

Life's Good.

ISTE 2026 Booth #2246

**CONNECTED EDTECH SOLUTIONS FROM LG ELECTRONICS USA
DEFINE THE FUTURE OF LEARNING AT ISTE LIVE 2026**

*Exhibit Features Interactive Displays, Campus Communication Tools and
New LG Honors Program For Education*

News Summary

- At ISTE Live 2026, LG Electronics USA will feature LG CreateBoard® interactive displays, kiosks and technologies designed to support instruction, communication and engagement in classrooms and beyond.
- LG is introducing the new “LG Honors Program for Education” at the show, giving schools access to special promotions, warranty coverage, support resources and professional development opportunities.
- In-booth presentations for educators will include a session on using AI to support math learning through human-centered, collaborative instruction.

ORLANDO, Fla., June 25, 2026 — Education technology leader [LG Electronics USA](#) will highlight advanced classroom displays, software tools, campus communication technologies and support programs designed to help schools manage technology across learning environments at ISTE Live 2026, the conference of the International Society for Technology in Education, June 29-July 1 in Orlando.

In booth #2246 at the Orange County Convention Center in Orlando, attendees can explore LG CreateBoard interactive displays, kiosks and commercial display solutions for classrooms, shared spaces and public spaces, along with tools that support content sharing, school communication and device management. LG will also introduce the new LG Honors Program for Education and host in-booth presentations for educators and school leaders focused on practical strategies for using technology to support teaching, operations and campuswide engagement.

“Schools are under pressure to make technology investments that support teaching and learning, but are also manageable and sustainable over time,” said Victoria Sanville, Education Director for LG Electronics USA. “At ISTE, we’re showing how displays, software and support programs can work together as part of a more connected school environment that helps educators engage students, gives administrators clear communication tools and provides IT teams with strong long-term support.”

LG Honors Program for Education Extends Support Beyond the Screen

ISTE Live 2026 is the launchpad for [LG Honors for Education](#), a new program designed to help schools approach technology investments with greater confidence and long-term support. Created for education environments, the program reflects LG's broad commitment to helping schools plan, deploy and sustain technology across evolving learning environments. Key benefits include:

- **Affordable access:** Specialized education pricing and a lowest price guarantee to help schools acquire needed technology more cost-effectively.
- **Long-term protection:** Complementary five-year limited warranty coverage designed to give schools added confidence in their technology investment.
- **Direct service and guidance:** U.S.-based service and support, plus consultation with education technology specialists to help schools plan deployments and reduce the total cost of ownership.
- **Software and management tools:** Access to LG's software suite, including lesson preparation and device management resources that can help simplify day-to-day technology use.
- **Professional development:** PD-credited training opportunities, invitations to [LG Schools](#), [LG Educators](#) and [LG Advisory Board](#) programs, and access to special events and thought leadership programming.
- **Partner ecosystem access:** Connections to LG verified education technology integrators, resellers and solution providers to support implementation and ongoing success.

Taken together, the program positions the LG Honors Program for Education as part of a broader effort to help schools approach technology more strategically over time, according to Sanville. "By emphasizing sustained support and practical value, LG is aiming to help education teams navigate evolving needs with greater clarity and confidence," she said.

LG Booth Demonstrations Bring Classroom, Campus and Venue Use Cases to Life

At booth #2246, LG will showcase how connected display technologies can support instruction, communication and engagement across education environments. The exhibit will feature LG CreateBoard interactive displays, kiosks and commercial display solutions for classrooms, common areas and other shared spaces, highlighting how schools can use display technology in more coordinated ways across campus.

Demonstrations will show how these technologies can support classroom collaboration, schoolwide messaging, safety communications and device management, while also adapting to higher-visibility campus settings. LG's integrated stadium solution combines a 136-inch LED display with OneRevel software, helping K-12 schools maximize multi-use venue value, generate revenue, enhance community engagement, and simplify procurement through a variety of purchasing methods.

Booth Presentation Examines AI In Classroom Learning

LG's in-booth programming will also feature a presentation by Brendan Brennan, director of entrepreneurship at Carrollwood Day School in Florida. His session, "The Stack Effect: An AI Math Framework Grounded in Human Experience," will examine how educators can use artificial intelligence alongside tactile, collaborative learning through a model associated with a reported 2.5-grade-level increase in student proficiency. The framework combines AI-assisted individual work with paired problem-solving, verbal reasoning and physical collaboration.
