

THE COMPACT QWERTY FOR QUICKER TEXTING

I'm the type of person who needs to know the very latest the absolute soonest. My alphabet shrinks to a second-by-second shorthand of what's happening in the moment. My thumbs hit warp speed the instant a text alert rings out. It's people like me who crave the messaging genius and compact look-and-feel of LG Attune™. It's the ultimate digital conversation tool for those just like me with no time to waste.

For me, texting is a "contact" sport. With Attune, a finger flick on the touch screen displays my friend favorites and gives me one-touch access to texting. I can flick the screen the other way to view a bubble-threaded message of my entire digital dialogue all in one place. Attune's 1.3 megapixel camera gives me a rich way to spice up my messages, too. What's also cool is that I can enjoy my music wirelessly on my Bluetooth® stereo headset* – no need to get tangled up in my tunes.

*Bluetooth accessories sold separately.

LG ATTUNE™

SIDE-SLIDING QWERTY Attune sports the ultimate texting tool, so you won't be held back during your back-and-forth. Its design is purse-and-pocket friendly and features a 2.8" touch screen for easy navigation.

ONE-FLICK FAVORITES Swipe a finger to the left on the home screen to reach your top contacts. Tap a name and choose an icon to quickly start your text message.

BUBBLING OVER Slide a finger to the right and pull over a full-screen text dialogue that's bubble threaded so you can see all the "he-said, she-said" details of your conversations.

1.3 MP SNAPSHOTS That's plenty of pixels to capture the details in your viewfinder. Use the image editor to zoom, crop, and make other fun photo adjustments.

ATTUNED TO YOUR MUSICAL TASTES Load up Attune's music player with your mixes, create and manage your playlists, then sit back and enjoy.
