- 3ms Response Time (typical)
- 400 cd/m<sup>2</sup> Brightness
- SRS® TruSurround HD®
- Aspect Ratio Control
- Auto Bright

\* 2 HDMI™ Inputs

## Is it a monitor? Or something better?

The LG W2363D monitor supports compatibility with NVIDIA® 3D VISION™\* and features a refresh rate of 120Hz which is optimal for reproducing the realistic 3D scenes. The monitor also features Full HD resolution, an ultra-fast 3ms response time, a 70,000:1 contrast ratio that displays games and movies with virtually no ghosting, and SRS TruSurround HD.

Bring your content alive with 3D technology! The astonishing effects will immediately grab your attention and bring your entertainment experience to the next dimension.

### 120Hz

The W2363D reproduces images at 120 frames per second resulting in excellent reproduction or fast motion scenes in 2D mode while displaying more vivid 3D pictures in 3D mode while being optimized for 3D shutter glasses.

This stunning picture is the reason you wanted HDTV in the first place. With almost double the pixel resolution, Full HD 1080p gives it superior picture quality over standard HDTV. You'll see details and colors like never before.

\*For a small percentage of the population, the viewing of stereoscopic 3D video images may cause discomfort such as headaches, dizziness or nausea. If you experience any symptoms, discontinue using the 3D functionality and contact your health care provider. 3D glasses, graphics card and transmitter required and sold separately.
