

LIFE IN 160 CHARACTERS

Some people ask, am I serious about texting? Oh yeah, you could say that.

I'm as serious about texting as I am about fashion and gossip—which is perfect because LG Beacon has it all. With the touchscreen, quick and easy contacts, and 4-line keyboard with sassy red accents, my messaging is on fire while I'm looking smokin' hot.

Texting my girls, talking to my bf, listening to music, or taking self-portraits that highlight my trend-setting style, LG Beacon has a ton of great ways for me to navigate around my digital life, or connect with my inner diva. Really, it's more than a phone, it's my perfect accessory.

For Fast, Go QWERTY

Is it bad that I giggle when people try to text on a touchscreen? Touchscreens are cool and make browsing easy, but when I've got something to say, a physical QWERTY really is the quickest way to get the word out.

Smooth Navigation

Like I said, for texting I love the QWERTY, but for everything else the touchscreen is the way to go. Spacious, sensitive, and fun—everything is just a few taps away.

Friend Essentials

I have hundreds of friends, but if I can't get to them quickly, it's as bad as having no friends at all. The Beacon zaps that problem with a quick & efficient Contacts system.

He Said, She Said

I'm always up on the latest gossip, because it's all right here in front of me with this cool, bubble-threaded messaging that keeps conversations together and in order.

Life is a Photo Op

For my friends, for my fashion, for myself—there are a million reasons to take pictures, and I'm ready for all of them.

KEY FEATURES

Easy Contact Management for Quick Texting

Quick Access to Favorite Contacts
