls  Allow All / Contacts Only / Block All
Calls: Outgoing Calls  Allow All / Contacts Only / Block All

Messages: Incoming Messages  Allow All / Block All
Messages: Outgoing Messages  Allow All / Block All

7.7.3 Phone Lock
Keeps your phone from unauthorized use. Once the phone is locked, it’s in restricted mode until the lock code is entered. You can still receive phone calls and make emergency calls. You can modify the lock code using Edit Codes submenu within the Security menu.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
5. Enter the four-digit lock code.
6. Press Phone Lock.
7. Highlight an option then press [OK].

Unlocked  The phone is never locked (Lock mode can still be used).
On Power Up  The phone is locked when it is turned on.
7.7.4 Lock Phone Now
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
5. Enter the four-digit lock code.
6. Press Lock Phone Now.

7.7.5 Reset Default
Allows you to reset your phone to the factory default settings.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
5. Enter the four-digit lock code.
6. Press Reset Default.
7. Press after reading the warning message.
8. Select Revert by pressing [OK].

A confirmation message is displayed briefly before the phone resets itself.

7.7.6 Restore Phone
Allows you to erase all user data and Contact information you've entered in the phone's memory so it's as if it just left the factory.
1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
5. Enter the four-digit lock code.
6. Press Restore Phone.
7. Press after reading the warning message.
8. Enter the four-digit lock code.

A confirmation message is displayed briefly before the phone resets itself.
7.8 System Select

Allows you to set up the phone management environment. Leave this setting as the default unless you want to alter system selection as instructed by your service provider.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
4. Press System Select.
5. Use the Directional Key to highlight a setting, then press [OK].

Home Only: You can make/receive call in home network only.
Automatic (Automatic A / Automatic B): You can make/receive call in home or roam network. The roaming rate applies when not in the home service area.
( Depending on the available network, the options may differ between Automatic or Automatic A/ Automatic B.)

7.9 NAM Select

Allows you to select the phone’s NAM (Number Assignment Module) if the phone is registered with multiple service providers.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Settings.
4. Press NAM Select.
5. Use the Directional Key to highlight a setting, then press [OK].

NAM1/ NAM2
8. Call Settings
The Call Settings Menu allows you to designate how the phone handles both incoming and outgoing calls.

8.1 Answer Options
Allows you to determine how the phone will answer an incoming call.
1. With the Keyguard unlocked, press [MENU].
2. Press 9 wxy Settings & Tools.
3. Press 8 tuv Call Settings.
4. Press 1 2 Answer Options.
5. Use the Directional Key to mark the setting(s) you want to use, then press .

Any Key/ Auto with Handsfree
6. Press the Left Soft Key [Done] when you have marked the setting(s) you want.

NOTE Auto with Handsfree is available when any external device is connected to your phone or speaker is set to on.

8.2 Auto Retry
Allows you to set the length of time the phone waits before automatically redialing a number when the attempted call fails.
1. With the Keyguard unlocked, press [MENU].
2. Press 9 wxy Settings & Tools.
3. Press 8 tuv Call Settings.
4. Press 2 abc Auto Retry.
5. Use the Directional Key to highlight a setting, then press [OK].

Off/ Every 10 Seconds/ Every 30 Seconds/ Every 60 Seconds

8.3 TTY Mode
Allows you to attach a TTY device enabling you to communicate with parties also using a TTY device. A phone with TTY support is able to translate typed characters to voice. Voice can also be translated into characters and then displayed on the TTY.
1. With the Keyguard unlocked, press [MENU].
2. Press 9 wxy Settings & Tools.
3. Press 8 tuv Call Settings.
4. Press \[\texttt{TTY Mode}\].
   An explanation message is displayed.

5. Press \(\texttt{\#}\) to continue.

6. Use the Directional Key \(\texttt{\#}\) to highlight a setting, then press \(\texttt{\#}\) [OK].

   **TTY Full/ TTY + Talk/ TTY + Hear/ TTY Off**

   **TTY Full:** Users who cannot talk or hear send and receive a text message through TTY equipment.

   **TTY + Talk:** Users who can talk but cannot hear receive a text message and send voice through TTY equipment.

   **TTY + Hear:** Users who can hear but cannot talk send a text message and receive voice through TTY equipment.

   **TTY Off:** Users send and receive without TTY equipment.

### TTY Mode (Tele Type writer)

Connecting TTY Equipment and a Terminal

1. Connect a TTY cable to TTY connection on the terminal (TTY connection location is the same as a headset jack).
2. Enter the phone menu and set the desired TTY mode.
3. After setting a TTY mode, check the LCD screen of the phone for the TTY icon.
4. Connect the TTY equipment to the power source and turn it on.
5. Make a phone connection to the desired number.
6. When connection is made, use the TTY equipment to type in and send a text message or send voice.
7. The voice or text message from the receiver end displays on the TTY equipment display.

8.4 One Touch Dial

Allows you to initiate a speed dial call by pressing and holding the speed dial digit. If set to Off, Speed Dial numbers designated in your Contacts will not function.

1. With the Keyguard unlocked, press [MENU].
5. Use the Directional Key to highlight a setting, then press [OK].

On/ Off

8.5 Voice Privacy

Allows you to set additional voice privacy for CDMA calls. By default, CDMA already offers inherent voice privacy. Check with your service provider for availability.

1. With the Keyguard unlocked, press [MENU].
5. Use the Directional Key to highlight a setting, then press [OK].

On/ Off
8.6 DTMF Tones
Allows you to set the DTMF tone length.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Call Settings.
4. Press DTMF Tones.
5. Use the Directional Key to highlight a setting, then press [OK].

Normal/ Long

8.7 Assisted Dialing
Allows easy dialing of international calls while roaming in another country. If Set to On, Assisted Dialing is displayed in calling screen.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Call Settings.
4. Press Assisted Dialing.
5. Use the Left and Right Directional Key to highlight a setting, then press [OK].

On/ Off

6. Highlight the Reference Country and press Left Soft Key Set to select country.
7. Use the Directional Key to scroll to the desired country.
8. Press Left Soft Key Details to edit and save the country code, IDD Prefix(International Direct Dial), NDD Prefix(National Direct Dial), Area/City Code and Length(Length of Phone Number), then press [SAVE] to set.

NOTE Ex.> A device in a China is trying to reach a U.S. number, 201-555-5555 (Reference Country is U.S.A.) replace ‘+’ code with IDD prefix for China.
User Enters: +1-201-555-5555, Assisted Dialing enters: : 00-1-201-555-5555

8.8 Dial Search
You can view contacts information on dial screen by predictive text entry method.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Call Settings.
5. Use the Directional Key to highlight a setting, then press [OK].

On/ Off

9. Joystick Settings
Allows you to customize vibration level or vibration type of Joystick.

1. With the Keyguard unlocked, press [MENU].

2. Press Settings & Tools.

4. Use the Directional Key to select Vibration Level or Vibration Type, then press Left Soft Key Set.

Vibration Level: High/ Low/ Off

Vibration Type: Short/ Long/ Double

5. Press [OK] to select a setting and then again to save the Joystick Settings.

0. Memory
Allows you to check your Glance™ internal phone memory. Shows the memory information in your phone.

1. With the Keyguard unlocked, press [MENU].

2. Press Settings & Tools.

3. Press Memory.

4. Use the Directional Key to select file storage type in the Glance™, then press [OK] to view the memory used.

Memory Usage / My Pictures / My Sounds

*. Phone Info
Allows you to view the information specific to your phone and software.

1. With the Keyguard unlocked, press [MENU].

2. Press Settings & Tools.

3. Press Phone Info.
**SETTINGS & TOOLS**

*.1 My Number*
Allows you to view your phone number.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Info.
4. Press My Number.

*.2 SW/HW Version*
Allows you to view the versions of various applications such as SW, PRL, ERI, Browser, Media Center, AVR, MMS, Bluetooth®, OTADM, MSUI, HW, ESN and Warranty Date Code.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Info.

*.3 Icon Glossary*
Allows you to view all the icons and their definitions.

1. With the Keyguard unlocked, press [MENU].
2. Press Settings & Tools.
3. Press Phone Info.
4. Press Icon Glossary.

*.4 Software Update*
This feature gives your phone the ability to upgrade to the latest software and keeps your phone operating with the latest features without visiting a Verizon Wireless Communications Store for the upgrade. You can either be notified automatically that there is an updated version of software available for your phone, or you can manually check to see if there are any updates available for you to download.
**Automatic Update**

Your phone will receive a notification that there is an updated version of software available to be downloaded. You can press \( \text{ } \) when notified that a download is available or it can happen automatically. Once the download is complete you may, depending on the nature of the update, have three options available: Accept the update, Defer the update, or Reject the update.

**NOTE** During the update you cannot make or receive phone calls, including 911 calls, or text messages.

**Manual Update**

1. With the Keyguard unlocked, press \( \text{ } \) [MENU].
2. Press \( \text{ } \) Settings & Tools.
3. Press \( \text{ } \) Phone Info.
4. Press \( \text{ } \) Software Update.

The two options shown will be **Status** and **Check New**.

Press \( \text{ } \) Status to see the status of a download or update and see information on the last successful update. If updates have not yet been performed, status information will be unavailable.

Press \( \text{ } \) Check New to check if any new software updates are available to download. If a newer software version is available, it will automatically begin downloading after 30 seconds or you can begin the download immediately by pressing \( \text{ } \). To stop the software download press the \( \text{ } \) or \( \text{ } \) Key.

#. **Set-up Wizard**

This Wizard will guide you through the most commonly used personalization options. This way you can set your phone up quickly and easily.

1. With the Keyguard unlocked, press \( \text{ } \) [MENU].
2. Press \( \text{ } \) Settings & Tools.
3. Press \( \text{ } \) Set-up Wizard.
The following is the complete TIA Safety Information for wireless handheld phones.

Exposure to Radio Frequency Signal

Your wireless handheld portable phone is a low power radio transmitter and receiver. When ON, it receives and sends out Radio Frequency (RF) signals.

In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- ANSI C95.1 (1992) *
- NCRP Report 86 (1986)
- ICNIRP (1996)

* American National Standards Institute; National Council on Radiation Protection and Measurements; International Commission on Non-Ionizing Radiation Protection

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards).

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

Phone Operation

NORMAL POSITION: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.
**Tips on Efficient Operation**

For your phone to operate most efficiently:

Don’t touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

**Driving**

Check the laws and regulations on the use of wireless phones in the areas where you drive and always obey them. Also, if using your phone while driving, please observe the following:

- Give full attention to driving -- driving safely is your first responsibility;
- Use hands-free operation, if available;
- Pull off the road and park before making or answering a call if driving conditions or the law require it.

**Electronic Devices**

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

**Pacemakers**

The Health Industry Manufacturers Association recommends that a minimum separation of six (6) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:

- Should ALWAYS keep the phone more than six (6) inches from their pacemaker when the phone is turned ON;
- Should not carry the phone in a breast pocket;
- Should use the ear opposite the pacemaker to minimize the potential for interference;
- Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.
Hearing Aids
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

Other Medical Devices and Health Care Facilities
If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from the external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to the external RF energy.

Vehicles
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Aircraft
FCC regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

Blasting Areas
To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio”. Obey all signs and instructions.

Potentially Explosive Atmosphere
Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always marked clearly. Potential areas may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities;
vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

**For Vehicles Equipped with an Air Bag**
An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

**Safety Information**
Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all times after reading it.

⚠️ **Caution**: Violation of the instructions may cause minor or serious damage to the product.

- Do not disassemble or open crush, bend or deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per IEEE-Std-1725-2006. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725-2006. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
Safety

- Promptly dispose of used batteries in accordance with local regulations.
- Battery usage by children should be supervised.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazard.
- The phone shall only be connected to USB products that bear the USB-IF logo or have completed the USB-IF compliance program.

Charger and Adapter Safety

- The charger and adapter are intended for indoor use only.
- Insert the battery pack charger vertically into the wall power socket.
- Only use the approved battery charger. Otherwise, you may cause serious damage to your phone.
- Use the correct adapter for your phone when using the battery pack charger abroad.

Battery Information and Care

- Please read the manual for proper installation and removal of the battery.
- Please read the manual for specified charger and charging method.
- Do not damage the power cord by bending, twisting, or heating. Do not use the plug if it is loose as it may cause electric shock or fire. Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause electric shock or fire.
- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty. When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire. If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-
circuit the phone. Always cover the receptacle when not in use.

- Recharge the battery after long periods of non-use to maximize battery life. Battery life will vary due to usage pattern and environmental conditions.

- Please use only an approved charging accessory to charge your LG phone. Improper handling of the charging port, as well as the use of an incompatible charger, may cause damage to your phone and void the warranty.

- Never store your phone in temperatures less than -4°F or greater than 122°F.

- Charging temperature range is 32°F and 113°F. Do not charge the battery outside this range. Doing so may generate excessive heat causing serious damage to the battery deteriorating battery life and/or other battery characteristics.

- Do not use or leave the battery in direct sunlight or inside a hot car. The battery may generate heat, smoke or flame, as well as deteriorating battery life and/or other battery characteristics.

- The battery pack has a protection circuit. Do not use near places that can generate more than 100V static electricity which could damage the protection circuit. Damaged protection circuits may rupture, smoke, or ignite.

- When using the battery for the first time, if it emits a bad smell, you see rust on it, or anything else abnormal, do not use the equipment. Return it to the place where it was bought.

- If children are allowed to use the device battery, an adult is responsible for teaching about the safe handling and use of batteries, as well as supervising their proper use and care.

- Keep the battery away from young children. Safeguard so that small children do not remove the battery from the charger or device.

- If liquid from the battery rubs against skin or clothing, rinse with clean water. The battery liquid could cause skin irritation.
Safety

- Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.
- Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.
- The charger and adapter are intended for indoor use only.
- Insert the battery pack charger vertically into the wall power socket.
- Never use and unapproved battery since this could damage the phone and/or battery and could cause the battery to explode. Only use the batteries and chargers provided by LG. The warranty will not be applied to products provided by other suppliers. Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.
- Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. This could cause a fire. Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire. Don’t short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.
Explosion, Shock, and Fire Hazards

- Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.
- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty.
- When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire.
- If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.
- Don’t short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.

General Notice

- Using a damaged battery or placing a battery in your mouth may cause serious injury.
- Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.
- Talking on your phone for a long period of time may reduce call quality due to heat generated during use.
- When the phone is not used for a long period of time, store it in a safe place with the power cord unplugged.
- Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.
- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized Service Center to replace the damaged antenna.
- Do not immerse your phone in water. If this happens, turn it off...
immediately and remove the battery. If the phone does not work, take it to an LG Authorized Service Center.

- Do not paint your phone.
- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ringtones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.
- When you use the phone in public places, set the ringtone to vibration so you don’t disturb others.
- Do not turn your phone on or off when putting it to your ear.
- Use accessories, such as earphones and headsets, with caution. Ensure that cables are tucked away safely and do not touch the antenna unnecessarily.

**Caution:**
**Avoid potential hearing loss.**

Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise induced hearing loss. This includes the use of headphones (including headsets, earbuds and Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing. Individual susceptibility to noise-induced hearing loss and other potential hearing problems varies. The amount of sound produced by a portable audio device varies depending on the nature of the sound, the device, the device settings and the headphones. You should follow some commonsense recommendations when using any
portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.

- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.

- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-cancelling headphones to block out background environmental noise.

- Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.

- Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.

- Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of Radio Frequency (RF) energy in the microwave range while being used. They also emit very low levels of RF when in standby mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some
cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is the FDA’s role concerning the safety of wireless phones?

Under the law, the FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit Radio Frequency (RF) energy at a level that is hazardous to the user. In such a case, the FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace, or recall the phones so that the hazard no longer exists. Although the existing scientific data does not justify FDA regulatory actions, the FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

The FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well. The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that
are sold in the United States must comply with FCC safety guidelines that limit RF exposure. The FCC relies on the FDA and other health agencies for safety questions about wireless phones. The FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term “wireless phone” refers here to handheld wireless phones with built-in antennas, often called “cell”, “mobile”, or “PCS” phones. These types of wireless phones can expose the user to measurable Radio Frequency (RF) energy because of the short distance between the phone and the user’s head. These RF exposures are limited by FCC safety guidelines that were developed with the advice of the FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called “cordless phones,” which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of Radio Frequency (RF) energy exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that
showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we do not know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect, if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but ten or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop — if they do — may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.
6. What is the FDA doing to find out more about the possible health effects of wireless phone RF?

The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to Radio Frequency (RF) energy. The FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues.

The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research And Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much Radio Frequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit Radio Frequency (RF) energy exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless phones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic
Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body’s ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your phone’s RF exposure level in the online listing.

8. What has the FDA done to measure the Radio Frequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the Radio Frequency (RF) energy exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, “Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques”, sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone.

SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to Radio Frequency energy from my wireless phone?

If there is a risk from these products — and at this point we do not know that there is — it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few
simple steps to minimize your exposure to Radio Frequency (RF) energy. Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure. If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data does not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using wireless phones?
The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to Radio Frequency (RF) energy, the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?
Radio Frequency (RF) energy from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure Electro Magnetic Interference
(EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI.

The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a “compatible” phone and a “compatible” hearing aid at the same time. This standard was approved by the IEEE in 2000. The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, please refer to the following resources:

National Radiological Protection Board (UK) (http://www.nrpb.org.uk/)
10 Driver Safety Tips

Your wireless phone gives you the powerful ability to communicate by voice almost anywhere, anytime.

An important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When operating a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

2. When available, use a hands-free device. A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.

3. Make sure you place your wireless phone within easy reach and where you can reach it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your Voicemail answer it for you.

4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

5. Don’t take notes or look up phone numbers while driving. If you are reading an address book or business card, or writing a “to-do” list while driving a car, you are not watching where you
are going. It is common sense. Do not get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.

6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light, or otherwise stationary. But if you need to dial while driving, follow this simple tip -- dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix; they are distracting and even dangerous when you are behind the wheel of a car. Make people you are talking with aware you are driving and if necessary, suspend conversations which have the potential to divert your attention from the road.

8. Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations -- with your phone at your side, help is only three numbers away. Dial 911 or other local emergency number in the case of fire, traffic accident, road hazard, or medical emergency. Remember, it's a free call on your wireless phone!

9. Use your wireless phone to help others in emergencies. Your wireless phone provides you a perfect opportunity to be a “Good Samaritan” in your community. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not
urgent enough to merit a call for emergency services. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

The above tips are meant as general guidelines. Before deciding to use your mobile device while operating a vehicle, it is recommended that you consult your applicable jurisdiction’s local laws or other regulations regarding such use. Such laws or other regulations may prohibit or otherwise restrict the manner in which a driver may use his or her phone while operating a vehicle.

**Consumer Information on SAR**

*(Specific Absorption Rate)*

This Model Phone Meets the Government’s Requirements for Exposure to Radio Waves. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These FCC exposure limits are derived from the recommendations of two expert organizations, the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy. The exposure Limit for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR is a measure of the rate of
absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg). The FCC exposure limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements. Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. This device was tested for typical body-worn operations with the back of the phone kept 0.79 inches (2.0 cm) between the user’s body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.79 inches (2.0 cm) must be maintained between the user’s body and the back of the phone. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.79 inches (2.0 cm) separation distance between the user’s body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. The highest SAR value for this model phone when tested for use at
the ear is 1.26 W/kg and when worn on the body, as described in this user’s manual, is 0.511 W/kg. While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID.

To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone. Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.ctia.org/

*In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids. The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities. While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more
immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users to find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box. The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings. Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This should provide the hearing aid user with “normal usage” while using their hearing aid with the particular wireless phone. “Normal usage” in this context is defined as a signal quality that’s acceptable for normal operation.

The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U
Safety

and UT marks are referenced in Section 20.19 of the FCC Rules. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

There are a variety of accessories available for your phone and three easy ways to purchase them: shop online anytime at www.verizonwireless.com, call us at 1866 VZ GOT IT (894 6848) or visit one of our Verizon Wireless Communication Stores.
LIMITED WARRANTY STATEMENT

1. WHAT THIS WARRANTY COVERS:

LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

(1) The limited warranty for the product extends for TWELVE (12) MONTHS beginning on the date of purchase of the product with valid proof of purchase, or absent valid proof of purchase, FIFTEEN (15) MONTHS from date of manufacture as determined by the unit’s manufacture date code.

(2) The limited warranty extends only to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.

(3) This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S., including Alaska, Hawaii, U.S. Territories and Canada.

(4) The external housing and cosmetic parts shall be free of defects at the time of shipment and, therefore, shall not be covered under these limited warranty terms.

(5) Upon request from LG, the consumer must provide information to reasonably prove the date of purchase.

(6) The customer shall bear the cost of shipping the product to the Customer Service Department of LG. LG shall bear the cost of shipping the product back to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

(1) Defects or damages resulting from use of the product in other than its normal and customary manner.

(2) Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized connections, unauthorized repair, misuse, neglect, abuse, accident, alteration, improper installation, or other acts which
are not the fault of LG, including damage caused by shipping, blown fuses, spills of food or liquid.

(3) Breakage or damage to antennas unless caused directly by defects in material or workmanship.

(4) That the Customer Service Department at LG was not notified by consumer of the alleged defect or malfunction of the product during the applicable limited warranty period.

(5) Products which have had the serial number removed or made illegible.

(6) This limited warranty is in lieu of all other warranties, express or implied either in fact or by operations of law, statutory or otherwise, including, but not limited to any implied warranty of marketability or fitness for a particular use.

(7) Damage resulting from use of non LG approved accessories.

(8) All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.

(9) Products operated outside published maximum ratings.

(10) Products used or obtained in a rental program.

(11) Consumables (such as fuses).

3. WHAT LG WILL DO:
LG will, at its sole option, either repair, replace or refund the purchase price of any unit that does not conform to this limited warranty. LG may choose at its option to use functionally equivalent re-conditioned, refurbished or new units or parts or any units. In addition, LG will not re-install or back-up any data, applications or software that you have added to your phone. It is therefore recommended that you back-up any such data or information prior to sending the unit to LG to avoid the permanent loss of such information.

4. STATE LAW RIGHTS:
No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY, IS LIMITED TO
LIMITED WARRANTY STATEMENT

THE DURATION OF THE EXPRESS WARRANTY HEREIN. LG SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY APPLICABLE TO THIS PRODUCT.

Some states do not allow the exclusive limitation of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

5. HOW TO GET WARRANTY SERVICE:

If you experience any problems with either the Qwerty keypad or the mobile handset, in each case as may be covered by this limited warranty, you need only return the affected device. For example, if a problem exists with the Qwerty keypad, please DO NOT return your mobile handset with the module. Likewise, if a problem exists with the mobile handset, please DO NOT return the Qwerty keypad with the handset.

To obtain warranty service, please call or fax to the following telephone numbers from anywhere in the continental United States:

Tel. 1-800-793-8896 or Fax. 1-800-448-4026

Or visit http://us.lgservice.com. Correspondence may also be mailed to:

LG Electronics Service- Mobile Handsets, P.O. Box 240007, Huntsville, AL 35824

DO NOT RETURN YOUR PRODUCT TO THE ABOVE ADDRESS. Please call or write for the location of the LG authorized service center nearest you and for the procedures for obtaining warranty claims.
**Terminology**

**EZ Tip Calculator**
Feature for easy bill calculation using the total cost, tip, and number of people as variables.

**Advanced Voice Commands**
Feature that allows you to perform a wide range of verbal commands by training the phone to recognize your individual speech patterns.

**Bluetooth® wireless technology**
Technology used to allow mobile phones, computers, and other personal devices to be easily coordinated and interconnected using a short-range wireless connection.

**Media Center**
Feature that accesses the Internet to provide the ability to access and even download a wide variety of software, information, music, video, and more right on your LG Verizon wireless phone.

**V Cast Videos**
Feature that is the next generation in wireless technology which transforms your wireless phone into a portable music player and delivers an amazing streaming mobile video experience. V CAST uses technology that significantly increases download capabilities to deliver better graphics, sound and depth and uses the power of broadband so that you can download the hottest entertainment, sports highlights, news and breaking weather to your Verizon Wireless V CAST phone. The new V CAST phones provide better imaging capabilities, mega pixel cameras, improved audio and expandable memory storage.

**Acronyms and Abbreviations**

**DTMF**
Dual-Tone Multi Frequency (or “touch-tone”) is a method used to communicate keys pressed on the phone. Pressing a key generates two simultaneous tones, one for the row and one for the column to determine which key was pressed.
Glossary

ERI

Enhanced Roaming Indicator is a feature to indicate whether a mobile phone is on its home system, a partner network, or a roaming network. Many phones indicate home vs. roaming as an icon, but ERI capable phones can clearly indicate third “partner network” status.

GPS

Global Positioning System is a system of satellites, computers, and receivers able to determine the latitude and longitude of a specific receiver on Earth. Position is calculated using time and distance.

IS 2000

Type of digital signaling. It’s the second generation of CDMA digital cellular, an extension of IS-95. Differences between signaling types have to do with pilot signal and links to provide more traffic channels, and control protocols.

NAM

Number Assignment Module is how the phone stores the phone number and its electronic serial number.

SSL

Secure Sockets Layer Protocol used to encrypt data sent over the air.

TTY

Tele typewriter. An electromechanical typewriter that either transmits or receives messages coded in electrical signals. A phone with TTY support is able to translate typed characters to voice or translate voice into characters to display on the TTY.
