

LG ULTRAGEAR POWERS THE HUNT WITH NEW CAPCOM PARTNERSHIP

LG UltraGear OLED 27GX790A Designated the Preferred Gaming Monitor of Monster Hunter Wilds™

ENGLEWOOD CLIFFS, N.J., June 18, 2025 – LG Electronics and Capcom, the publisher behind the recently released and widely-popular video game, *Monster Hunter Wilds™*, are joining forces. Capcom has designated the [LG UltraGear™ OLED GX7 \(27GX790A\)](#) the “Preferred Gaming Monitor for *Monster Hunter Wilds*,” offering players a leg up as they explore the Forbidden Lands and battle the massive monsters who live there with a blazing 480Hz refresh rate, ultra-fast 0.03ms response time, and DisplayPort 2.1 connectivity.¹

Bringing together the unmatched clarity and high-performance power of LG UltraGear OLED monitors with the immersive world of *Monster Hunter Wilds*, LG and Capcom are uniting cutting-edge hardware and iconic storytelling to promote a gaming experience that *Monster Hunter™* fans and gamers of all kinds will love. “The LG UltraGear OLED GX7 monitor captures the color intensity we poured into the *Monster Hunter Wilds* gamescape with incredible precision,” said Mike Lunn, Senior Brand Manager, Capcom USA. “In both LDR and HDR, its ability to render vivid tones—especially in the red-orange spectrum—is an ideal match for the dramatic lighting and elemental richness we designed into the game.”

The successor to Capcom’s fan-favorite *Monster Hunter* franchise, *Monster Hunter Wilds* has sold more than 10 million copies and is the studio’s biggest title to date. “A game as visually-rich as *Monster Hunter Wilds* deserves to be played on a monitor that does justice to its graphics. The LG UltraGear OLED GX7 does just that, bringing the game to life in unbeatable clarity, with impressively fast, tear-free gaming,” said Erica HeunJung Lee, Monitor Business Manager, LG Electronics USA.”

With vibrant LG OLED picture quality, the 27-inch LG UltraGear GX7 monitor brings *Monster Hunter* hunts to life with sharp and color-rich visuals. Its slim, virtually bezel-less design maximizes screen space, while RGB backlighting adds customizable ambiance, drawing players into the game and enhancing the gaming setup ambiance. The 27GX790A features a 26.5-inch low-glare QHD OLED display and a 2560 x 1440 resolution. Paired with a 16:9 aspect ratio and DCI-P3 98.5% color gamut, the LG UltraGear GX7 offers an ultra-immersive experience that a wide variety of gamers will appreciate.

Monster Hunters Wilds made its Times Square debut on LG’s iconic billboard, introducing the brand to countless NYC visitors. The visually stunning, high-definition display combines digital storytelling and immersive visuals straight from the *Monster Hunters Wilds* gamescape. Additionally, this month, LG UltraGear OLED monitors—including the GX7—will feature *Monster Hunter Wilds* demo content in more than 900 Best Buy stores, capturing the attention of fans and introducing new players to the game.

Now through the end of the year, *Monster Hunter Wilds* gamers who purchase an LG UltraGear OLED monitor on LG.com can receive an LG Exclusive Slinger Pack with a curated collection of in-game digital accessories.

For more information, please visit LG.com.

¹ Graphics card that supports DisplayPort 2.1, and DisplayPort 1.4 or HDMI 2.1 are required to achieve up to 480Hz refresh rate support. Graphics card sold separately.
