Dust Compression System
(with Wiper Blade)
- DualForce+™ Suction
- Click 'N Go™ Wand
- RF Control™
- Convenient Long Reach Cord (40 Ft.)
- LG's Upright Vertical Cyclone System
- HEPA Filter
- Pet Hair Turbine Tool
- AAFA Certification

BETTER VACUUM, BETTER HOME

When you consider what an LG KOMPRESSOR® Vacuum is capable of next to a traditional vacuum, the difference is night and day. KOMPRESSOR® technology means no more messy vacuum bags or having to empty them constantly. Stubborn dirt no longer seems so stubborn with DualForce+™ suction. This is way more than a vacuum. See for yourself.

KOMPRESSOR® System

Goodbye messy vacuum bags. The KOMPRESSOR® system uses a unique wiper blade within the bagless bin to keep it clean while compressing dust intake. That allows you to store up to 3 times more dirt, dust and pet hair vs. non-compressor models, and means there's an easy-to-dispose-of cake of dust when you empty it.

DualForce+™ Suction

DualForce+™ suction uses an enhanced motor and two additional air pathways to pick up dirt from both sides, in addition to the traditional center section. This allows you to capture dirt and dust over a wide surface area, and is ideal for picking up dust in hard-to-reach edges.

Click 'N Go™ Wand

Hard-to-reach spots just got easy. The Click 'N Go™ Wand detaches from the base – providing up to 15 feet of additional reach – for easier cleaning of stairs, upholstery, and other out-of-the-way spots.
