

# Enlighten™

## MANY TASKS, ONE PHONE

I'm not tech-hungry or gadget-obsessed—I just have a lot to get done, so I need a smart-phone that can not only handle the ride, but helps to speed things up. Texts, emails, social network updates, spreadsheets, online shopping, conference calls—that's not a typical day, that's a typical hour! I never thought I'd be able to find a device that could actually match my energy level, but I'm happy to say that this phone has the brains and brawn to keep up.

This Android™ Gingerbread operating system has a sweet name, but it's built with savory power, getting me from contacts to web to my calendar with no down time. Plus I prefer having lots of options, so I love having both the virtual QWERTY keyboard and the ergonomic slide-out QWERTY keyboard for speedy and smooth messaging. And with seven customizable home screens, I can have Enlighten arranged just like my life...my way.

### It processes. It obeys.

The Android 2.3 platform makes my mobile life easy with efficient navigation, intuitive function, complete customization, and much more.

### The power for productivity.

This 800 MHz processor gives me the multitasking muscle I need for workdays, weekends, and everything in between.

### Fast typing, comfortable thumbs.

Enlighten's ergonomic QWERTY keyboard with generous sized keys allows me to fire out emails quickly and comfortably.

### My phone. My system.

With seven customizable home screens, the Enlighten is smart enough to adapt to my needs.
